"Dissatisfaction with a sweeping cut in high school teachers' salaries was revealed here with the close of the school year," says a news telegram from Klamath Falls. "Women instructors and first year men were reduced from \$1700 to \$1550, men instructors from \$1950 to \$1800. The principal's salary was cut from \$3000 to \$2700. Besides the actual decrease from the present scale, the teachers lost the scheduled annual seniority increase. The action of the school board is causing quite a stir in school circles and it is prophesied that it will prevent the return of many of the instructors and building up of a permanent organization."

HERBERT HANNA BADLY BURNED

Attorney Herbert Hanna was severely burned about the face, head, and hands Saturday evening at his home in Jacksonville when a gas stove he was lighting, exploded. As a side result, the house caught fire in three places, but was extinguished without material damage. Dr. J. E. B. Pickett dressed the wounds, which while painful are not serious. Attorney Hanna was able to come to work this morning with his face bandaged.

WENATCHEE SEES A BUMPER CROP

WENATCHEE, Wash., May 15.—Back from a trip through the orchard districts of Okanogan county, P. S. Durlington, district horticulturist, states that present indications point to a crop of about four thousand cars in Okanogan county, an increase of 1900 cars over last year. The frost damage was small, he says, and prospects are that the county will have by far the largest crop ever produced.

STRIKE SETTLEMENT ENCOUNTERS SNAG

PORTLAND, May 15.—The state board of conciliation's first move toward the settlement of the longshoremen's strike resulted in a deadlock today when two members of the longshoremen's union and two representatives of the employers gave up attempts to select a fifth member of a committee which was to consider the board's proposal for settlement.

Chairman W. F. Woodward of the state board who was unofficially advised of the situation, which was to be formally reported this afternoon, said the board would not give up its attempt to find a settlement, but will insist upon some alternative plan for getting both sides together with a view to reaching an agreement.

Calyx Spray for Apples

Most of the apples on the floor of the valley are ready for the calyx application. There is a wide range of conditions over the entire county, with some apples just in full bloom and others where practically all of the petals have fallen. This application for codling moth should be applied when about 90 per cent of the petals have fallen. The calyx cup of the apple will close within four to six days after the petals have dropped, so that it is difficult to get the poison where it is most needed and it is very necessary that spraying be rushed at this time, in order to fill the calyx cups of the apples before it is too late.

This is a very important spray in controlling codling moth. With warm days it will not be long until the worms are hatching out and

pears that have not been sprayed with arsenate of lead should be sprayed within the next week or ten days. Standard strength for this spray is 1 pound of dry arsenate to 50 gallons of water, or 2 pounds of paste. However, this can be increased 50 per cent if the orchardists so desire. Spreeder can be used to good advantage in this spray and all of the leaves, as well as the fruit should be coated at this time, as many of the first eggs hatch out in the leaves.
