It is rumored that the long looked for dance pavilion at the county fair grounds may at last be realized. Despite the short time remaining before the opening of the fair, September 13, plans are being made to have a dance pavilion. Knowing the fallacy of attempting a real fair without proper amusement and adequate entertainment facilities, a number of Medford business men are now making plans to take charge of this important concession and to make it one of the biggest features of the fair week. If a satisfactory arrangement can be made the actual construction work will be pushed at once and the structure will be pushed to completion in time for the 1922 fair.

A novel arrangement was seen yesterday on the Pacific highway. Four complete bicycles were fastened together and a platform was built in the rectangle between them. The rear end of the rectangle was extended several feet to the rear of the two rear bicycles. In this extension sat the two youngest members of the family. Two older children rode the two rear bicycles and mother and father piloted the two front machines. Household utensils and bedding filled the large platform and the entire family traveled without being compelled to resort to gasoline. Who really had full control of the machine cannot be ascertained.
