

DEMONSTRATIONS OF OIL SHALE AT ASHLAND GARAGE

What is probably one of the most extensive and valuable deposits of oil shale in the United States has been uncovered by engineers of the Hartman Syndicate of the Pacific Coast in the Dead Indian country at the head of Antelope valley and Southern Oregon has promises of a new industry which will materially increase her pay-roll in time. The Hartman Syndicate controls the use of Hartman retorts in the territory west of the Mississippi river and will employ this type of retort to extract oil from shale. The company has under lease from the government 3500 acres of land that is practically a solid mass of oil-bearing shale and is now taking steps to begin the actual production in southern Oregon.

H. W. Hartman, head of the syndicate, is widely known as former chief of maintenance and construction of the great nitrate plant which was constructed at Mussel Shoals during the war, where at one time he had under his supervision 14,000 men. He is construction engineer and contractor of the Hartman Syndicate and brother of the inventor of the Hartman retort.

Associated with him is W. A. Pettigrew, a civil engineer of many years experience. Mr. Hartman and Mr. Pettigrew were the engineers who followed the float and surface indications of shale in the Dead Indian country and determined the extent of the vast deposits. G. S. Pettigrew is also with the company as mechanical engineer. James Barrett, a well-known Ashland cattleman, is one of the principal promoters of the enterprise.

Public demonstrations for the people of Southern Oregon interested in the plans of the company are held every afternoon at Mack's Garage in Ashland in which a retort of one-ton capacity is employed. This retort extracts 100 gallons of oil, over two barrels of oil from one ton of Dead Indian shale. This is a high grade oil with a paraffin base. Besides gas there are by-products of gas, lamp-black and fireclay.

Two U. S. Treaties Registered With League of Nations

GENEVA, Aug. 16.—Two American treaties—that ending the state of war between the United States and Germany and the United States and Japan—have been registered with the League of Nations by Germany and Japan.

The Japanese-American treaty was one of sixty registered by Germany who, although not a member of the league, has offered to register her diplomatic agreements.

More than 300 treaties, including a score signed by the United States now have been filed with the league secretariat.

WHY THAT LAME BACK?

That morning lameness—those sharp pains when bending or lifting, make work a burden and rest impossible. Don't be handicapped by a bad back—look to your kidneys. You will make no mistake by following this Medford resident's example.

Mrs. J. H. Gustin, 521 S. Grape St., says: "I have been taking Doan's Kidney Pills off and on for years whenever I have felt the need for a kidney remedy and I have always received satisfactory results. My kidneys have always been weak and the least little cold or strain affects them and makes my back weak and lame. A couple of boxes of Doan's Kidney Pills, however, have never failed to remove the misery and strengthen my kidneys."

Four Years Later: Mrs. Gustin said: "I gladly confirm all I said in my former statement in favor of Doan's Kidney Pills as they have never failed to give me good relief. I use them when I have any sign of kidney disorder with fine results."

THOS. I. TEMPLE, Medford

Woman Held by Dry Raider as Hostage to Force Return of Bootlegging Husband

When Clarence Bell, of Cincinnati, returned to his home last week he found his wife and four year old son absent. Banned to the back of a chair was this note:

"We are holding your wife at Loveland, Ohio, until you appear before the mayor of said village of Loveland to face a charge of possessing intoxicating liquor. We advise

your immediate appearance or a warrant will be sworn out for you.

"William J. Fritsch, Deputy Marshal."

As a result, a warrant, charging kidnapping, was issued against Fritsch, who is the third prohibition agent to be arrested in Cincinnati this year. Photo of Mrs. Pearl Bell, wife of Clarence Bell, with their son.

1925 EXPOSITION CARAVAN TO BE IN CITY FRIDAY

The Oregon Exposition caravan under the direction of Mayor George L. Baker of Portland will arrive in Medford Friday afternoon at 4:15 from Crater lake. Mayor C. E. Gates is making the local arrangements and an impromptu meeting will be held Friday evening in the city park during the band concert. Speakers of the caravan will be heard at that time.

Saturday morning the caravan starts for Ashland where another large meeting will be held to welcome them. It is expected that there will be a large crowd at the meeting here Friday night as among the speakers who will be heard are some of the most prominent business men on the coast.

The object of this caravan is to convey to the people the importance of getting ready for the year 1925 when Oregon will act as host to the civilization of two continents.

This caravan was made possible only by the patriotic influence and enthusiastic appreciation of a group of men whose state wide interest has accepted the exposition as the vehicle to place Oregon in international prominence.

The various clubs represented in the caravan consist of Portland Ad

club, State Chamber of Commerce, Portland Chamber of Commerce, Rotary club, Lions club, Kiwanis club, Progressive Businessmen's club, East

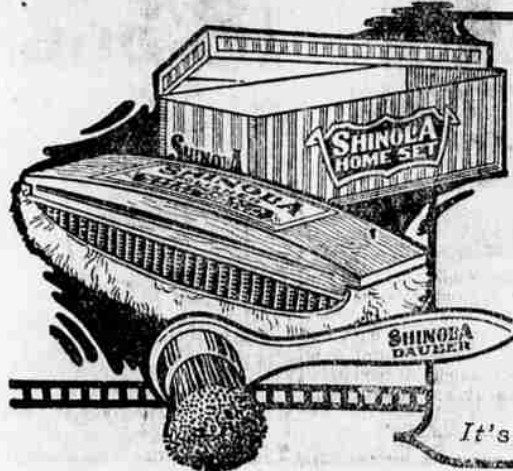

Side Businessmen's club, The Press club and other organizations. The mission of the caravan is to carry a message to the people of Ore-

gon concerning the needs and inspiration surrounding the building of the 1925 Exposition and what the fruits of our labor will be.

SHINOLA

America's Home Shoe Polish

and SHINOLA HOME SET

Great For School Children

The SHINOLA HOME SET helps the children to form lasting habits of economy, by making it easier to get the daily shine.

The genuine bristle dauber cleans the shoes, and applies polish easily and quickly.

The large Lamb's Wool Polisher brings the shine with a few strokes.

For 100% neatness, the shoes should be shined daily with SHINOLA.

Shinola—Always 10c

Black, Tan, White, Ox-blood and Brown.

It's best to say "SHINOLA"

Free from
destructive
"sulpho"
compounds

—the trouble makers
in your engine

Destructive "sulpho" compounds are damaging impurities that cause motor oil to break down and thin out rapidly under engine heat.

Lubrication scientists have long sought to prevent this quick decomposition of oils. The Hexeon process, used only by us, accomplishes this end. It removes destructive "sulpho" compounds. Cycol is the only motor oil made by the new Hexeon process.

Cycol retains its "body" under engine heat—maintains an unbroken oil film between moving parts—protects you against many serious engine troubles.

For best results flush your crank case with fresh lubricating oil—not so-called flushing oils or kerosene—and refill with Cycol.

The importance of the Lubrication Chart

Different brands of motor oils have different bodies. The safest, surest way to get the best performance from your motor and avoid expensive engine troubles due to incorrect lubrication is to use the grade of motor oil specified on the Cycol Lubrication Chart.
