Mayor Walker, of New York, visiting Hollywood, warns moving picture men not to use publicity to boom the Republican candidate for President.

Mayor Walker introduced a bill permitting pictures on Sunday and expects gratitude.

The most effective thing that moving pictures can do, that couldn't be criticised, is to show the actual FACES of candidates. Let the people SEE a man and they know what to think of him.

The best political movie so far is a movie-talking picture by William Fox, showing Governor Smith at his daughter's wedding with his family of children about him. In that picture the governor speaks briefly, and his little grandchild up to his knee, after much urging, says "Hello." That's more effective than a long speech.

The French government builds a gigantic magnet several thousand times as powerful as any built thus far.

It will be used in scientific experiments in connection with the molecular and atomic construction of matter, etc. The magnet will be of great use in industry.

Here the steel companies use magnets picking up tons of steel rails and loading them on cars, dropping them down, lifting them up, as a boy lifts tacks with his toy magnet.

Man is an intelligent animal. Living on a gigantic power wheel and magnet, the earth. He constructs his own little power plant, builds his own electric and magnetic power.

In the north recently, man's electric work felt an electric storm, and an amazing aurora borealis, stretching all across the northern part of the continent.

If men could borrow and use the inexhaustible electric power of the earth, they need not turn coal or water falls into electric current.

New York's committee calls night clubs vice dens. Miss Texas Guinan, who owns THE night club, denies it. "Every night the mothers call for the kids in my place," says she. The kids are young ladies that entertain the young gentlemen. She adds, "I have thrown out some of the best people in New York just because they forgot themselves. I stop the music, and out they go."

Future writers of history will try to imagine those "best people in New York" thrown out for forgetting themselves, and wonder what the WORST people in New York must have been.

The great new German Zeppelin, soon to make its trip around the world, was approximately baptized with liquid oxygen, the elements most important to fliers. The music, well chosen, was Beethoven's "Choral," "The Heavens Proclaim the Glory of God."

The heavens also proclaim the lesser story of man, now that the sky is filled with flying machines. Man, made in God's image, really begins to amount to something.

In the Nankow pass, 20,000 Chinese soldiers died. To comfort them, missionaries traveled to the spot where they fell and 2000 soldiers stood at attention with a very nice letter, and read to the dead men. China doesn't believe in our heaven, but does believe that the dead, in some mysterious way, know what is going on.

NOBILE WALKING PARTY RESCUED

MALMGREN DEAD; TWO PALS LIVE

Mariano and Zappi Taken on Russian Ice Breaker With Body of Dead Leader—Air Pilot Who Found Them Is Now Stranded.

Copyright, 1928, by the Associated Press. ADVANCED RUSSIAN ICE BREAKER; KRASSIN, July 12.—(AP)—GIVEN up for dead for the past six weeks, two of the three members of the Italia's walking party were rescued today by the ice breaker Krassin.

The third member, Dr. Finn Malmgren, noted Swedish meteorologist and scientist, was found dead, the victim of the long struggle since May 20 against the terrors of the Arctic.

The rescued members of the party were Captain Alberto Mariano, pilot of the ill-fated Italia, and Captain Filippo Zappi, the navigator.

Captains Mariano and Zappi are now aboard the Krassin. They were in an exhausted, half-frozen and starved state when they were rescued from what had seemed certain death for many weeks.

Dr. Malmgren died a month ago, but his two companions, faithful to their dead comrade, had kept his body, and this was taken aboard the Krassin today.

The Russian ice breaker, as soon as it had rescued the two Italians, again turned its prow toward the coast and began its weary round of hugging the ice floes in an effort to reach the group of men under Lieutenant Viegler, still marooned near Eryn Island, off North East land.

Although the two Italians had lost virtually nothing to eat for 12 days, living on the meagerest of fare, they were in good spirits and full of courage when rescued and were able to express their warmest thanks to the crew of the Krassin.

The position of the party when the Krassin rescued the men was 84.25 north latitude and 26.7 east longitude, a point some miles north of Prince Oscar land and about 20 miles from Eryn Island.

Captains Mariano and Zappi said that they had given up hope in what seemed to them their last agonizing moments in the bound world that had surrounded them for so many days, when suddenly the Soviet airplane with Pilot Chukhovsky appeared out of the low-hanging mist.

POLAR SHIPS IN ITALIA RESCUE

These two ships, the Braganza and Citta Di Milano, General Nobile's base vessels, have played an important part in rescue attempts to reach the crew of the ill-fated dirigible Italia and Capt. Amundsen and his aides who went to her rescue. It was from this spot that Lieut. Lundborg took off and rescued the Italian commander who was injured when the dirigible crashed.

KLAMATH FALLS GLENDALE FIRE IS SAVED BY A LOSS GROWING: SHIFT IN WIND TOWN CUT OFF

\$250,000 Fire Checked by Miracle of Nature When Doom of City Appears Certain—Ewauna Box Co. Chief Sufferer—Flames Are Seen at Crater Lake.

KLAMATH FALLS, Ore., July 12.—(AP)—A fire of undetermined origin destroyed ten million feet of timber in the lumber yard of the Ewauna Box company—Klamath's largest mill—and for a time seriously threatened the entire Klamath industrial district of Klamath Falls last night.

Loss from the huge blaze, which covered an area of approximately four acres, was estimated by C. H. Dargatz, vice president of the plant, at \$250,000. At one time, when a favorable north wind shifted to a disastrous east wind, it appeared that the \$250,000 sawmill was doomed.

Again, within an hour of the time the blaze broke out, it seemed that most of the industrial district would go. Had such been the case, nothing could have saved the entire business district of Klamath Falls.

Fire broke out in the center of yard No. 1 of the Ewauna Box company plant. Low wind caused a hot northwest wind caused the flames to spread rapidly. Fifteen minutes after the alarm was sounded, flames were shooting several hundred feet into the air as the fire spread rapidly from one lumber pile to another.

As the fight against odds continued, scores of volunteer fire fighters joined the fire department and lumber employees. Buckets, hoses, ladders, and other equipment were used to fight the flames.

When the news was first received at Grants Pass a group of American Legion men hastily organized and drove at high speed to Glendale to aid in fighting the fire. They arrived too late to do any great amount of active work in fire fighting, but established a water line that did good duty all night.

This morning the scene of the fire was a great mass of smoldering ashes.

3RD PARTY CAN'T GET CANDIDATE

Senator Norris Refuses to Accept the Farmer-Labor Nomination—W. J. Veeren, Vice Presidential Candidate, Also Declines.

WASHINGTON, July 12.—(AP)—Senator Norris of Nebraska, in a formal statement today, declared that for reasons several times publicly expressed he would not accept the nomination for president tendered him last night by the farmer-labor party at Chicago.

The senator said his declaration did not mean that he was not in full sympathy with those who are opposed to the presidential nominees of the major political parties, but that the "antagonized and illogical system of selecting a President made it practically impossible for the people to elect any one who has not been nominated by one of the dominant political parties."

CHICAGO, July 12.—(AP)—United States Senator George W. Norris of Nebraska, was nominated for president by the farmer-labor convention last night. He was chosen on the third ballot, receiving 16 ballots to 14 for Norman Thomas, the socialist nominee for president.

For vice president the farmer-laborites named Will Veeren of Monticello, Ga., a cotton mill owner, "Bugs" the "farmer-labor" party was going ahead with the selection of standard-bearer, the prohibition party, also in session here, centered discussion on platform proposals.

Possibility of a merger of the prohibition party and the farmer-labor group ended last night when both voted the proposal.

ATLANTA, Ga., July 12.—(AP)—His nomination as a candidate for vice president on the farmer-labor ticket at the Chicago convention is "absurd so far as I am concerned," Will J. Veeren of Monticello, Ga., said here today.

Of course, under no consideration would I accept or even consider the nomination, Mr. Veeren declared.

CHICAGO, July 12.—(AP)—Governor Alfred E. Smith, democratic candidate for president and an advocate of modification of the Volstead act, today was nominated as a candidate for the presidency by a delegate to the convention of the prohibition party.

Dr. James M. Templeton of Cary, N. C., played Smith's name before the convention. He explained to news writers that he did it to "offset the republican influence in the convention."

A few squares away, the farmer-labor party executive committee pondered a dilemma created by Senator Norris' refusal to head a third party. The farmer-labor convention nominated the Nebraska republican.

IN MEMORY OF ARCTIC PIONEER

This memorial statue in honor of Lieutenant George W. DeLong, U. S. N., and the officers and men of his command who gave up their lives in 1881 in search of further knowledge of the polar regions, has been unveiled at New York City by Mrs. Emma DeLong, widow of the explorer. Left to right beside the statue are Captain George Wilkins, Lieutenant Carl Ben Eielson, and Lieutenant DeLong Mills, grandson of the explorer.

BIG FIGHT FOR RADIO IS STARTED

Smith, Hoover Forces Both Working for Hookup in Campaign—Fede. Trade Commission Requested to Continue Anti-Trust Drive Against Control of Radio.

WASHINGTON, July 12.—(AP)—A brief declaring that the Radio Corporation of America, General Electric and a half dozen other concerns "have divided among themselves the entire field of wireless" was filed today by Edward L. Smith, counsel for the federal trade commission with the commission, asking it to deny a motion brought by the concerns to dismiss a charge of monopoly.

Two more groups of radio stations ordered from the nation's broadcast system August 1, because they were held not in the "public interest, convenience or necessity," were represented today before the federal radio commission meeting in two sections to hear the applications for relisting.

Plans to consolidate or share time with other stations were made by some of the broadcasters. Others challenged the commission's right to rule them from the air. Representative Berger, Wisconsin, the only socialist member of the house, predicted abolition of the commission because of its reactionary policy of taking off the air stations from which anti-trust, political and economic views are broadcast.

The statement was made in a letter to the commission supporting the application of station WEDV, the memorial to Eugene Debs, late socialist leader, and WJBA at Madison, Wis., conducted by the Capital Times. "I most solemnly protest and warn the commission against this unjust, high-handed and tyrannical procedure," Mr. Berger said. "The action of the commission means that the radio trust will have complete control not only of all radio transmitting machinery, but, through the Radio Corporation of America, also a complete monopoly of all the radio communication in our country."

6 YOUNG FOLKS CORONER'S JURY DEAD AS RESULT HOLDS JEFFRIES OF ACCIDENTS WAS NEGLIGENT

Portland Vicinity Visited by Driver of Hit-and-Run Car Series of Tragedies in Last 24 Hours—2 Girls Are Killed When Speeder Jumps Logging Trestle.

PORTLAND, Ore., July 12.—(AP)—Six young folks were dead today as a result of a series of accidents in Portland and vicinity during the last 24 hours.

The dead—Leslie Young, 19, Portland; Sarah Childster, 17, Vancouver, Wash.; Alvin Thompson, 15, Goble; Evelyn Hunter, 14, Goble; William Hilton, 12, Hood River; Donald Hines, 15, Portland; Leslie Young, son of Mr. and Mrs. Charles Young, died last night from injuries received when jumping the wheels of an auto driven by William Jeffries, aged 42, square keeper of a gas station at Mountain View on the Ashland-Klamath Falls highway, returned Findings hold Jeffries responsible for the boy's death and recommending that he be held on a charge of involuntary manslaughter.

Miss West, age six, younger brother of the dead boy, lapsed the clearest testimony given at the hearing, according to the authorities. The boy, with Henry Parrell, his other brother, Rich Childster, and the tragedy victim, were being along as they went up the highway. They had a padlock and were taking it in the car. Henry ran across the road to get the plaything, and directly in the path of Jeffries machine. His two brothers and Parrell screamed a warning, but in his confusion Henry ran into the auto. This evidence was corroborated by the other two boys.

F. E. Woolver and Levi Stevens, of the wives of Klamath Falls, were the other witnesses of the accident. They testified that they saw Jeffries coming down the steep grade and saw the machine crash into the boy. They stopped their own car and the men rushed to the cramped form on the pavement. They saw Jeffries leave the auto, return a few minutes later and procure a rifle, and then hurry into the neighborhood.

Woolver and Stevens testified that just before the accident Jeffries had speed down, and wheel marks in the pavement corroborated this evidence. Evidence also was introduced tending to show that Jeffries had not been drinking immediately preceding the accident, his last drink, so far as shown by the coroner, being a glass of beer.

Eight student agitators arrested at St. James, B. miles from Canton, have been brought to Canton for trial. There are 17 girls among them. Execution of most of the students is likely.

DRY DELEGATE NAMES AL FOR G. O. P. REBUKE

CHICAGO, July 12.—(AP)—Governor Alfred E. Smith, democratic candidate for president and an advocate of modification of the Volstead act, today was nominated as a candidate for the presidency by a delegate to the convention of the prohibition party.

Dr. James M. Templeton of Cary, N. C., played Smith's name before the convention. He explained to news writers that he did it to "offset the republican influence in the convention."

A few squares away, the farmer-labor party executive committee pondered a dilemma created by Senator Norris' refusal to head a third party. The farmer-labor convention nominated the Nebraska republican.

A resolution endorsing Hoover, presented by H. Hea Garber, Pittsburg, brought on the prohibition debate. Action on the platform was delayed until after a resolution is adopted.

W. A. Gay of Birmingham, Ala., a hard-miner, mentioned the name of Senator Thomas Hefflin of Alabama, a far of Governor Smith, democratic presidential candidate, during a plea for a "union of dry forces."

Gay declared that Alabama was a pioneer prohibition state and that it had given to the "cause" Senator Hefflin and Senator Hugo Black "God bless Hefflin," a delegate interjected.
