

MYSTERY BLAST ON SHIP AT SEA CLAIMS 5 LIVES

PHILADELPHIA, Sept. 14.—(AP)—The boatswain who lost his life in the explosion aboard the steamer Shreveport off the Carolina coast yesterday, was John Wolselgar, of Delaware Gardens, near Camden, N. J., according to the records of the United States shipping commissioner here.

The address of the other four dead men are:

A. Bergman, chief mate, Brooklyn, N. Y.

Harry E. Hopkins, second mate, North Eastham, Mass.

D. Miranda, pumpman, Asturias, Spain.

Sven Person, machinist, Boston.

The charred hulk of the tanker Shreveport, anchored off Frying Pan Shoals, bore mute evidence today to another grim tragedy of the sea.

Five seamen were dead as the result of an unexplained explosion on board the craft yesterday, which came with stunning and terrifying abruptness, tore away the bridge deck and midship housings and incapacitated the vessel's radio facilities. Almost immediately, the ship was enveloped in flames.

Four members of the crew were injured and with 25 other survivors they were brought to Southport by the Spanish steamer Aldecoa, which was attracted to their rescue by the smoke pouring upward from the blazing vessel. The injured men were expected to recover.

Tales of heroism were related by the survivors. R. F. Churchill of Cliffside, Mass., the Shreveport's steward, and one of the injured, was imprisoned in his quarters by twisted steel. His eyes attracted the attention of the other men as they were pushing away in the two life boats left seaworthy by the explosion. They returned to the ship and rescued the steward through a port hole.

MORE WRECKAGE FROM AMUNDSEN PLANE LOCATED

OSLO, Norway, Sept. 14.—(AP)—What is believed to be additional wreckage from the plane in which Roald Amundsen and five companions were lost at the start of their attempt to rescue members of the Noble Arctic expedition, was found this morning in the southern part of the Strait of Tromsø. It seemed to be part of a wing from the French Latham seaplane piloted by Rene Guilbaud and carrying, besides Amundsen, lieutenant Dietrichsen and three French naval experts from the cruiser Strasbourg. It was found in the vicinity where on September 1 fishermen picked up one of the pontoons of the plane. Discovery of that pontoon convinced both Norwegian and French authorities that the Amundsen expedition had perished. Identification of an additional relic of the machine would be taken here as confirming that belief.

BUSINESS SOUND MELLON REPORTS

WASHINGTON, Sept. 14.—(AP)—Secretary Mellon has given to President Coolidge a report that business is in a satisfactory condition and on a sound basis.

The secretary holds that while taking the country as a whole, conditions are good, there are "spots" in the general industry which are suffering through natural causes.

In the coal industry he holds that economies in the use of coal and too large a number of mines were largely responsible for a slump, but that the slump has reached its bottom and conditions will improve from now on.

In the textile industry, the secretary holds over-stimulation during the war was causing a reaction. The industry, also, he declared, was feeling the effect of the manufacture of artificial fabrics, who to some extent were closing some branches of the market to the textile manufacturers.

HOPED FAIR RENEE BROKE HER NECK

LON ANGELES, Sept. 14.—(AP)—Things happen quickly in the domestic life of Renee Adoree, screen actress and today it was not quite certain whether divorce threatens her married life or not.

Yesterday Miss Adoree filed a divorce action against her tailor-husband, William K. Gill. A few hours later, she announced she had instructed her attorney to withdraw the proceedings.

In her complaint, she said, her husband had removed the furniture from their home, refused to let her drive her car and once exclaimed he "hoped she would break her neck" when she drove off after he had refused to take her home.

BITTER OPPONENT OF SMITH LOSES IN GEORGIA VOTE

ATLANTA, Ga., Sept. 14.—(AP)—Verdict of Georgia Democrats was for Smith in the only major race of the state party primary yesterday, in which the candidacy of the New York governor was an outstanding issue.

Congressman Leslie J. Steele, who stood as a staunch supporter of the party's ticket from Smith on down, gained a decisive victory over W. D. Upshaw, bitter foe of the national standard bearer, for the congressional nomination from the fifth district, including Atlanta.

The gubernatorial contest, where both candidates were within their party limits, saw the apparent re-nomination of Governor L. G. Hardman over the youthful State Senator E. D. Rivers.

Representative Steele, who won the seat in the house from Upshaw two years ago, on the basis of the popular vote, carried four of the five counties in the district and apparently had carried Atlanta, Upshaw's home. Steele is a resident of Decatur.

Issuing a statement expressing satisfaction over the result, Steele said that the result in the district indicated that Democrats there were true to their party.

Seventy-six precincts out of 80 gave Steele a popular vote of 9554 against 7110 for Upshaw in unofficial returns. This meant Steele had 16 county unit votes, the actual basis of nomination, to two for Upshaw.

OCEAN MAIL PLANE AND CREW SAVED

PARIS, France, Sept. 14.—(AP)—The mail plane from the steamer Jale de France, missing since it was catapulted from the vessel 800 miles at sea yesterday morning, was found early today off Bishop's Rock, the western outpost of the Scilly Isles.

Commander Louis DeMougeot, pilot of the plane, and his aides are safe. The machine is being towed to the French coast.

PENZANCE, Cornwall, England, Sept. 14.—(AP)—The crew and the mails from the seaplane of the French liner Ile de France were landed at Newlyn, a small port near here, this afternoon. One member of the crew was left in charge of the mails, which were intact. The other member was suffering from exposure, but probably will be able to depart tomorrow.

sented by the 125 piece orchestra, accompanying the picture via movietone.

As an added attraction, one of Medford's promising amateurs will be seen in one of the parts of "Not Tonight, Dearie," and a surprise is in store for those who see her.

A bounty warrant of \$3 was issued yesterday by Joseph Mayfield at the county clerk's office for the killing of a coyote.

NEW ORLEANS, Sept. 14.—(AP)—Two persons were dead today, one was reported dying and another was seriously wounded as the result of an attempt by James Guerra, 25-year-old nightwatchman, to slay his wife's family in a fit of insane jealousy.

Guerra last night located his estranged bride of three months, 17-year-old Nora Muller Guerra, living with her family in the old French quarter of the city in the hope of evading him. Failing at reconciliation, he shot and seriously wounded his wife, killed her mother, Mrs. Louise Muller, 68, and wounded John Muller, 22, her brother, so badly that he is believed to be dying. He then ended his own life with a bullet in his brain.

A note by his body read: "Goodnight, my baby, life is nothing to anybody. Your mother is in town for you to go to her. I am sorry you are going to make me kill you, your mother, sister and brother. I had to cry when I wrote this note."

HERO OF SLOCUM DISASTER PASSES; SAVED 41 BABES

NEW YORK, Sept. 14.—(AP)—Patrick J. Lynch, veteran city fireman who saved the lives of 41 women and children in the General Slocum disaster 24 years ago, died today at the age of 75.

Paddy Lynch, as his friends in the department have called him during the 48 years of his service, walked down to the East River on June 15, 1905. It chanced to be his day off, and he intended to take a swim. As he reached the shore he saw the steamboat General Slocum, loaded with a Sunday

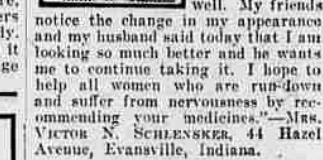

school picnic crowd, full afire and heading for North Brother's Island. Commandeering a rowboat, Lynch rowed close to the burning hulk and shouted to the screaming mothers to throw him their children. They obeyed his orders and after throwing their babies they themselves leaped into the water and Lynch saved as many as he could. He used his rowboat as a ferry between the burning craft and a tug which was prevented from coming close to the fire by the heat. The final count showed that 1031 persons lost their lives in the disaster but Paddy Lynch had personally rescued 41. He was given the congressional medal for life saving.
