

CHIEF ENGINEER OF PARK SERVICE ON ROAD INSPECTION

George E. Goodwin, chief engineer of the national parks service, who is making a tour of the various national parks, arrived here from Portland this morning en route to Crater lake national park to remain there until Saturday to look over the details of the hard surfacing of the Medford and Klamath entrance roads of the park.

for which the Warren Construction company has the contract and is getting ready to start the work by about July 1.

Mr. Goodwin was met at the depot by his old friend, Alex Sparrow, and Mr. Semon, the resident engineer in charge of the park road improvement work. This noon Messrs. Goodwin and Sparrow banqueted at Dan's Lunch and renewed old times while they each got outside of a pipe of pipe and glass of milk.

Many years ago, shortly after Will G. Steel discovered Crater lake and started to put it on the map nationally, the firm of Goodwin & Sparrow, feeling very philanthropic, decided to help in this work, the former by laying out the roads, etc., and the latter by serving first as road building supervisor and later as superintendent of the park until a few years ago.

The Damon and Pythias spectacle of

these two old gray-haired gentlemen gathered this noon around the festal board eating pie and drinking milk was an inspiring one.

Chief Engineer Goodwin said that he would have enough park funds to complete hard surfacing of the Medford and Klamath roads as far as Government camp this year, but not as far as the lodge. The contractors, he said, would build three miles a month, and would start work on the Medford entrance road first.

Requisition Honored.

SALEM, Ore., June 22.—Governor Pierce today honored a requisition from the governor of Utah for the extradition of E. F. Gore who is wanted in that state on a charge of failure to support his wife and two children. Gore is under arrest at Baker.

BRUSH AND GRASS FIRES BURNING IN SOUTHERN OREGON

Fire season, so far as the forests are concerned, has begun, for four fires burning on state timberland have been reported during the past two days, although as yet none are of a serious nature. Several others burning on other than state land were also reported.

A grass and brush fire at Bybee

Spring is one of the worst, but at present it is nearly under control. Two brush fires near Sardine creek were burning yesterday, with no material damage resulting from either. A small fire has been burning between Roxy Anne and Grizzly peak, but is reported to be of no serious consequence.

A fire caused by lightning during a storm is reported to be burning on Tolman creek, and another near Star ranger station. The latter is entirely out. A blaze burning three miles from the Green Spring mountain road on the Klamath County Protective association line was reported this morning but how bad it is as yet not known.

The fire danger is not as pronounced at the present time as it will be when the grass and brush becomes more thoroughly dried. Practically all the fire lookouts are now at their posts ready to spot any fire which may arise in their section.

HILL R. R. PARTY STOPS AT BEND

BEND, Ore., June 22.—Completing an inspection trip through the central Oregon country through which they propose to extend their railroad lines, a large party of Great Northern and Northern Pacific railroad officials arrived in Bend last night from Klamath Falls and left an hour later by special train for Spokane.

While in Bend they met with a number of city officials and officials of the Bend commercial club.
