TOM MIX in "SOFT BOILED"

Thorough Seedbed-Maker for Either Horses or Tractor

Whether the plant gets the proper start to make it strong and vigorous depends on the seed bed. A seed bed made with a John Deere-Syracuse Spring Tooth Harrow promotes rapid plant growth. It gets you the big crops.

John Deere-Syracuse

SPRING TOOTH HARROW

The sharp-pointed teeth on the Syracuse penetrate to the depth desired, bring the lower soil to the top, break it up and mix it thoroughly, leaving it in a fine, loose, mellow condition. In this loose state it is well aerated, warms quickly, and offers every inducement to quick seed-germination.

The Syracuse does another important thing. It tears out underground roots and root stems, and kills the weeds before they get a start.

Any number of sections can be furnished to meet your needs. A special hitch also adapts this tool for tractor use.

Come in and inspect this harrow the next time you are in town.
