Now you can be sure it's Swift's Premium Hams and Bacon

First again in the matter of identification and protection to the consumer and conscientious dealer.

First to wrap fancy hams and bacon to protect quality.

First with distinctive identifiable package with Swift on the wrapper.

First with the identifiable "Not necessary to parboil" tag.

First again to use a large brand on both hams and bacon so greater proportions were identifiable.

First again to double brand bacon with the word Premium, thus increasing the identifiable portions.

First again in branding "Swift" in dots on the side of the ham and bacon. This branding resembles the rich brown color of the broiled ham and bacon, which makes all portions identifiable.

When being sliced by the dealer. After it is sliced and on display. When it is delivered to your home.

This is a protection to the discriminating purchaser and conscientious dealer.

Swift & Company

Always look for this branding

When the West thinks of coffee

it says, "Hills Bros."—the coffee roasted a few pounds at a time. That's the secret of Hills Bros.' patented, continuous process—Controlled Roasting. It's the secret of the wonderful, uniform flavor, too—a flavor that you won't find in any other coffee.
