MARMON SALES HIT HIGH MARK

Another new high record for retail sales of Marmon straight-eights was established in June, according to a final compilation of sales reports at the Marmon factory which further reveals that the company's shipments in the first six months of this year were slightly more than 15 per cent greater than the total for all of 1927.

A carload of new Marmon models is expected in Medford early this week by the Highway Motor company, new Medford Marmon dealers.

Last year, the first in which the Marmon company entered into volume manufacture of straight-eight cars, exceeded any previous year in the history of the company by nearly 300 per cent. The previous high monthly record was established in May of this year.

Early in June sales of the Marmon "68" and "78" reached the same level as last year's total and subsequent record-breaking activities in all parts of the country resulted in the new high monthly mark. In manufacturing approximately 115 per cent of last year's total in but six months of 1928, the Marmon company established one of the most remarkable records in the industry and, at the same time, climbed to first place among all producers of straight-eight automobiles.

Advance orders that have been received by the company for delivery the remainder of the summer insure a continuation of the record activity, with no letup in what generally is regarded as the dull season in retail automobile sales. Popularity of the two lines of straight-eights has grown rapidly and dealers everywhere report that sales are going forward at a rate that is comparable to the peak seasons of the year.

Although volume shipments of cars from the Marmon factory have been maintained at a steady level, a survey of stocks in all parts of the country shows that there is an average of but approximately four cars in the hands of each of the company's dealers for display purposes. This estimate includes the large cities and is indicative of the fact that retail sales have kept fully abreast of factory production.

MRS. WILLEBRANDT HAS PLENTY OF NERVE

DE KALB, Ill., July 21.—(AP)—Mrs. Mabel Walker Willebrandt, assistant federal attorney general, continued her plane trip to Oakland early today after having been forced down near here last night.

She left Chicago last night on a mail plane for the Pacific coast, where she is to make an address. She remained in the field shack until early today, when the journey was resumed as the fog lifted.

G. E. DEVELOPS REFRIGERATORS

The research laboratories of the General Electric company have been responsible for the development of many of the electrical appliances in common use today. Their vast resources, wealth of experience and equipment were brought to bear on experimenting and perfecting X-rays, radios, wiring systems, power plant equipment, nationally known electric household appliances, and practically every electrical device from the smallest incandescent lamp to the mightiest of electric locomotives.

Their latest achievement was recently brought to light in the form of a revolutionary type of electric refrigerator. Their 64 engineers made and tested over four thousand refrigerators of 19 different types. Their aim was to produce the simplest, most practical electric refrigerator which electrical science could achieve. That ambition has been realized in their new General Electric refrigerator which gives perfect refrigeration.

"Among the outstanding advantages," says H. V. Scheffel of Medford Electric company, "is the simplified installment. There are no pipes to clog, no drainage to account for, no special electrical wiring. Just plug in at the nearest light socket and it starts. This makes it almost as portable as an electric fan. It is unusually quiet in operation, which makes it especially desirable.

"Another feature which will please the busy housewife is the fact that it never needs attention of any kind, no oiling, nothing to get out of order. All parts are enclosed in hermetically sealed housing. The coils need no dusting or care, as the circulation of air through them drives the dust away from the top of the refrigerator.

"It uses very little current and maintains uniform temperature. This item alone is worthy of special merit. Many people do not have access to ice in the smaller communities, but no village is without electricity.

"This refrigerator was built as woman really wants it. Many women experts were consulted. Good Housekeeping institute made suggestions which were incorporated into its design. Every possible convenience was added to make it an ideal refrigerator."

OBREGON'S BODY ARRIVES HOME; WIFE COLLAPSES

NOGALES, Ariz., July 21.—(AP)—The funeral train bringing the body of General Alvaro Obregon to Navajoa, Sonora, arrived at its destination this morning, dispatches to the Herald here today said. Senora Obregon collapsed as the train drew in and was placed under the care of a physician.

The widow of Mexico's assassinated president-elect rallied somewhat after a few moments, but was reported to be suffering from great mental distress.

The black-draped train carrying General Obregon's body to its final resting place arrived at Navajoa at 6 a. m., mountain time. Shortly after it was definitely indicated that interment would take place tomorrow at Huatabampo, birthplace of Obregon.

Some Fruit Trees—Some Alfalfa

STRAIGHT AND TO THE POINT

Diversified farming may not always pay best, but the fact remains that fruit and alfalfa make a powerful combination in this valley. Water is essential to success with both. The ideal combination is one where sufficient fruit is grown to "cover the overhead" and enough cows and pigs kept to give the monthly income.

WE HAVE THAT IDEAL TRACT FOR SALE, CLOSE IN and at a reasonable price. It will prove both productive and profitable to the right man, one who knows farming. There's no maybe about it, for the man who works to win out with such a tract as this back of his efforts.
