FORD AND FORDSON POWER EXPOSITION REACHES VALLEY

The widely heralded Ford and Fordson power exposition, passed through Medford yesterday afternoon, en route to Ashland for the first of a series of power farming and industrial demonstrations embracing the entire state and covering an approximate mileage of 4,000, within a period of about three months.

Headed by a big Lincoln chassis, representing the latest addition to the Ford and associated products, the caravan proceeded in parade formation, attracting considerable attention in the business section of the city. The show returns to Medford for a series of demonstrations Monday and Tuesday. Some of these demonstrations will occur on the new Jackson county fair grounds, others upon nearby farms, and still others within the city, where commercial, contracting and industrial demonstrations will be featured.

Although each piece of equipment seems to attract its own following, widespread interest has been aroused by the almost phenomenal time made by the caravan as a whole.

The show reached Medford at an hour actually in advance of its scheduled arrival. Numerous and difficult detours were encountered. The roads were rough, the grades steep. Practically every unit was of more than average weight. Some of the apparatus, with trailers attached, required exceedingly good driving on sharply curved detours, yet the caravan moved steadily along the line without a single serious mishap.

"It has been a wonderful experience," said J. D. Jordan, assistant branch manager of the Ford Motor company, Portland, "but we have proved conclusively the ready adaptability of both truck and tractor to practically every condition likely to arise in any part of the country. But what we have accomplished in this overland trip is merely an indication of the much greater possibilities of automotive operations on the farm and in virtually every commercial industrial field.

"The splendid reception received at all points has well repaid us for the journey thus far," continued Mr. Jordan, "and every man in our crew is alive with enthusiasm and eager to meet the slightest wish of every man, woman or child who is or may become interested in any equipment or apparatus accompanying the caravan."

Local arrangements are being perfected by Mr. George Gates, of the C. E. Gates Auto company, authorized Ford and Fordson distributors in Medford territory.

"The equipment is so complete," said Mr. Gates, "that we shall be able to demonstrate practically every feature of truck and tractor operation whether it be on the farm, a contracting or engineering job or commercial hauling or delivery of any kind.

"In fact," added Mr. Gates, "so confident are we of our ability to successfully demonstrate any equipment in the caravan that we urge it every resident of Medford and vicinity
