ENDS AND ODDS

INSTEAD of staging another good-will excursion to California, our neighbors to the South should put on a good-will excursion to Southern Oregon. It would be very educational for the visitors.

Public interest in Medford is centered largely now on Salem, where the local basket tossers will make a bid for the state title. Medford won the state championship a few years ago, and has a change to repeat.

Things are breaking well for Mr. Hoover. This oil scandal mess will convince the higher-ups, who will actually control the Republican convention, that if they are to win, they must take no chances and put the strongest candidate available in the field.

The approaching Presidential campaign, however, is going to be very different from the two preceding, which were about as interesting to the people at large as the annual meeting of the U. S. Steel corporation.

It would be interesting to get Mr. Sinclair's "views on the state of the country." Here's a chance for some high-powered newspaper man to make himself famous, with an exclusive interview.

Mr. Sinclair gave his friend, Fall, a hundred thousand dollars in Liberty bonds for oil rights in Teapot Dome. It looked like a good proposition from a business standpoint.

Then one of the Roosevelt boys spilled a few beans, certain senators got busy, and Mr. Sinclair's oil lands were returned to Uncle Sam. Worst of all Will Hays returned the commission, or claims he did, although Sinclair didn't receive it.

What a life!

QUILL POINTS

Monroe's idea was to preserve Latin America, but not as a hunting preserve.

In the hereafter the dumb shall speak, so that settle the argument about the future of luncheon clubs.

Government by majority divides us into classes—the herd and the unheard.

Man is an animal who lets his infant progeny alone and then feels mistreated because it doesn't like him as well as its mother.

As to the theory that age brings respectability, the Christian civilization is 1928 years old.

There's always something. If Lindy keeps on flying, he may ten people who eat little enough.

Prohibition will be a vital issue, however, if it becomes necessary to draw attention from something else.

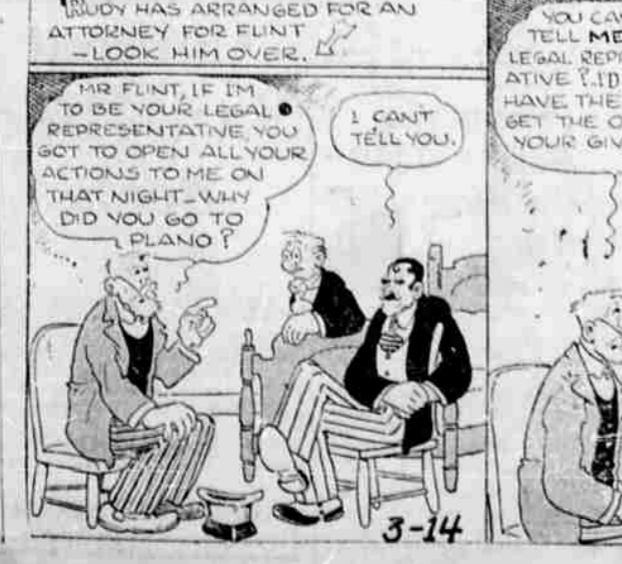

Voliva's theory that the world is flat gets some support from the condition of certain Presidential booms.

Poise is the quality that enables you to buy a new pair of shoes without seeming to be aware of the hole in your sock.

There's always something. If Lindy keeps on flying, he may get hurt; if he quits, the workmen in medal factories get laid off.

Correct this sentence: "My first fifty manuscripts have been returned," said she, "but I blame my incompetence and not the editors' dullness."

SORRY, GRANDMA, BUT COLIC IS NO MORE

Before the Sunday opening bell I desire to say that I have been training hard for 15 years for this bout, and I am in dead earnest about it.

It is comparatively safe for one of my elusive type to assert boldly—that the way I make all my assertions these days—that there is no such thing as a mastodon, a dodo bird, a fossil 5 cent coin or a sure cure for what you have.

Answer—I should say not. In some cities all milk, except certified milk, must be pasteurized before it is sold. Pasteurization means simply heating the milk up to 140-145 degrees F. for 20 to 30 minutes.

Next 't' battleships their haint nothin' gits out o' date as quick as a bedspread. Politics makes strange bedfellows, but what politicians I know would walk around all night before they'd double up with prohibition.

He would give me good wages, for a five-day week, letting them have two full days in which to spend and enjoy what they earn.

Some well meaning men will call that socialism, or worse. They would view with horror the abolition of a great working class, producing just enough for the rich with unemployment as soon as the prosperous got all they needed.

Our industrial genius has accomplished that; high wages, low prices, high quality, go together.

There are not enough rich people to use what workers can produce. But make all producers full consumers, give them at least sixteen hours free out of 24 and two full days in every week, and there will be no overproduction problem.
