The school board did not begin the construction of the board fence around the high school athletic field this morning, as had been planned, for the reason that the city planning commission had informed the board that if the matter was delayed that body would lay before the board next Thursday an attractive proposition, which if accepted, would end the controversy between the adjacent property owners to the field, and the board. Therefore inasmuch as no football game is scheduled for next Saturday the board decided to wait until Thursday and look into the commission's plan.
