The Flying Cloud which broke the coast to coast record in 1854

THEN to one port in clipper ships NOW to homes of 29 states

On April 20, 1854, Captain Cressy made history when his good ship, "THE FLYING CLOUD" completed the fastest voyage ever made around the Horn—making the coast to coast "dash" in eighty-nine and one-third days.

And this was four years after J. A. Folger & Company began supplying coffee to the new Pacific Empire. Then the green coffee came to one port (San Francisco) in clipper ships; was roasted at Folger's Pioneer Coffee Mill, and distributed by boat and on wagon trains within a small radius of San Francisco.

Today Folger's Coffee, Spices, Teas and Extracts are in demand in 29 states. The early settlers did not forget the folks back home. They liked Folger's Products, and their endorsement led to calls for Folger-marked packages from the East, North and South. So great, in fact, was the call, that a modern branch was established at Kansas City, Missouri, and Dallas, Texas, in addition to the repeated enlargement of the pioneer plant at San Francisco.

On the label of our first package of roasted coffee were printed the words, "Our success is dependent upon quality." This holds good today.

On this our Diamond Jubilee we make this promise; that Folger Quality and Folger Service shall never change from the high ideals set by our founders; that products bearing the Folger name shall always be of the highest quality—just as they have been for these seventy-five years. With a background of 75 years' experience and with a will to apply that experience for the benefit of our customers, we look forward to serving many generations to come.
