Communications

Statement by Mr. Pipes. To the Editor: I believe the election of Herbert Hoover means more to the great cause of idealism, and will go further toward establishing universal peace, than all the treaties in the world. This because he has administered food to the starving women and children of so many nations of the earth. I believe it will prove to be the beginning of the greatest period of industrial development in the history of America. In agriculture, it will mean orderly and efficient organization where chaos has held sway—the saving of our basic industry which will touch every home in our land. This because he knows how. As to my election to the office of mayor of Medford, I have only

to say that I feel deeply grateful to the electorate for their expression of confidence in my ability to handle the job, assisted by able councilmen who are, in my opinion, worthy representatives of your choice. In the administrative affairs of our city I shall be guided only by conscience and my judgment.
