EFFICIENCY

EFFICIENCY

An expert efficiency man went through our office some years ago and when he got through I discovered that we had lost about \$5000 a year for several years. I could not understand it. In the first place we never had \$5000 to lose, we had paid all debts and paid small salaries and had a little place we never had \$5000 to lose, we had paid all debts and yet we had lost money. This process continued for ten years and at the end of that time we had a nice equipment paid for and no debts. Yet according to the expert we were losing money every year. Right there I lost an efficiency expert. One of these figure sharks could make the light plant show a loss and bring tears to the eyes of the taxpayer and another could show that the plant is making money. I think the facts in the case are that I have been broke all my lire and did not know it.

(Independence, Kan., Times.)

The Order of DeMolay of the state of Washington has just made available \$260 for the planting of additional trees in the DeMolay forest on the Wind river sale area in Columbia National forest. The amount is sufficient to make possible the planting of 40 acres. The order raises funds for planting the trees by assessing each chapter 10 cents a momber a year, and the planting is done by the United States forest service.

Classified advertising gets results.

CRUELTY TO HUMANS

WE TRUST that when the survivors of this bunion-blister marathon stagger into New York,-assuming there ARE any survivors-Mr. Hard-Cash Pyle will devote his promotion energies to some other branch of sport.

The human body was never designed for railroad or motor car competition. A thirty-mile run is bad enough. But a 3000. mile run is cruel, inhuman and grotesque.

This cross-country derby is not good sport, good drama or good sense. The winner will demonstrate nothing, except that he was harder to kill than a score of his competitors.

Already the minor casualties of this ghastly performance have exceeded those of the battlesof the Marne. Physical calture experts are united in the opinion that not one of the contestants, remaining in the race after the first 500 miles, will ever completely recover from its deleterious effects.

Replace physical benefit with serious physical injury, in any sport, and that sport not only falls of its own weight, but becomes a genuine social menace. The only person who can possibly derive any benefit from this endurance contest is Mr. Pyle and his pocket book, and there seems to be some doubts regard-

If organizations against cruelty to humans were as active as organizations against cruelty to animals, this B. V. D. death-trek would have been called off long ago.

But, unfortunately, there is no law against a man rouning himself to death, if he wishes. An aroused public opinion, however, should be effective against any repetition of a crosscountry marathon, such as this, promoted for the sake of "Hard -Cash" or anything else.

THE McNARY-HAUGEN BILL AND LOCAL FRUIT

S PEAKING of the McNary-Haugen bill, an amendment now tacked to it, should be of interest to the fruit growers of this district

This amendment would exempt from the provisions of the Federal food and drug act act, "fresh fruit in the condition in which it is severed from the tree."

Here is what Secretary Jardine, of the Department of Agriculture, wrote on May 4 regarding this amendment:

The amendment to the go-called McNary-Baugen bill intro-duced by Senator Waterman would exempt all fresh fruit from the provisions of the Federal food and drive set. If the second ment prevails, there will no longer be a Federal control of the spray residue question. This will not remove in any degree wan-ever the control of States, cities and foreign governments. These agencies can be expected to follow the internationally recognized tolerance of one one-hundredth grain per pound as a guide in their operations. They are not in a position, nor can they be expected, to attempt sympathetic educational work among the growers and to provide technical assistance in the application of efficient cleanto provide technical assistance in the application of efficient clean ing methods. Instead of the situation being under control at the source, it will be controlled at consuming markets, and there is is every reason to expect chaotic results. Nothing else could logically follow the independent operations of the many agencies which will be concerned.

Furthermore, the abrogation by this legislative action of the promise view to the Belliah reconstantials.

which will be concerned. Purthermore, the abrogation by this legislative action of the Purthermore, the abrogation by this legislative action of the promise silven to the British government by the decartment in 1925 to exert every possible effort to cure the trouble would undoubtedly be construed as sufficient ground by Great Broam and only but by countries in continental Europe to place an embargo upon American fruit, thus turning back a large part of the exportable surplus upon domestic markets. All these developments are sure to be attended by widespread publicity.

We happen to know that press representatives throughout the country have a fairly complete knowledge of the situation and have refrained from publishing this information only because the department has been able to convince them that it would be adverse to the best interests of the country.

There is also to be taken into account the position which will probably be assumed by growers in the Middle West and in the East, where, due to climatic conditions, there is not a heavy infestation of the coddling moth, and such frequent and late aprayings as are prevalent in the West are unnecessary, thus causing little difficulty in meeting the tolerance of one one-hundredth grain per pound. Unquestionably, those growers will carry out the clars which they have hitherto advanced and from which they have been dissuaded by the department to advertise their fruit in consuming centers as free from excessive arsenical residues.

All of these various factors as the department sees them and is able to judge them from its long experience with this problem will unquestionably react against western fruit to a point where the magnificent industry which has been built up in that section of our country will be utterly destroyed. The department throughout its entire dealing with this question has been sympathetic with the growers and has sought by constructive means to all them in meeting this serious problem. I feel quite sure that the elimination of the department's re

THE KIND WORLD

Everywhere I go I find there are pleasant things to burn; someone's always being kind, do ing me a triendly turn. When I have the whooping cough, or a touch of barber's itch, to my shacks there comes a toff, bring ing consolation rich. I can look along the road from my window. and I see people bound for my abode, bringing poultices to me. abode, bringing poultices to me.
Now and the, a tire goes flat
on a dutsy thoroughafare, and I
sit down on my hat, sighing in
my black despair. For it always
makes me sore when I have to
change a fire; it's a nuisance
and a bore, and I murmur and
persyire. Thoughtless people
joyride by and they smile at my
distress; in my agony, I cry,
"Life's a weary wildenress." But
if I sit there a while, for an hour if I sit there a while, for an hour or half a day, someone with a pleasant smile will be sure to come my way. And he'll say, "You're old and fat, lacking pen and strength and fire; just sit there upon your hat, and I'll sladly change you'r tire." When I'm seated in the shade, gasping like a dying fish, someone brings me lemonade in a handsome cut glass dish. Then I hit an orange peeh, as I take my daily walk, and proceed to slide and reel, and to fall for half a block, someone grasps me where I skid, leans me up against a wall, cathers up my bood and lid, halidom and parasol. When I'm piched by some cheap lout for if I sit there a while, for an hour For the last three months I have been decloring for autointoxication

piched by some cheap lout for jay driving in the vale, someone comes to ball me out ere I've been an hour in jail. Kindly folk around me stand, always ready with relief; someone has Please tell me how long it should take for the system to be cleared of the poisons in such a case. Answer.-From two to five minnest. However, the poisons are exclusively confined to the mind. In other words, the autointoxica-tion obsession is just a mental in-toxication. Have you been read-ing some quack literature? a helping hand every time I wade in grief. Someone handshes remorse, someone eases my despair; so this old world I endorse, it is right side up with

> us who have paid an inflated price attendants as Mr. and Mrs. Mac. and are taxed accordingly.

To the taxpayers who have not read our petition, we state again that there is an overhead bridge on the present highway and not over Main or Six it streets. We have lived on this highway seven have heavy the over Main or Six.h streets. We have lived on this highway seven years and know how heavy the traffic is, during the summer, especially, and the congestion will be so great that will be only a question of time when the highway will be continued from the Jacksonville be continued from the Jacksonville be continued from the Jacksonville off the full import of the story, lighway straight to Ashland, leaving Medford out entirely and the wilsearces sitting on a sand bank.

Enough said, but we who do live on the highway patronize the dealsers and bankers, wholesalers and merchants, real estate and insurance men, and we ask every tax-payer who has signed the opposing
