

VOLSTEAD UPHOLDS HOME PADLOCKING TO CURB LIQUOR

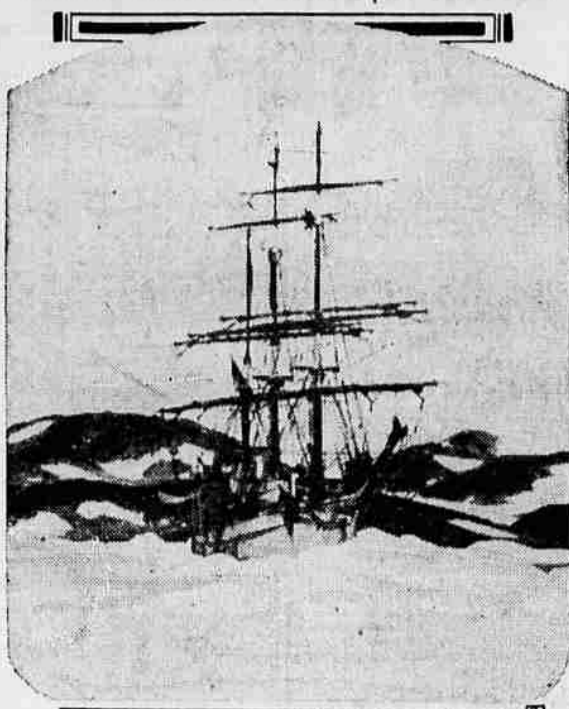

ST. PAUL, Aug. 28.—(AP)—Action started in Minneapolis to padlock homes in which the national prohibition act has been violated today drew approval and support of Andrew J. Volstead, author of the Volstead act and now legal adviser to the Northwest prohibition bureau.

Volstead declared the government can padlock a home "just as easily as it can a soft drink bar."

"The law absolutely makes no distinction between a home and place of business where violations take place," he said. "The fact is, we are empowered to go as far as is necessary to abate a nuisance and a home in which liquor is dispensed is nothing more than a nuisance."

"As soon as liquor is kept or sold there it loses its character as a home and becomes in effect a saloon. Even if the violations take place in but one room there is no doubt that we have the right to padlock the whole building."

JOINS RESCUE SHIPS IN ARCTIC

A French ship, the "Pourquoi Pas," has joined the other relief vessels ploughing through the ice fields off the Spitzbergen coast, in search of Roald Amundsen and others who have been lost since they took off to attempt a rescue of the crew of the ill-fated Italia.

CONFERENCE ASKS BAN PLACED UPON TAX LEGISLATION

SEATTLE, Aug. 28.—(AP)—Legislative freedom to make and amend tax laws was urged by Dr. Harley L. Lutz of Stanford university, president of the National Tax association, which met here last night.

Three hundred and forty-seven delegates, representing 37 states, territories or Canadian provinces, had registered for the opening session tonight. More were expected tomorrow.

Three hundred and forty-seven change tax systems to cope with changing conditions," Dr. Lutz declared. "I fully believe that the constitution is best which says the least about taxation."

Similar beliefs were voiced earlier by Governor Roland H. Hartley of Washington, who welcomed the conference members to the state. The executive declared that there is "too much government and there is a vital need to call a halt to legislation."

Today's session will be devoted to Pacific coast tax problems and to discussions on public expenditures.

FAVOR PUBLICITY ON ARMS MAKING

GENEVA, Aug. 28.—(AP)—Japan, Great Britain and Italy today announced their adherence to the doctrine of the United States that "unless publicity should be given to the governmental, as well as the private manufacture of arms."

This stand developed at the opening session of a commission, which will frame a draft convention for the control of the private manufacture of implements of war. It is interpreted as meaning that all the great powers are ready to publish information concerning the manufacture of arms and munitions, whether that manufacture takes place in government arsenals or elsewhere, when the arms are for use of governments.

FAMED VIOLINIST AND MOVIE QUEEN MARCH TO ALTAR

NEW YORK, Aug. 28.—(AP)—Florence Vidor, motion picture star, whose marriage to another film star ended in the divorce courts, because she said too much about in one family, interfered with the careers of husband and wife, has been married to Jascha Heifetz, world famous concert violinist.

The marriage was performed secretly by Alfred Frankenthaler, supreme court justice, at the Mayfair House on August 26, and news of the event was withheld by the principals until last night when Heifetz surprised his manager with the announcement, as he and his bride departed for California.

Their romance has not been entirely a secret, however, their names having been linked several times of late, and when they arrived to gether from Europe two weeks ago, neither would deny reports that they were planning to marry. They met in California two years ago.

The bride, who is the mother of a 9-year-old girl, Suzanne, was divorced in Los Angeles three years ago from King Vidor, now motion picture director. At that time she indicated to the court that talented families tend to "submerge the individual." She was born in Houston, Tex., and is 32 years old. Heifetz, who is 27, was born in Vilna, Russia. This is his first marriage.

SEEK 2 NEGROES FOR MURDER OF RANCH FOREMAN

ST. HELENS, Ore., Aug. 28.—(AP) Police officers today redoubled their search for Carl Shelton and Taylor White, young negroes, following the discovery yesterday in Milton creek, near here, of the mutilated body of M. C. Ramsey, 69, negro foreman of the Tom Johnson ranch on which the three were employed.

Since July 24, when Ramsey and the two young men disappeared, a search has been made for them. An automobile which was taken from the ranch was found in Portland on July 25, with two tires flat. The sheriff's office had believed since the disappearance that Ramsey had been killed.

A heavy grubbing hoe bearing blood stains on the blade and on the handle was found on the creek bank yesterday near the body. Sacks, also covered with blood, were discovered nearby. It was believed the sacks were used to carry the body to the creek.

What is said to have come here from Kansas City, Mo., where he has a wife and baby. He is believed to have a criminal record in that city. Shelton's home is in Tennessee.

WAR HEAD WILL STUMP FOR HERB

SEATTLE, Aug. 28.—(AP)—Secretary of War Dwight F. Davis announced here last night that he will take the stump for Herbert Hoover throughout the middle west.

"It will be a hard fight, but I am sure he will win," he said. "The campaign will be decided on Hoover's qualifications and his strong appeal to the women voters."

Secretary Davis arrived aboard the battleship Pennsylvania from Honolulu yesterday afternoon, accompanied by his two daughters, Alice and Cynthia, the first women to be carried as passengers on a battleship.

Secretary Davis expects to leave tonight for Washington, D. C., where he will remain until called into the field to campaign for Mr. Hoover.

FREEWATER ASKS ABOUT JUSTICE

SALEM, Ore., Aug. 28.—(AP)—When James O. Horton, justice of peace of Freewater, Umatilla county, moved to Seattle and took a job he has been away two months and the people of Freewater don't know whether he is going to return or not. They have sent a petition to Governor Patterson, asking him to appoint A. S. Pearson to fill the vacancy believing this is the legal procedure whether the vacancy is permanent or temporary. The governor referred the question to the attorney general, who holds that if the vacancy is temporary the Umatilla county court should make the appointment, while the governor should appoint if the vacancy is permanent. Whether it is temporary or permanent must be decided at Freewater.

PARIS, AUG. 28.—(AP)—Mrs. Harrison Tweed, formerly Eleanor Roelker of East Greenwich, R. I., married Count Palffy Ab Erdod of Czechoslovakia Saturday.

KLAMATH FIRST BY COURT ORDER

PORTLAND, Ore., Aug. 28.—(AP)—Klamath county must receive its tax money from the Wheeler-Olmstead Lumber company before other creditors of the bankrupt company realize any proceeds from the sale of the plant.

This is the decision of Federal Judge Bean, who refused A. M. Cannon, referee in bankruptcy. The decision pertains to taxes due Klamath county from 1923 to 1927. Cannon's original decision gave the county no preference in collecting the money due for taxes.

HIGHER GRADE OF INSURANCE AGENTS

SALEM, Ore., Aug. 28.—(AP)—For the protection of the public, it is said, representatives of the Portland Insurance exchange, the special agents' association of Oregon and Washington, and the Oregon State Insurance Agents' union, yesterday asked Clara A. Lee, state insurance commissioner, to require a higher qualification standard for agents in Oregon. This could be done, they suggested, by adoption in part of the qualification blank used in California. Lee said he would act on the request within 10 days.

256 COUNTY VETS GET STATE LOANS

Service Officer Newton C. Chaney reports that over 256 veterans of the World war who reside in Jackson county have secured 256 individual loans from the World war veterans' state aid commission of Oregon, totalling \$593,427.31, or over one-half million dollars has been borrowed under the Veterans' World War act.

Mr. Chaney reports about 10 or 12 are applying for these loans each month, on the average.

MYSTERY OF LOST BABE IS SOLVED

EUREKA, Cal., Aug. 28.—(AP)—A skeleton of a little girl, believed to be that of five-year old Lucille Davenport, who wandered away from her parents camp in the Bull creek flat country more than a year ago, was found last night by Archie Smith, a tie maker, who was returning to his cabin via a seldom used path.

The skeleton, lying on a tiny cot by the side of a log, was four miles from where the parents, Mr. and Mrs. Lee Davenport of this city, had camped over the July 4 holidays in 1927. The babe wandered away July 3, and for two weeks a posse searched unavailingly for her.

Smith declared the coat answered the description of that worn by the child when she disappeared. Authorities were planning to visit the spot today in an effort to identify the skeleton.

LODGES HARD HIT BY RADIO, AUTO

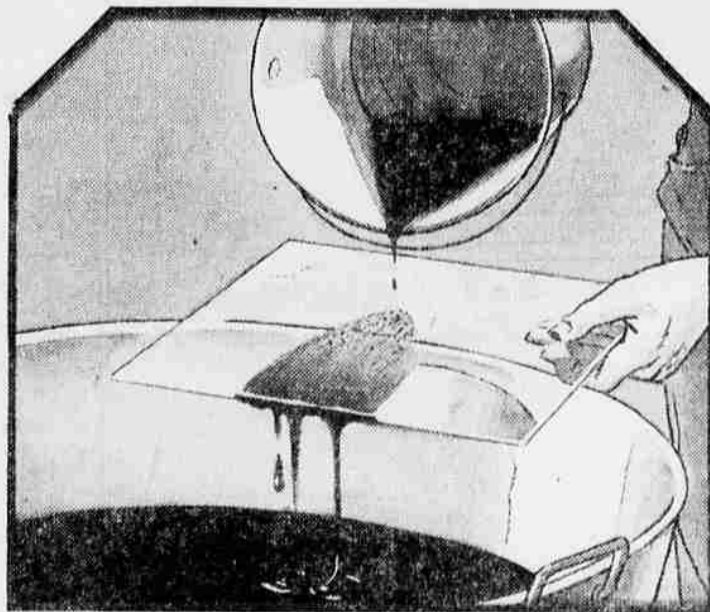

TEEFIN, O., Aug. 28.—(AP)—Membership in fraternal orders is being hard hit by the automobile and radio, according to state senator William A. Clark, Orinda, Ohio.

"The former lodge man now takes his family automobile riding or remains home to listen to the radio instead of going to lodge meetings," Clark, state organizer for the junior order United American Mechanics, said in his report to the state convention here today.

SALEM, ORE., AUG. 28.—(AP)—Governor Patterson has appointed William P. Merry of Portland as director of the Museum Association of Oregon. A branch of the association is opening in Portland and will specialize in a display of Oregon products. The law requires that the governor appoint one of the board members.

This hard gritty carbon that causes wear

There's an oil now that forms none of it!

Pour waste oil on a pane of glass—you'll see bits of metal "flings" from your motor's moving parts. And "dirt"—gritty black carbon that causes wear!

You likely think of carbon as it forms in hard layers on piston and cylinder heads—removed only by abrasive scraping.

But the tiny abrasive chips of flint carbon that constantly "sandpaper" your bearings, your cylinder walls—every moving engine part—they'll wear your motor out before its time!

And you may be blaming hard carbon to something other than its real cause. It comes from burned motor oil. It causes knocking, you may know. Flakes chip off and get under valves, holding them open to waste power, to burn and warp.

Strangely enough, even the costliest oils often form the most carbon—three to five times as much. And the carbon they form is hard, flint-like—the sort that causes serious damage.

So you can't judge motor oils on "lubricating value" alone. A vital point is the carbon they form—How much? What kind? There is one oil you should know about in this connection.

Soft carbon—and only a little of it
Shell Motor Oil, made by a new refining process, forms less carbon than any oil you can buy. What little it does form is soft, sooty—blows away through the exhaust.

It has a remarkably high heat resistance, holds its sturdy lubricant body under heat that would ruin ordinary oils.

In every way it is a smoother, finer lubricant; you are fully justified in saying that it "adds thousands of miles to the life of your car."

Insist that Shell Motor Oil be put into your car when you refill, when you buy extra oil. You are sure then not only of good lubrication—but freedom from gritty carbon.

SHELL MOTOR OIL

Shell 400, the new "dry" gas that explodes cleanly and keeps out of the crankcase, is the ideal running mate for Shell Motor Oil. Even Shell Motor Oil can be ruined by "thinning" with a "wet" gas

She couldn't tell him the trouble was "B.O." (Body Odor)

Snubbed again—

but he won her when he learned what was wrong

He was dumfounded! To be cut dead like that by her—the one girl he cared for! Why had she done it? He didn't know then—but that very evening an advertisement caught his eye. It told about "B.O."—Body Odor! It explained that no one is safe from this unpardonable fault; and that the offender seldom suspects he is guilty.

Perhaps that was it. He had noticed that lately many people looked at him queerly whenever he approached them. He was sure he had learned the secret.

Today this same chap is a great favorite everywhere. And he has won the girl who snubbed him. Read how he found that the simple way to overcome his handicap was delightful, too.

Body odor needless now
"I first got Lifebuoy as a deodorizer."

LIFEBUOY

FOR FACE • HANDS • BATH •
