

Local and Personal

This morning's public market was greatly improved in offerings with a profusion of vegetables in season, and quite a supply of home grown strawberries, six cases of which were sold. Dressed hens and fliers, however, were scarce, with a liberal demand for them. Pliers will start again at the market next Saturday. Because of the backward growing season for some time past there is not enough home grown produce yet to warrant opening the market three days a week, but the chance to three days will be made just as soon as growing conditions will warrant.
