Sunday was another spring-like day with the exception of a little cloudiness in the forenoon during which just a trace of rain fell. It was too warm for fires inside homes, and for wearing overcoats outside. It is to-night and cooler tomorrow is the weather prediction. Following Sunday's maximum of 69 it grew much colder over night with the result that the early morning minimum of today was 25 degrees.

Forecasting A Tremendous Spring Demand

739,626

more Ford cars and trucks were produced last year than the previous year, an increase of over 50 per cent.

In spite of this tremendous increase in production, it was impossible to meet delivery requirements during the spring and summer months when orders for 350,000 Ford Cars and Trucks could not be filled.

This year winter buying for immediate delivery has been more active than ever before—and in addition 200,000 orders have already been booked through the Ford Weekly Purchase Plan for spring delivery.

These facts clearly indicate that the demand during this spring and summer will be far greater than ever, and that orders should be placed immediately with Ford Dealers as a means of protection against delay in securing your Ford Car or Truck or Fordson Tractor.

A small deposit down, with easy payments of the balance arranged, or your enrollment under the Ford Weekly Purchase Plan, will put your order on the preferred list for spring delivery.
