#### MURDOCK

DESIGNED after the eastern cottage type, this house is very homelike and convenient. The living room is ample size with fireplace and opens into the dining alcove, where triple windows with a ledge provide for ferns and cheery flowering plants. The kitchen is unusually well lighted and ventilated from three sides. Two extra rooms can be finished off upstairs. Altogether satisfactory in every respect. Design submitted by the National Builders' Bureau, Spokane, Washington.

### WHAT IS HOME?

Eight hundred replies came to the question "What Is Home?" The most popular answer was: "Home—The place where we grumble the most and are treated the best."

#### Make Your Home More Than a Place in Which to Grumble

An architecturally correct home means economy, convenience and satisfaction—nothing to grumble about. Yet it costs no more than the haphazard kind.

Hundreds of modern home designs are on display at this office. They are architecturally correct, economical to construct and conveniently arranged.
