Color Schemes For Your Rooms (Continued) "Color is all that is needed to make the family hearthroom, however gorgeous or modest, things of modern charm. But even though you concede that it is better to have something to begin with, you may still feel that you are unskillful in harmonizing a color scheme. There are to be had color charts which will guide you unerringly. For instance, I have in my possession a color chart, which automatically registers perfect color schemes. It is the key for color harmony. And as much as I have worked with color, I find this chart a fascinating device!"

Color Schemes For Your Rooms (Continued) "It is made of tints and colors suitable to walls, woodwork and painted furniture arranged in two co-ordinating lines. Over these is a master dial with five various sized slots through which show groups of color in their proper relation and proportion to each other. You turn the dial or mask until you have the wall color for your room showing in the largest slot. The five colors which in the varying quantities appear in the other openings will be the colors chosen, according to the laws of color, to use with your major color."

It produces for me an excellent color scheme showing where each color should be used, that it will do for me it will do for you."
