GRAIN CROP IN EDEN VALLEY IS RECORD BREAKER

By MARY O. CAREY.
EDE NPRECINCT, Aug. 13.—Since the threshing has commenced in the valley, it has been found that there is much more grain in the valley than last year. The corn crop will average two bushels to where there was one last season. The corn is filling much better too than in former seasons. This is due to the plentiful supply of water from the different irrigation ditches made available to the farmers.

Mr. and Mrs. M. M. Carl and daughter Iva, former North Talent and Ashland residents, but now of 109 S. Van Ness ave., Santa Ana, California, in a tour to the Atlantic coast, left their home at Santa Ana June 2, went through Arizona, visiting the Grand Canyon and the Petrified Forest. On through New Mexico into Kansas, visiting relatives. Visited with friends in Chicago. Points of scenic and historic interest visited were: Niagara Falls, New York City, Philadelphia, Washington D. C., Mount Vernon, Vt., Gettysburg, Pa., and the Yellowstone Park, returning by way of the Columbia Highway.

It is deplorable to know that any one has to apply to the authorities, these days for protection of his melon fields. This is the case, nevertheless, and the same has been granted to the growers in this vicinity. Lights have been placed in the Morrison garden, just south of Phoenix, so that trespassers, may be plainly seen.
