NEAR CITY LIMITS GOLD HILL HAS BIG VALUES

D. HILL, Sept. 10.—(Special.) The opening of the 800-foot tunnel on the Kelmar-Vanpet mine...

Original plans of the project for a tunnel of 830 feet to cross an iron and nickel vein at 638 ft in the tunnel; a copper vein 60 yards; and a telluride gold vein 830 feet on the tunnel.

The tunnel was fortunately started on the mountain on an east-west probably an extension of a vein...

It is apparent the last 100 feet of tunnel has been crosscutting an old dike of altered diorite made of blocky mass cut with small black telluride, quartz, quartzite...

Attempt has been made to develop prospect these bodies of ore in the limits of the tunnel, except the last mentioned vein which is open eight feet from the tunnel in each wing.

This vein showing \$10 per ton on the tunnel contact and in eight feet fully demonstrates that the east-west vein with the tunnel is not salting crosscut veins, but on the contrary is fed by these veins.

The site of the Kelmar-Vanpet is a part of the old Sheslay uplift, and like the old Sheslay Island uplift in the eastern of Oregon, were the first land forced up out of the ocean on continent, and these granite...

The tunnel will be run the full 800 before an attempt will be made to develop the ore uncovered, and at same time equipment will be installed to mine to mill at cost 100 tons per day, and apparently the oil ion process will be utilized in ing the ores.

Look for the Arab—it's quite important

TO BE certain of getting the favorite coffee of the coffee-loving West, ask for Hills Bros. by name and look for the Arab on the can. Your taste will automatically reject ambitious substitutes after that first can of genuine Hills Bros.

What a flavor, really! As you moisten your lips with that first savory sip, you know for sure that in all the world there is no coffee to compare with Hills Bros. You know, too, why it has earned the title of The Recognized Standard of coffee excellence. Hills Bros. Coffee is economical to use.

HILLS BROS COFFEE

In the original Vacuum Pack which keeps the coffee fresh.

Attention, W. O. W. Medford Camp, No. 90, Woodmen World, will hold a big meeting Friday evening, Sept. 11th. All members are urged to attend. There will be entertainment and refreshments.

Firestone

Tire Prices Are LOW—CRUDE RUBBER HIGHEST IN YEARS

Buy Now and Save Money!

The unprecedented demand for Firestone quality and mileage has more than doubled the sales of Gum-Dipped Cords to car owners so far this year, enabling us—because of this tremendous volume—to keep prices low.

Experienced car owners insist on tires that deliver the greatest mileage at the lowest cost per mile, because such tires last longer—make the restricted rubber supply go further—reduce crude rubber costs—and help maintain the present low tire prices.

Gum-Dipping, the

Firestone extra process, is also one of the biggest and most important economy factors in tire performance. This method of treating cord fabric, developed by Firestone tire chemists and engineers, insulates every fiber of every cord with rubber, and gives the sidewalls the extra strength to withstand the extra flexing strain—insuring maximum safety, comfort and economy.

Buy now—make sure of economical transportation by obtaining these outstanding Firestone superiorities at present low prices.
