BEARS OUTCLASSED HARVARD BEATEN BUT HOLD TROJAN BY NAVY; YALE TO SCORELESS TEE SHOWS STRENGTH

MEMORIAL STADIUM, BELLEVILLE, Calif., Oct. 20 (AP)—The eleven of the University of California and the University of Southern California battled through four hard-fought periods here today with neither side crossing the other goal line and the final score reading 0-0. A crowd of 75,000 saw the game.

The Southerners outplayed the Bears for the greater part of the game but the great goal line defense of the Californians prevented the Trojans from scoring. In the first half the nearest the southerners came to the Bears' goal line was the 32-yard line. Los pulled out of danger.

The Bears advanced to within 24 yards of the Trojan goal in the first half but were stopped there. In the fourth quarter the sons of Troy staged a great march that brought the ball to the Bears' 15-yard line but the Californians, fighting hard, took the ball on downs and quitted out of danger.

California penetrated into Southern California territory once in the first half and this was in the last quarter when Phillips intercepted Thomas' pass.

While the largest crowd this great, gray field has ever accommodated, aside from the annual game with Stanford, thrilled and killed at the closeness of play, the two bitter rivals pounded and battered at each other with a fury seldom seen here.

From opening kick-off until the final and weary stoppage there, in the stadium they battled for the victory that meant another coast conference win, another advance towards the football championship of 1928.

When they romped off the field in the 22nd minute with the roar of the crowd ringing a tremendous farewell to the winning, the hardest fought battle of recent years had been completed.

Every minute of every period started with action. Like two giant gladiators, embraced in a duel for life itself, they pushed and heaved over the green turf field on even terms.

Almost entirely the battle went on in neutral territory. Only twice were they able to batter their way to within sight of the other's scoring territory.

HARVARD STADIUM, Cambridge, Mass., Oct. 20 (AP)—An army objective, first planned in 1927, was finally achieved here today when the older football team gained its first victory over Harvard, 15 to 0, in a game featured by crimson objectives.

The game was the 14th the teams have played since 1895 and in 11 of them the soldiers were able to score but a total of 46 points. It took them less than 10 minutes to score this afternoon to better that total.

The Harvard line held superbly, but on the fourth down, with 29 yards to go, Coach completed a long pass to Aves, the army quarterback and Murrell, the fullback, hit the crimson center for the touchdown.

The second score was made on a 75-yard march.

NEW HAVEN, Conn., Oct. 20 (AP)—A smart, powerful Yale football team that knew how to make the "hucks" of the game and turn them into touchdowns served notice on the east today that another champion is in the making at old Eli.

With every player of any ability at all in there at one time or another, the Blue Bulldogs smothered a surprisingly strong Brown eleven, 22 to 14 and all this despite the inspired forward passing of Lincoln Fogarty, Brown's crack back, the Beebe charging and tackling of the Rhode Island line, and a defense that at one time consisted of eleven substitutes.

PRINCETON, N. J., Oct. 20 (AP)—Princeton kept its goal line unbreached for the third successive Saturday while defeating Lehigh 47-0 this afternoon.

Lehigh made only one first down, while Princeton launched a well planned attack on the ground and through the air.

ANNAPOLIS, Md., Oct. 20 (AP)—The 1928 navy football team won its first game of the season today, after losing three in a row, to Duke university, the visitors from North Carolina completely outplayed the Midshipmen.

Although the "game" loudly refused to divulge their employer's size in his absence yesterday, they did mention the fact that he had been in the mercantile business here since 1904. The basket of chrysanthemums was an display in the game throughout the afternoon yesterday.

Raymond L. Cornwell for County School Superintendent

In announcing my candidacy for county school superintendent of Jackson county, to be voted on November 6, it is well to remind the voters that I came out in the May primaries and secured the nomination on the Democratic ticket.

Heretofore I have never been an office seeker nor an office holder. I have been on the voting lists and a taxpayer, and annually have looked ahead at the ever-increasing tax burden of the county offices.

I have made an effort the past few months to get acquainted with the voters of the rural districts, not only because I wanted their vote, but because I wanted to know the people who are served through the county school superintendent's office, and that if they did not want a change in administration I would be foolish to make any campaign whatsoever. On the other hand, if it was found they did want a change, then I would make every effort to give the people of the county an opportunity to at least meet me before election.

My trips meeting people in the rural districts have taken me to all parts of the county and I have personally talked to over five thousand (5,000) voters. This has given me a real command of the situation in regard to the county school superintendent's office. I know how the rural people feel; I know what they want; I feel I know how a large majority of them will vote. It is unnecessary for me to state the percentage of these 5,000 voters

who will support me. The polls, if I am selected by the people, I shall give my whole-hearted service to that office's demands.

I have spent the past 13 years in educational work, seven in teaching, three in Oregon colleges and universities, nearly two in Uncle Sam's home and overseas service, and two in business. I am 35 years of age.

Three years ago I was principal of the high school at Gold Hill, resigning to come to Medford schools, where I have been the principal of the Washington school for the past two years. I was re-elected for a position in the Medford schools for the present school year, but chose not to accept it. I might give my time to my position for county school superintendent.

The office of county school superintendent will offer me some advancement in my chosen work and a better position for my future advancement. In asking the people of this county for their consideration at the polls, it is with the greatest respect and confidence that I am making an appeal plan in this and other counties of the state where the office of county school superintendent is voted to men who are desirous of advancement, well prepared in schooling and experience, and who use the office as a stepping stone, however, at the same time giving the service to rural school problems. We ask for the same consideration now that has been given to others holding this office at different times in this county.

I have no political axe to grind nor political debts to pay. I will recognize no individual nor organization as being in any way interested in office. I shall aim to serve the voters, whose vote I am now seeking. I do not crave publicity nor opportunities to have my name on near in the newspapers. I seek honors that men from time to time bestow, save that acclamation on the part of citizens to give just to deserving men and women for well-deserved pieces of public work which they sponsored and initiated.

I have no criticism to make, nor have I made any during the present campaign, of the present administration of the office of county school superintendent. This is a voter's prerogative and I shall leave it to them to make what criticisms they desire. However, it is not amiss for me to place for me to say that I think a great deal has been done in the past two terms toward putting Jackson county schools to the fore, and I will most certainly do my best to do a continuation of all of those things which have proved to be helpful and needed.

I am not a politician, in fact, know nothing about politics, but I am a school man. And when elected will give my time to improving the efficiency of teaching, to securing better methods for the boys and girls of the rural districts, and to handling the business affairs of the office in as efficient and economical a manner as possible, instead of seeking new legislation in school

matters which are advocated at variance with the wishes of a majority of the rural people. I believe that the rural communities offer the best place in the world to raise and rear a family. Just as modern conveniences have made living altogether desirable, so should the rural school offer to the boys and girls of the rural communities the opportunity to learn those things which we now deem essential and necessary to a complete living.

I will recognize that as county school superintendent I am merely a public servant and as such should seek the welfare and desires of the voters who placed me there and who delegated the necessary authority to handle the county school affairs.

Very sincerely,
RAYMOND L. CORNWELL.
