Mrs. Shepherd reported concerning the available art exhibits that Medford could have during the winter and spring.

Mrs. John Crews called attention to the fact that 1928 was "Stuart Centenary." Gilbert Stuart being America's most important "old master" and having produced the best loved portrait of George Washington in existence today in Boston museum.

Stuart, it will be remembered, was the pupil, when in London, of

Benjamin West, the American artist who succeeded Joshua Reynolds as president of the Royal Academy.

It was after he returned, to America in 1785 that he obtained Washington for a sitter and executed two commissions, one for each of the twin capitals, one to be hung in the state house of Providence and one in New York.

After this for the next 40 years, Stuart was rarely without an order for a portrait of the "Father of His Country." In fact, he called the Washington commission his "4000 job" and executed these in his leisure time.

The Boston museum is having an exhibition of Stuart's paintings this year, showing about 200 examples. Private collectors have paid prices for his work that have equalled the prices paid for the old English masters and copies of these are being lent for the centenary exhibition.

She depicted the advance Masaccio made in the technique of painting, the spiritual quality of Fra Angelico's work and showed how Lindl's life influenced his art.

She spoke of the influence of the Medici family, and the use of their great wealth in the development and encouragement of Florentine culture. She showed examples of their masterpieces (copies), and pointed out points of interest in each.

Mr. Louis Humphreys, Medford's leading architect, spoke on "Art in Architecture," and it was very clear to his discerning and appreciative audience that Mr. Humphreys thoroughly knows his subject.

He has the vision and can point the way to the beautiful as well as practical in construction.

As he spoke, in an easy comprehensive manner, he illustrated his ideas by means of free hand drawings, showing location, perspective, etc. He also pointed out the advantage of using metal and glass and predicted that future buildings would be largely made up of these materials.

REV. HENRY FUNK SANTA CLAUS WILL BE PASTOR CARRIES BAG OF PRUNES TO MAMA

The Rev. Henry C. Funk, P. L. D., who assumes charge of Zion Lutheran church, December 1, comes to Medford with an enviable record.

In Shelby, Ohio, an old obstinate debt was cancelled in a few months after his arrival due to his clear sighted aggressiveness; a parsonage was built and paid for; a fine pipe organ installed; the congregation grew rapidly in membership and attendance of services, with a deepening of interest and spiritual life.

Coming to California to assume a charge of the work in Sacramento and under his leadership the congregation prospered beyond all expectations. While in that city he was prominent in his general religious activities, and was elected head of the Ministerial Union.

In Glendale, from which work he comes to Medford, he took a discouraged group, ready to abandon the work, and erected a 450,000 structure, built up the congregation and greatly developed the young people's work.

Dr. Funk is a positive preacher, a man of conviction, his delivery forceful and convincing and his sermons on civic questions have resulted in much good along practical lines.

He might have been Santa Claus in disguise. He wouldn't say. Anyway, he had a flowing white beard, a face as brown as a berry, and lively brown eyes that seemed to be set in perpetual motion.

Folks around the Southern Pacific station guessed his age to be anywhere from 79 to 85, and ended up their round of conjecture by saying, "Still, I don't know—he might be any age."

So he took on the aspect of a mystery man, and his audience grew as he heeded a huge sack of dried prunes on his back, holed a box of foodstuffs under his left arm and proceeded with them down the track. Here he deposited them opposite the train platform and went back into the station for the rest of his supplies. A reporter ventured up to him and put a number of questions, most of which brought only echoes. "What is your name?" The brown eyes laughed and a pointed forefinger rested for a second over the bearded mouth.

"Where are you going?" The brown eyes grew darker with mystery and the mouth parted for a second before uttering a sound. "Them."

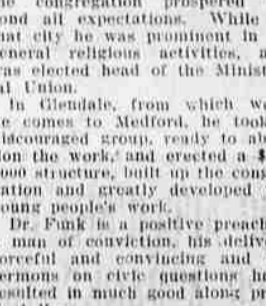

"Where I'm going will not interest you. But they'll be the happiest people in the world when I arrive."

"Who do you mean by they?" No answer—the mystery man twisted a rope around another sack of foodstuffs and started out the door. Two reporters pursued him down the track. He deposited this armload of food supplies upon the train platform.

Returning to the former load, he almost bumped into his interrogator. His eyes flashed and he waved his arms forcefully through the air as though clearing the way. Then he jumped up and elicited his heels together in the air.

"Is it your wife that you're going to?" he was asked.

"No—mamma," he said in a slow, sad voice. And then his audience DID wonder what he meant.

Rev. Henry C. Funk, Ph. D.

JACKSON COUNTY HEALTH CLINIC

The outstanding thing in the health work of the county at the present time is the development and work of the clinics—the main object of which is the promotion of health in children. It includes advice to parents regarding health habits, proper feeding and problems incidental to the life of the child from birth to school age. Periodical medical examination is given to prevent illness. Infant feeding problems are given special attention.

A history of the children is kept on record that the examining doctor may have a background on which to pass his conclusions in each particular case, and for subsequent examinations in this growth and development. For instance: Certain defects are traced to causes such as scarlet fever, whooping cough, diphtheria, etc., and it is necessary for the physician to know what diseases if any the child has had in its life. Height and weight of the child is kept. Examination is made and records kept of eyes, ears, nose, throat, heart, lungs, skin and general formation.

The clinic is primarily for the child not having the benefit of the supervision of a regular physician but all children are referred, where medical care is indicated, to the private physician.

The clinic service is free in every respect.

The holding of the clinics has become a fixed and regular routine and the health unit has ambitions to increase them to include outlying districts. Mothers have shown surprising interest in the baby clinics and the dental clinics have more than they can handle.

Sidelights of the Clinics

Dr. Mulholland, to small child at dental clinic: "Well my child, have you ever been to a dentist before?"

Small Child: "No sir, cause my mother said she would lotta rather have me wait for you than go to a real dentist."

Dr. Mulholland, examining a set of very poorly cared for teeth: "So you want your teeth cleaned, my boy? How often do you brush them yourself?"

Small boy: "Twice a day sir."

Dr. Mulholland: "Twice a day, eh! And have you a good tooth brush to do the job?"

Small boy: "No sir, I never did have any tooth brush, and I quit when school closed in June, anyhow."

PORTLAND, Nov. 24.—(P)—College of Idaho won from Lakeland college here today 12 to 6. The Idaho team scored touchdowns in the third and fourth periods.
