

Fishers' Flour Booth at Fair

The Fisher Flour Mill booth at the fair is in charge of Mr. and Mrs. E. G. Lawrence for the fourth year, and they are again pleasing hundreds of people with their famous scones.

Mr. and Mrs. Lawrence are well known here and have had much to do with making Fisher's flour popular in Medford and southern Oregon.

FIRST DAY'S RACES PLAN ACTION FOR ON HEAVY TRACK SHOW FAST TIME

Fast horses faced the barrier at the Jackson County Fair and Oregon Pear Show race track Wednesday in the five events which were reeled off in rapid succession under the management of Harry Wood, official starter and the judges, Wilbur Ashpole, J. J. Murphy, Nick Young, Scott Woolf and Ray Moran.

The track proved a bit heavy following Tuesday's rain, but surprisingly good time was chalked up as the course rapidly dried out under the influence of the sun and a light breeze.

The Grants Pass band entertained during the racing program and fancy riding and roping stunts also filled in the intermissions.

According to Dr. G. A. Gitzen, one of the track officials, the racing program for the remainder of the fair will be handled as in the opening day, giving the grandstand crowds plenty of action and doing away with long drawn out sessions which race fans would otherwise be forced to endure.

Results in Wednesday's races were as follows:

- No. 1—1/2 Mile, Purse \$75.00
1. Ashton Boy; owner, Phillips.
2. Miss Sprague; owner, Roach.
3. Dimples; owner, Hobson.

PLAN ACTION FOR FOREST FIREBUGS

SALEM, Ore., Sept. 13.—(AP)—In a further effort to cut down the annual fire loss in Oregon caused by incendiaries, State Fire Marshal Clara Lee is asking the cooperation of the fire chiefs of the state.

In a letter to the chiefs Lee requests that whenever a fire of suspicious nature occurs in any city or town the chief inform the fire marshal at once, so that there may be no delay in getting an investigator on the scene. Most of the fires that are classified under "unknown" causes are said to be the work of incendiaries.

New Inventions

To insure proper humidity in the home, a moistening outfit easily installed in the hot-air furnace is said to greatly promote health and comfort and to save fuel. Its essential feature is that, as the water is evaporated, a fresh supply is constantly introduced from the house system through an automatically regulated valve that keeps the vaporizing pan filled to the desired point at all times. This eliminates the need of refilling the pan by hand.

To shield the baby from flies, dust and other disturbing and injurious things while in its carriage outdoors, an adjustable screen for the front has been introduced. It is securely attached and, when not needed, tucks back into the hood of the buggy, where it is entirely concealed and out of the way.

A prize of \$15,000 has been awarded Brig. Gen. John T. Thompson by the British war office for his rapid-fire rifle. It is operated in somewhat the same manner as a revolver, and is said to shoot twice as rapidly as the usual rifle.

Attached to the ordinary telephone instrument and operated through the regular circuit, a tape recorder enters the number of the telephone that makes the call when the person called is not present. The number is perforated by means of a key arrangement operated at the other end. When he returns, the person called can tell by a glance at the tape if his telephone has been rung during his absence.

Both edges of the double safety-razor blade are sharpened without removal from the razor by a combination hone-and-strop device recently introduced. A few quick strokes back and forth are said to be sufficient to produce keen edges. The sharpener is quickly adjusted or taken off and strikes the blade while it is in the most

suitable position for forming a sharp edge.

Built in a sturdy frame that may be carried like a suitcase, a portable electric saw does rip or crosscut work, mitering, grooving and beveling, and will work lumber up to three inches in thickness.

The quarter-horsepower motor may be used for driving other tools, and there is a long extension cord for power connection.—Popular Mechanics.

"Not a cough in a Film-ful" says Norma Talmadge after the Blindfold Test

"When you see my new United Artists' picture, 'The Woman Disputed,' you will notice that I smoke cigarettes in several scenes.

"Not wanting to show partiality to any one of the four leading brands, I decided to make my choice via the blindfold test, which I had heard of many times. Happily, I picked Old Golds.

"I found them smooth, mild and delightfully cool. . . Hereafter, when I am required to smoke I shall naturally insist on Old Golds. There's not a cough in a film-ful!"

Norma Talmadge

NORMA TALMADGE . . . celebrated screen star . . . smoking OLD GOLDS in a scene from her latest United Artists' starring vehicle, "The Woman Disputed."

THE INCOMPARABLE NORMA . . . one of the best loved actresses in the history of the screen . . . famous for her roles in "Camille" and "Kiki."

Made from the heart-leaves of the tobacco plant . . . that's the reason for their honey-like smoothness . . . and that's why you can pick them with your eyes closed.
