SALVATION IS A GIFT, NEED IS TO ACCEPT IT

A stirring and strong sermon was delivered last evening by Dr. S. J. Field at the Free-Evangelistic services at the First Baptist church. Text used was 1 Tim. 1:15. This is a faithful saying and worthy of all acceptance that Christ Jesus came into the world to save sinners. The speaker's theme was "The Plan of Salvation." "Christ was always coming in the Old Testament," said the evangelist, "but there was a day when He came." From that hour the history of the world changed. Christ has not left the world. He is now in the heart of every believer. We know Christ is here because He is saving sinners today. Satan cannot make a good man out of a bad man. He can only make imitation Christians. Christ never told a man that he was a sinner and then left him there. He came not only to show men their sins, but save them from them. When a man is saved he is saved forever.

You do not have to pray, read your Bible to be saved, or become acceptable to God; you are now acceptable to Him. All you have to do is to accept Him. Are you satisfied with what Christ did for you on the cross, then all you have to do is to accept it. All you need do is to accept your lawful rights and be saved. Salvation is a gift; all you can do is to accept a gift. The difference between men is not their dress, but their hearts.

The second address on "Pilgrims Progress" illustrated with the stereopticon was given last evening. These short introductory lectures are proving interesting and helpful. Tonight the service starts again at 7:30 and all who desire to hear a strong gospel message are earnestly invited to attend. Dr. Field with his pleasing personality make him an outstanding and effective preacher and evangelist.

ODD FELLOWS TO HOLD REUNION IN ASHLAND, THURS.

ASHLAND, Mar. 21.—The spring season is ushering in a lot of entertainments, chief among which will be the homecoming reunion of Odd Fellow hosts on Thursday evening of this week, March 22. All Odd Fellows in general are invited, including Rebekahs and their families, visiting members of the order being especially welcome. This town houses Ashland lodge No. 45, the subordinate body; Pilot Rock encampment No. 16, and Hope Rebekah lodge No. 14. The subordinate lodge is a pioneer among fraternal orders in southern Oregon. A canon of patriarchs militant in its prospect, and doubtless in time a unit of Muscovites will be instituted locally, this new departure affording a playground for Odd Fellowship akin to like organizations among other fraternalists. The Muscovites don't necessarily have to assume the role of Bolshevik, though they may do so in playful mood. A branch of that order was recently instituted at Grants Pass. Refreshments will be served at this triple-link "homecoming" affair. There will also be dancing, music, and a program replete with literary treats, many of which will be humorously embellished.

Malta commandery, Knights Templar, meets at Masonic hall, in stated convocation, Wednesday evening, Mar. 21. Any of our young men, possessing requisite qualifications, desiring to tour Alaska, Hawaii, and the Philippines, are referred to regular army recruiting headquarters at the federal building in Medford, where terms, itineraries, and full information in general is available, including reservations.

Well-Timed Gasoline Has a "Follow Through"

THERE'S a marked difference in the way gasolines explode. And it's important that you know.

One kind explodes instantaneously—detonates. It depends on a single crash for the power to drive the piston.

Union Non-Detonating Gasoline explodes in a different way. It thrusts the piston by a long, sustained impulse. It has a "follow through"—exerts a steady pressure throughout the entire stroke.

Detonation Less Efficient

A crashing explosion is less efficient than one that's prolonged.

It limits the compression because of the tendency to explode prematurely. It causes vibration, which means wear and tear.

The Sustained Explosion

The prolonged explosion of Union Non-Detonating Gasoline provides progressive, sustained impulse.

It permits increased compression in your motor, for compression, as all authorities know, is limited by the tendency of fuels to detonate.

Increased Efficiency

Increased efficiency is dependent on compression, the complete burning of the fuel and smooth impulses.

Therefore Union Non-Detonating Gasoline gives a new "lift" on the hills, more speed on the straightaway and a smoother, stronger rush in the "pick-up."

And there's less wear and tear because vibration is reduced.

This higher efficiency means economy also. Union Non-Detonating Gasoline is always uniform. It doesn't disintegrate, thus doesn't deteriorate in storage. It has all the power when you use it that it has when it leaves the Union plants.

So there are several reasons for Union Non-Detonating Gasoline.
