ENGLISH AUTHOR HERE FOR COLOR PRAISES PIONEERS

Companionate marriage is just a cry on the part of the men to protect their pocketbooks. This is the opinion of Helen Leslie, brilliant young English journalist and author who is spending this week in Jackson county in search of local color.

"I am not an ardent admirer of the modern generation, although I agree with some other writers that they are not always as bad as they are painted," she said. "It is only a matter of paint and ideas which removes the young English woman from the generation she denounces. In the blond and 28, she could be taken upon first glance, provided you didn't get a good look into her eyes to be a college teacher, and from her old blond curls she looks a decidedly thing by trying to tear them down. I don't believe we can blame the older generation for their democratic stand against the selfishness and blind destruction of their ideals by these barbaric youngsters."

Miss Leslie, whose name in real life is Leslie Helen Whiteley, began her writing career during the World war, when, still a school girl, she drove an ambulance for the Red Cross and plunged wholeheartedly into her work. Her unique observation and penmanship which she sketched down at that time, attracted considerable attention and found their way into some of the leading British publications.

Seven years ago, with the death of her husband, the young author started out to study certain localities which appealed to her imagination. She spent two years in the Channel Islands, off the coast of England and France. Each one of these, she said, has its own peculiar civilization and group of languages. One of the most interesting she said was the island of Guernsey, taken over before the war by Count Ruffine of Germany and developed into a carling pigeon station, from which the German spy conveyed secret plans out of England.

After leaving these islands, she came over to America and has been sending back impressions and letters to the sphere and other London publications. She is making a special study of the American pioneers in various sections of the country, with which she intends to compare the modern generation in the same localities. Before coming to Medford she spent several months in Nevada.

"Here, I found tragic, and a gloomy example of the sins of prostitution. Liquor? Oh, yes, even more of it, and of course better, more and quality than can be found in other sections of the country."

America has again become the pioneer, in her prohibition law. And the failure and folly of attempting its enforcement will save the other continents the trouble of adopting a similar remedy," she said.

Miss Whiteley expects to remain in Jackson county another week. "I was discouraged by my first impression of this locality, and intended to stay no longer than a day or so," she said. "But after I had probed thru the outer crust of the community, and become acquainted with some of the fine older pioneer characters here, I began to realize how thoroughly charming and interesting the place really is. I have a feeling that I shall hate to leave when the time comes."

DEBATE SUBJECT IS GIVEN HI ORATORS

It won't be long until local high school orators are laboring over the following subject which has been issued as the official debate question for 12 districts in the zone.

Resolved: That the system of federal subsidies to the states with federal supervision be abandoned.

Much interest in debating is being evidenced this fall with more than 25 students training out preliminary meetings. Coach Ralph Bailey, of the senior high school, reported Saturday. Groups in the junior high school will also be organized in addition to the upper-grade debaters.

The question for debate was selected by state directors including Clark, assistant director of the extension division of the University of Oregon; Miss Cornelia Marvin, state librarian at Salem; and State Superintendent E. H. Howard.

UNVEIL MARKER TO GEN LANE TUESDAY

In commemoration of the signing of the peace treaty with the Rogue River Indians during the early history of southern Oregon, Crater Lake chapter of the U. S. G. A. 14 DAYS LEFT TO REGISTER OR LOSE RIGHT TO VOTE

With the closing of the registration books on October 8, only 14 days away, next voters and those who have not registered are advised to get in more or their red register as soon as possible, in order to avoid a crunch at the last minute of registration.

Voters who have moved into new precincts since the last election, or voters who have never registered in Jackson county, and new voters who will become of legal age before the registration day, are urged to register as early as possible before Oct. 8 at the county clerk's office.

Voters of Medford and vicinity can no longer register as absentee voters with Leo Garlock in the chamber of commerce building. They must register in the county clerk's office, as it has been discovered that, according to law, a voter's signature can not register voters in another location, or in a city or town where the county seat is located.

This does not affect the registration of voters in other towns and precincts of the county.

All youths who become 21 years old by Nov. 7 may vote at the election on Nov. 6. So it is in those first voters not to overlook the fact that they entitled to vote.

From Washington, D. C. last week James C. Burke, general counsel for the national republican committee, advised all such voters that they could vote in November if they had complied with the other election requirements.

While election day is Nov. 6, all persons whose 21st birthday comes on Nov. 7, actually become 21 years of age under the law on Nov. 6, and other qualifications being complied with, they will be entitled to vote on the advance of their 21st birthday.
