

CHURCH FIGHT TO BE AIRED IN COURT JULY 20

Hearing of the arguments of the case set forth with particularity the tenets of faith of the contending parties, in the suit of the Ashland Baptist church against the First Baptist Church of Ashland, will be heard before Circuit Judge C. M. Thomas next Monday, July 20, according to a motion filed Saturday. The defense is represented by Newbury and Newbury of the city and the plaintiffs by Briggs and Briggs of Ashland. It will be the first legal battle of the controversy.

The Ashland Baptist church is allied with the established Baptist church and the First Baptist church is held to be followers of "The Four Square Gospel," as expounded by Amos McPherson. The suit, which raked the Baptist church in Ashland and its reception in the "divine healing meetings" held in that city in 1922, by Dr. Price.

One of the arguments set forth by the "Four Square Gospel" wing is that each Baptist church is a separate unit, and not subject to the guidance of any central body. In the councils of the Oregon Baptist church, the established church, has been upheld, as adhering to a central body and the recognized governing head. The "Four Square Gospel," in its last motion, also questions the authority of the church heads to prescribe articles of faith.

At the same time a motion to strike out paragraphs containing the words and phrases "proselyting," "evangelical influence" and "hypocrisy" will be heard, the defendant church contesting them as "irrelevant, sham, and frivolous."

The suit, which also involves the church property and equipment, is attracting considerable attention throughout northwest religious circles.

OWEN OREGON TEAM LOSES TO HORN BROOK

Although the Owen-Oregon baseball team played a good game of ball yesterday with the Hornbrook nine, it was defeated by a score of 5 to 3 at Hornbrook. The double-O team was accompanied by nearly 100 fellow employees of this city, who formed a strong body of rooters.

Together with the five runs, Hornbrook made seven hits and six errors while the visiting team made but five errors and three hits, all of which scored.

Saunders, Jarvis, Foley and Childers were the batteries for the Owen-Oregon team while Jones and True were the batteries for Hornbrook.

A return game will be played in Medford next Sunday, the 19th, on the home grounds near the sawmill at the end of North Central.

On the return from Hornbrook the visiting aggregation and rooters enjoyed a picnic lunch at Summit Camp on the summit of the Siskiyou mountains.

WEDDING BELLS

Adiel Neff and Miss Helen Goss were married Saturday afternoon at the Baptist church, in the presence of a small party of special friends, Rev. W. H. Eaton officiating. Mr. and Mrs. Neff are well and popularly known in Medford and the hearty good wishes of their many friends follow them in their new adventure.

BOB DRIVES OUT JAPS.

not," said Mr. Ide. "The only interest the state chamber has in the matter is that the incident may give Oregon publicity in other states, where the situation is not known. And as Oregon businessmen have subscribed \$10,000 a year to a three year fund to bring settlers to this state, we are naturally concerned over such incidents as that at Toledo.

"On May 12, businessmen at Toledo passed resolutions protesting against the employment of Japanese labor in the spruce mill there. Subsequently Mr. C. D. Johnson of the plant, appealed to the state chairman, but the directors did not feel that the boycott take any action in a purely local issue. However I went down there and made a survey of labor conditions and later made a survey in other sections, the results of which I put in a report issued June 19. The reports say that no unfavorable conditions were created in any of the mills or communities by employment of Orientals in limited numbers; the only reason for the employment being that on certain kinds of work, white men would not remain on the job. Prices for this class of work are the same as those paid white men for similar work.

WANTS THAT CALLED OFF

vague as not to inform the defendant of the nature and cause of the accusation against him."

A second claim said "that the statute upon which the indictment is based is subject to the same infirmity because it is so indefinite as not to enable the defendant to know what is forbidden and therefore amounts to a delegation by the legislature of power to the courts and juries to determine what act shall be held criminal and punishable."

"There is no legislative warrant for the delegation of such power to the courts and juries of the state," it was asserted, and that "the act violates the whole spirit of both the constitution and the constitution of the United States and against the policy of the law."

Monkey Book Banned, But Tennessee Children Are Still Being Taught The Evolution Theory

By Clark Kinnaid, Central Press Staff Correspondent. DAVENPORT, Tenn., July 13.—Tennessee children are still being taught the truth about "evolution," in spite of the dust kicked up by the Scopes case. The state textbook commission has accepted as a substitute for the textbook authored by Mr. Scopes, one which presents the relationship between man and the rest of animate nature in a way that would be approved by the exponents of evolution theories. The new book, approved as in accordance with, or not in contradiction of, the story of admitting that between man and "some of the primates" there are many points of physical resemblance, says that the big apes "must be recognized as having evolved along special lines of their own and none of them are to be thought of as the source of the origin of the human species."

But as Science Says: Then comes the addition: "It is futile, therefore, to look for the primitive stock of the human species in any existing animal." So say all of the evolutionists.

In "Civic Biology," by George W. Hunter, professor in a church school, the textbook used by Scopes in instructing his high school class, there is this exposition of "evolution": "We now have learned that animal forms may be arranged so as to begin with very simple one-celled forms, and culminate in a group that contains man himself. This arrangement is called the evolutionary series. Evolution means change, and these groups are believed by scientists to represent stages in complexity of development of life on earth. Geology teaches that millions of years ago life upon the earth was very simple, and that gradually more and more complex forms of life appeared, as the rocks formed latest in time show the most highly developed forms of animal life. The great English scientist, Charles Darwin, from this and other evidence, explained the theory of evolution. This is the belief that simple forms of life on earth slowly and gradually gave rise to those more complex and that thus ultimately the most complex forms came into existence.

The Progress of Man. "Anatomically we find we must place man with the apelike mammals, because of the many points of structural likeness. Anatomically, there is a greater difference between the lowest type of monkey and the highest type of ape than there is between the highest type of ape and the lowest savage, yet there is an immense mental gap between monkey and man.

"Undoubtedly there once lived upon the earth races of men who were much lower in their mental organization than the present inhabitants. (The Neanderthal men, the Heidelberg men, the Pittdown men and the Cro-Magnons.) If we follow the early history of man upon the earth, we find that at first he must have been little better than one of the lower animals. He was a nomad, wandering from place to place, feeding upon whatever living things he could kill with his hands. "Gradually he must have learned to use weapons, and thus kill his prey, first using rough stone implements for this purpose. As man became more civilized, implements of bronze and iron were used. About this time the taming of animals began to take place. Man then began to cultivate the fields, and to have a fixed place of abode other than a cave. The beginnings of civilization were long ago, but even today the earth is not entirely civilized."

Incidentally, John T. Scopes' name doesn't appear in the roster of teachers approved for the local high school next year. He asked to be reinstated, but the school board postponed, but the school board passed over him. The board, however, upon appointment, he said, was not so-

ever, is waiting until after the trial before announcing definitely whether his services will be dispensed with.

Legion Meets Tonight. The regular meeting of Medford post, American Legion, will be held this evening at the armory. Reports from several committees and from the Primeville convention will be heard, and a large attendance is expected. Meeting nights have been changed to Sundays instead of Tuesdays, this being the first meeting to be held on Monday.

The American Legion auxiliary will also hold a meeting this evening of special interest to all their members.

WIFE CLAIMS SHE WAS HUSBY'S SLAVE ASKS FOR DIVORCE

"And this plaintiff was nothing more than a slave or servant of her said mother-in-law, and a servant of said husband," is one of the charges made by Hester E. Brown against Victor C. Brown in a divorce suit filed in the circuit court last week. The Browns were married at Grants Pass April 2, 1920, and lived with the defendant's parents near Kerby, Oregon.

The wife also alleges that "she worked in the field at manual labor while the defendant loafed"; that his promises to provide a separate home were never fulfilled, and that he inserted an advertisement in the Grants Pass paper announcing he would pay no more of her bills.

It is set forth in the complaint that the defendant has considerable personal property, and alimony, attorney's fees and a decree of divorce are asked.

FINLEY ON GAME BOARD

(Continued From Page One)

Upon appointment, Mr. Finley declared that all of his actions would be governed for the best interest of fish and game welfare and that a doesn't approved for the local high school next year. He asked to be reinstated, but the school board postponed, but the school board passed over him. The board, however, upon appointment, he said, was not so-

ELECTRIC COOKING—less watching

The roast, for instance—first a quick searing to seal in the savory juices, and then a slow cooking heat as in a fireless cooker. That's in the oven.

But over here, something is simmering gently in a saucepan. Another pan is bubbling vigorously at the lid. Tomorrow morning's prunes are stewing leisurely between whiles.

Dinner is being prepared,—and it must be watched, too. For each different dish requires a different method, a different heat. One fire will not do for all.

That's one reason why electric ranges, with their instantly regulated and easily controlled cooking temperatures, from a sizzling, searing heat in one place to a just-keep-it-alive glow in another, are so favored by good cooks. Electricity makes good cookery better, and easier.

And that, plus the surprising economy* of electrical cooking, is a reason why nearly one thousand eight hundred kitchens in the territory served by this company are now fuel-less and ash-less. Nearly one thousand eight hundred electric ranges have made them so.

Ask your nearest dealer to show you several models. Convenient payments, if you like.

*The actual average cost of current for electric cooking and lighting, together, in homes in this neighborhood, is \$5.62 a month.

THE CALIFORNIA OREGON POWER COMPANY

Notice To Water Users

A recent ordinance passed by the City Water Commission states
That All Delinquent Water Shall Be Shut Off
immediately after it becomes due.

I am instructed to enforce this ordinance, and commencing July 15, 1925, there will be no "Last Notice" cards issued or delivered to delinquent water users.

Please govern yourselves accordingly.
CITY WATER SUPT.

DRINK Maid O'Sko IT'S DELICIOUS

Never before could you buy so much fruit in a small bottle. SKO is made from Real Oranges and there are no synthetic flavors added.

Close your eyes and you can easily imagine you are "drinking" the fruit itself.

All our products are guaranteed to be pure and wholesome, which is your protection.

2 blocks from Lithia Springs Hotel. 2 big tanks clean sulphur water. Open 10 A. M. to 10 P. M. Special arrangements for parties or clubs.

A Happy Ending

To that "summer breakfast" problem QUICK QUAKER cooks in 3 to 5 minutes

Enjoys hot kitchens on hot mornings
OATS, the finest food that grows, should be your summer breakfast. They nourish without overheating. They supply the energy elements that you need. They help you meet the drain of hot days with a smile.
Get Quick Quaker. It cooks in 3 to 5 minutes. And that solves another problem... no hot kitchens, no frying and stewing on hot mornings.
The flavor is that rich flavor of Quaker Oats. All the richness is there. Quick Quaker cooks faster. That's the only difference.
