OPENING

THE DRESS MODE IS FASCINATING

Black and white types of satin, and alpaca colorful effects modeled along the straight chemise lines and buffant styles of rustling taffeta strike the dominating note sponsored by Fashion. To see these with other dress fashions in their diversity is to be at once lifted from sombre winter modes to those that say "Spring is here."

SUITS ARE INTERESTINGLY VARIED

The popular suit for smart spring-time wear is reflected in the numerous versions. Suits beltless, suits with belts, tailleur types, three-piece costumes suits, suits of colorful tweeds, and suits enriched with braids and furs, also suits with skirts featuring circular tunic and tiered effects. Fashion allows much latitude in choice, which vary in color and fabric according to the mode.

COATS SPONSORED BY FASHION

Coats of silk and alpaca are in the front ranks of the fashion promenade, followed by the trim line coats of fabric with unique collars and buttons as their sole distinguishing fabric. Then, of course, the favorite short jacket coat is back again, in new themes, entirely refreshing and fascinating, as is the all-service colorful coat of tweed.

SPRING REFLECTS ITS GAYETY IN MILLINERY

Between turbans and large shapes, Fashion offers numerous opportunities for satisfying personal preference. Color comes to them in numerous ways, in garniture and through the adaptions of Chinese and Hindu color effects. Felt and straw and straw and satin, also shapes covered with moire are used to form shapes delightfully springlike.
