FRENCH DRESSING

With the vogue of mixing one's French Dressing at the table women have become even more fastidious than usual about the salad oil they use.

Do you wonder that Wesson Oil has become increasingly the favorite? Pour some out in a glass sometime—hold it up to the light—and you'll see why.

The color of it alone is reason enough—pale straw, crystal clear. It looks exactly what it is—a pure, wholesome salad oil, made from the finest oil that can be obtained and refined until only the true nourishing food content is left.

And there never was a salad oil with a greater delicacy of flavor or one more deliciously good to eat all by itself!

Truly, Wesson Oil makes quite the most captivating French Dressing that can be imagined. . . . And, incidentally, modern housewives are rapidly discovering how convenient and good it is for frying and for cake-making.
