SCIENTIST DENIES MAN DESCENDED FROM A MONKEY

PORTLAND, Ore., June 23.—(A. P.)—That man never was either monkey or ape and that assumptions to this effect are erroneous and foolish, was the declaration of Dr. Charles Hill-Tout of Vancouver, B. C., fellow of the Royal Society of Canada, lecturer and student, who spoke to the naturalist division of the American Association for the Advancement of Science yesterday.

"We have indisputable records of a man who goes back before the time of the ape," said Dr. Hill-Tout. "Probably both ape and man came from some former ancestor in the phylogenetic series farther back. It is true that we may say that man has ape-like characteristics, but it is equally true that the ape has man-like characteristics which does not mean much unless interpreted correctly. In fact, nearly all living organisms have points of common likeness."

"Forewarned is forearmed." Teach children what they should know in the way they should know it.
