

MEDFORD, OREGON, FRIDAY, JUNE 22, 1928.

No. 92.

## BYBEE BRIDGE NOW OPEN FOR AUTO TRAFFIC

TABLE ROCK, June 21.—Don-ald Wilson arrived home Friday from Eugene where he finished a year's course at the university and will spend the summer vacation with home folks here.

The Chase and Tuttle families were visitors at Diamond Lake one day last week.

Johnny Morris is home from Opl. California where he has been attending high school for the past several months.

Several families from here drove to the strawberry fields near Grants Pass this week to take advantage of the low price of berries.

Ralph Wilson and sons have just finished putting up a hay stacking outfit which is one of the largest in the district.

The Sams Valley Grange placed an order for binder twine this week for the members having grain to harvest.

The county gravel crusher and loading machinery has been installed on the Henry Gregory place and are getting out gravel for the Sams Valley market road.

The Newman family who have been living in the house on the Cameron place left last week for their former home in Washington.

Otis Davis and Hershel Harper spent a few days last week prospecting in the Evans Creek district where they think they have located some valuable ore.

Dunlap and Hamilton have just completed the sale of a car load of spring lambs.

Mr. and Mrs. Ralph Wilson received a letter last week from the rector of their home place in Kansas telling of a recent hail and wind storm which demolished several of the ranch buildings and beat down a field of wheat.

The California Oregon Power company are putting on new cross arms on their pole line through this section which will carry four lines, two for power distribution and two for the company telephone line, which is being replaced with copper wires.

The rain of Sunday was highly beneficial to corn and potato crops, gardens, alfalfa, and all kinds of fruits in this section.

Alvin Hamilton is working with the forest service for at Lodge Pole on the south fork of Rogue river.

Mrs. E. O. Wilson entertained the Red Cross sewing club last Wednesday afternoon.

J. L. Nealon recently purchased a new Whippet coach and is planning to try it out on the roads to the coast.

Mr. and Mrs. Howard and daughter of Grants Pass were Sunday visitors at the C. W. Gage home here.

Five voters turned out to the annual school meeting Monday night when Elmer Hall was re-elected director and Mary B. Myers, clerk. The clerk's report showed the district to be in excellent shape as to finances, school equipment and general ability to educate its children.

The harvesting of the first crop of alfalfa is about completed here and it will be a few weeks before the second crop is ready to cut.

Miss Alice Seabrook arrived Saturday from Los Angeles where she has just completed a two-year course in the Bible Institute at that place.

The bridge crew working on the Bybee bridge have finished the re-ctecking job and are now putting on new railings.

The bridge has been open for traffic for several days now and workmen report many cars passing daily.

During the time the bridge was closed the rural carrier brought the mail out, distributed it and got back across the bridge before eight o'clock in the morning.

The funeral last Monday of John H. Bigham, worthy citizen of the Sams Valley district was largely attended by people from this district where he was well known and highly respected by a large circle of friends who at this time deeply sympathize with the family in their hour of trouble.

Fort Klamath district will vote on \$5,000 school gymnasium.

## PICK A RECORD CROP CHERRIES GOLD H RANCH

GOLD HILL, June 21.—One of the largest cherry crops ever known to his orchard is now being picked under the supervision of W. W. Hittle. He has long been famed in the Rogue River valley for his famous Bing cherries. This year better cherries and a heavier crop surpass all previous marks. Some of the cherries are from three to six inches in circumference. These are about as large cherries as any in Oregon. A crew of workers is being employed and several crates of the delicious fruit are being picked daily.

The workers of the state highway commission have been busy the past week filling the chucks-holes at the fill of the new bridge. Neither approach was paved because the gravel and dirt was ex-cised as soon as all danger of settling is past, both approaches will probably be paved.

Mr. and Mrs. George Lyman were visited last week by their daughter Daisy, who lives at Westfork, Ore. She stayed for a brief visit and has now returned home.

The machinery which arrived at Gold Hill last week for the dredge on Foothills creek is now being installed. Some of the workings have already been placed upon the boat, but the main part of the machinery is yet to be installed. A visit to the dredge site will convince anyone that a great amount of work is expected to be done by the Ludlum Dredging company, whose operations on Foothills creek are in charge of D. H. Perry.

Mrs. C. W. Martin and children, together with Mr. and Mrs. Jack Heyland of Medford, returned from a trip to Crescent City Monday. They reported having a very enjoyable trip.

Several people from Gold Hill went to Grants Pass Thursday morning to see Flying Cloud arrive at about 10:30 as the winner of the Redwood marathon.

## FERRY RESIDENCE NEAR COMPLETION

GOLD HILL, June 21.—The work of installing the machinery and equipment for actual work of dredging on Foothills creek is now in progress. The carload of machinery which was removed from Gold Hill to the dredge last week is now gradually being put in place. Piece by piece it will build the giant ship until she is ready to scrape the bedrock of the Foothills creek channel, long known because of its richness in southern Oregon's great metal—gold.

The click of machinery, the building of the boat and the clearing of the land all revive the hopes of bygone mining days upon this creek. To the person who knows this gold producing section it will revive the scene of the dredge built and put into operation by "Champion." Although this dredge did not do much toward making itself a paying proposition, it proved the gold was there. From the site directly where the boat is now being built to a bridge which crosses the creek, a distance of 100 yards at the most and 50 yards wide, a man by the name of Latimer mined out \$30,000 in gold.

Further up the creek a large amount of ore was taken from the old Black Channel mine. It is now a thing of the past, but nevertheless, it cannot be lost from the minds of the earliest settlers whose prize was gold.

The ground which the new dredge will cover has not previously been mined. It has been "skim-ming" over, but at the depth it will dig no gold has ever been taken. The work of the Ludlum Dredging operations will last about six or seven years. A fair sized crew of men is now being employed.

The new residence of D. H. Perry, manager of the company's operations upon Foothills creek, is rapidly nearing completion. It is a large Spanish type home and is being built about half a mile from the mouth of the creek. At present Mr. Perry and family are living in the Champion home, but will in the near future occupy their new residence.

## Carload of Farm Tractors Arrive

The E. R. White Machinery company, which has recently established display rooms at 23 North Fir street in this city, has received a carload of the latest type McCormick-Deering farm and orchard tractors of the 19-20 type. These tractors are now on display and orchardists and farmers have been invited to see them.

The E. R. White Machinery company handles farm and orchard equipment of all kinds and represents the Bronner's line of deep tillage orchard tools.

ETHERLEN.—Tyler cutoff road to Crater and Diamond lakes to be finished.
