An Established Institution

The Community Hospital's Future

For three years the Community Hospital has played an active part in Southern Oregon and its success during this time has been noteworthy. Over 600 patients have been cured for and, from the many surgical cases which have been handled, only four deaths have occurred, they being considered practically hopeless cases before entering the hospital. This record compares favorably with any large city institution.

The Community Hospital's success in the department of Obstetrics has been gratifying. In other words, this hospital is not a new institution. Its place in the community has been won on a basis of real merit!

The future of the Community Hospital is assured! It is owing to the demand for additional space that we are launching a sale of \$20,000 worth of preferred stock, the proceeds of which will be used in the construction of a much-needed addition.

But—the Community Hospital does not urge your investment from purely monetary reasons. The very nature of a hospital's service makes big profits impossible. People of all classes have given freely to institutions of this kind from the humanitarian standpoint. It is the same spirit that is making the invaluable work of the Red Cross, Salvation Army and other worthy organizations possible.
