

Becomes most popular girl in her set

—after learning why people were unfriendly to her

FLOCKS of eager young men seek Betty—now the most popular girl in her set.

And this is the girl who used to be so lonely, so friendless.

How did she do it? A lucky accident. She chanced to overhear a whispered conversation and found out that she, too, was guilty of "B. O."

Betty knew what that meant—Body Odor! And then she found an easy way to overcome it. She's a favorite with everyone.

Easy to end "B. O."

It's hard for anyone with body odor to win popularity.

Of course, we all must perspire to live. Even on a cool day, our pores

give off as much as quart of odor-causing perspiration. We don't detect this odor, our sense of smell is so used to it. But others do!

Why take chances? To keep safe just wash and bathe often with this delightful purifying toilet soap—Lifebuoy. Its bland and abundant antiseptic lather purifies pores—giving freedom from body odor.

Healthier complexions, too. This same mild, antiseptic Lifebuoy lather also purifies face pores—keeping complexions smooth, clear and glowingly fresh. Guards health, too—by removing germs. You'll learn to love Lifebuoy's pleasant clean scent, which tells you it purifies and which vanishes as you rinse. Get some today.

LEVER BROS. CO., Cambridge, Mass.

**PRESIDENT OF INSURANCE CO. HELD TO BLAME OVER MURDER OF WIFE IS TOLD HUSBAND**

ST. LOUIS, Aug. 14.—(AP) Blame for the plight of the International Life Insurance company from which is missing \$2,500,000 of assets, was placed on the shoulders of Roy C. Toombs, its president, by his associates in the company.

Roy C. Toombs.

Testifying at a session of the investigation in progress here, T. J. McReynolds, member of the finance committee and a vice-president, and Bob Barclay and H. O. Woodward, assistant financial managers, said Toombs was to blame.

Meanwhile dispatches told of the action of six state insurance commissioners in forbidding the company to do business in their states. The states from which the company was barred from operation yesterday are Oklahoma, West Virginia, Nebraska, Maryland, Indiana and Ohio, while Virginia has given the company an opportunity to show why it should not be barred.

Judge Mimbrough Stone of the federal circuit court held a conference in Kansas City last night to determine whether or not there will be a vacation of the federal receivership of the concern to give the state court receivers a free hand. Judge Merrill E. Otis and several insurance commissioners were included in the conference, which adj. turned at a late hour without making an announcement.

Toombs who was arraigned in court in Chicago yesterday had not put in an appearance here last night and District Attorney Sidener expressed the belief he would be here today to answer any charges which may be made.

Assistant Attorney General of Illinois arrived yesterday and went into a conference with Sidener on the subject of jurisdiction over Toombs, who lives in Chicago.

SOUTH BEND, Ind., Aug. 14.—(AP)—Austin Pavay, 35, an amateur photographer, committed suicide late last night as police entered his home to arrest him in connection with the murder yesterday afternoon of Mrs. Lillie Mae Carmein, 33, a factory worker. Mrs. Carmein was shot four times and her body left lying in one of the principal streets of the city.

According to friends of the family, the suicide of Pavay was the last act of a triangular love affair. Elmer Carmein, husband of the dead woman, is grieved stricken, as is a ten-year-old son.

The body of Mrs. Carmein, left lying in the street by her assailant, was not identified until last night. Hearing a description of the body being broadcast over radio station WSBT of the South Bend Tribune, a former neighbor of the Carmeins induced Mr. Carmein to go to the police morgue where he identified the body as that of his wife.

CLAIM NEW COPY OF MONA LISA HAS BEEN DISCOVERED

SALMANCA, Spain, Aug. 14.—(AP)—What is claimed to be a replica of Leonard Da Vinci's Gioconda has been discovered here.

The picture bears what is said to be the signature of the famous painter. It has been deposited for safe-keeping and will be examined by experts.

Gioconda, which is better known as Mona Lisa, is probably the most famous female portrait in the world. The accepted original is in the Louvre, Paris. The picture disappeared from the Louvre in August, 1811. It was recovered in Florence in December, 1913. Vincenzo Peruda, an Italian, was tried for its theft and received a nominal sentence.

The picture was painted by Leonardo over a period of four years from 1503-1508.

The Criminal Scores Again. NEW YORK, Aug. 14.—(AP)—A tiny pistol worn as a watch chain isn't a concealed weapon, ruled A. Merrick, Long Island judge, inferentially. He refused to entertain a charge preferred by a policeman who was wounded when the charm was discharged.

**INSANE PATIENT IS BEATEN TO DEATH**

NEW YORK, Aug. 14.—(AP)—Charges that a patient virtually was beaten to death in the psychopathic ward of the Kings county hospital in Brooklyn are being investigated by the police.

The patient, Joseph Brown, 59 years old, was alleged by Michael J. Hegarty, a former policeman, to have been beaten and placed in a straightjacket by two orderlies. He died two days later. Hegarty's story was said to have been corroborated in part by a negro truck driver, who, like Hegarty, formerly was a patient in the ward.

**WARNING OF TYPHOID FEVER IN U. S. ISSUED**

WASHINGTON, Aug. 14.—(AP)—The United States public health service today called attention to the fact that while typhoid may occur at any time during the year, it is most prevalent in the late summer and fall months, and that precautions against the disease must be redoubled during that period.

The public health service emphasized that inoculation generally renders a person comparatively safe from typhoid, and where inoculation is not resorted to, sanitary conditions must be watched closely.

**SONG WRITER SPARED FROM POTTER'S FIELD**

NEW YORK, Aug. 14.—(AP)—The body of Arthur J. Lamb, composer of "Asleep in the Deep" and other favorite songs, will be saved from burial in potter's field.

I. M. Sackin, his attorney, said the body of the composer would be brought to New York from Providence, R. I., where he died, and given burial by the American Society of Composers, Authors and Publishers. At the time of his death only \$2.50 in cash was found in his pockets. Sackin said Lamb's only known relative is an aunt in Bath, England.

Oregon has more than 20 important bridges under construction.

**MUNSON LINER IS STILL AGROUND**

MIAMI, Fla., Aug. 14.—(AP)—The Nassau correspondent of the Miami Daily News today advised the paper by radio that the Munson liner, Mubamar, which went aground at Gorda Bay, near Abaco, Bahamas,

Sunday, still was stranded this morning. Passengers were removed yesterday by the colonial government tug Lady Cordeaux and the schooner Halycon and were quartered last night in the Colonial hotel at Nassau, a winter hothouse, which was opened especially to accommodate them.

Wrecking tugs will be necessary to free the liner, which is hard aground on sandy bottom. It was said the ship was not believed to have been damaged to any considerable extent.

**2 MORE OREGON BOYS DROWNED**

BEND, Ore., Aug. 14.—(AP)—Alfred Johnson, 13, son of R. L. Johnson of Portland, was drowned in the South Umpqua river, near Canyonville, Sunday while bathing.

BEND, Ore., Aug. 14.—(AP)—

Swimming in Scout lake shortly after eating, Frank Barron, 13, son of Mr. and Mrs. Charles Barron of Central, Ore., was drowned Sunday.

Pastor Is Unfrocked. LOS ANGELES.—Rev. Frank Dyer, unfrocked pastor of the Welsh-Bonlevard Congregational church, will not resign his pastorate even though he is ousted from the church by court order, he said yesterday when the superior court indicated such action would be taken.

**In the kind of carbon they form**

you see a vital difference in oils.

Carbon deposited by ordinary oil is hard, flinty. It will tear paper; it will scratch brass—wear away steel

The carbon that Shell Motor Oil forms—1/3 to 1/5 as much as even the most expensive oils—is soft, soot-like. Most of it blows away through the exhaust

Motors that miss, knock, lose power. Clogged with carbon from burned lubricating oils—oils that would be satisfactory lubricants except for this tendency to form hard carbon.

In fact, the vital difference in oils today is in the carbon they form.

How much? What kind?

Carbon is deposited by ordinary oils in flint-like layers. Abrasive bits chip off and grind through bearings. Larger particles hold valves open, the stems burn, power is wasted.

Shell Motor Oil forms only 1/3 to 1/5 as much carbon as even the costliest oil you can buy! And that little is soft, sooty—blows away through the exhaust.

The secret is in new Shell methods. So carefully is this oil refined that none of its sturdy lubricant body is lost. It will withstand heat that would ruin ordinary oil.

And while Shell Motor Oil is giving you finer lubrication it is saving the destructive damage of carbon—actually adding thousands of miles to the life of your car!

Remember these facts when you buy oil next.

**SHELL MOTOR OIL**

Shell 400, the new "dry" gas that explodes cleanly and keeps out of the crankcase, is the ideal running mate for Shell Motor Oil. Even Shell Motor Oil can be ruined by "thinning" with a "wet" gas

To owners of newer models

Today's high compression motors have as little as 1/32 inch "clearance." Even a thin layer of hard carbon causes trouble. Shell Motor Oil, forming less carbon, soft carbon, is almost an essential to proper performance of such motors
