Snow, according to Lee P. Brown of the Crater National forest, now practically covers the east slopes of the Cascade range, while the west slopes have but a covering in comparison. At an altitude of 5500 feet on the east slopes the snow is said to be 18 inches in depth and to be very hard packed, having more water content than in recent years. The packed condition is attributed to rains falling on the snow during mild periods.

Never say "oats"

—say Quick Quaker

Get that toasty Scotch flavor; that famous Quaker flavor

ABOVE all things, it's flavor you want in oats. There is a world of difference. Originally a Scotch dish, it must have a Scotch flavor to be right.

Once you taste Quaker Oats you're spoiled for ordinary brands of oats.

Has that toasty Scotch tang... the famous Quaker flavor... no other brand has.

First spoonful tells the difference. It's due to exclusive Quaker milling of finest, plumpest oats. A flavor it took some 50 years to perfect.

That is why it is so important to look for a picture of a Quaker on the oats you buy.

Quick Quaker cooks in 3 to 5 minutes. That's faster than toast!

Due to Quaker milling methods, it supplies, too, the "roughage" you need to make laxatives seldom necessary.
