A case of scarlet fever developed in the Roosevelt school during the Thanksgiving vacation. However, no symptoms had developed when the school closed for the holidays, so that it is believed that there is no danger of the disease being spread in the school. Miss Ida Dahl, school nurse, is making a daily check of all the children in the school. There have been three cases of scarlet fever in the schools this fall, but each one in a separate school building. According to attending physicians the cases seem to be sporadic in their nature and were not likely to cause an epidemic.

CRATER LAKE PARK DEFINITELY CLOSED

Crater National park is now definitely closed by nature until the season opens next July 1, as there is at present 19 inches of snow at the rim of the lake and 11 inches at Anna spring camp, five miles this side and lower down. This snow will keep increasing during the winter until there are about as many feet of it as there are now inches.

Last week some adventuresome young men from Eugene attempted to pay a visit to the lake, but their car got stuck in the snow and had to be dug out with the assistance of a ranger.

This is the latest date in the season on record for the park being blocked by snow to motor and other vehicles.
