**PURE MILK IS THE PERFECT FOOD — and Seal-Kaps guard its purity until you drink it**

Milk is your cheapest and most complete food. It carries the necessary protein to build muscle. It contains all of the five vitamins, those strange substances that help children grow, that create energy and increase resistance to disease.

Yet milk is the most easily spoiled of all foods. It must be protected in spotless dairies and bottling rooms. It must be guarded until the very moment you drink it. For this reason, we have adopted Seal-Kaps for our bottles.

Seal-Kaps completely cover the mouth of the milk-bottle. They protect it from contamination by flies, cats, dogs or germ-laden fingers. They are the most convenient milk-bottle cover. No prying with picks or knives. No splashing of milk on your clothes. Seal-Kaps can be taken off by a twist of the hand. And they make a handy bottle cover afterwards.

We are the only dealers in town that offer this safe and convenient bottle top to protect your milk supply. Telephone for your first bottle tomorrow morning.
