Sugarless cereal means a fight
A little sweetening does away with an awful lot of trouble

CHILDREN'S meals should not be something to be dreaded. One of the most important of all dieting problems is to get children to eat enough bone-building, health-promoting foods. Ranking among the highest of foods for children are cereals, and yet, as an eminent food authority recently stated it, "Sugarless cereal means a fight."

He went on to advise mothers to make these necessary foods welcome and even looked forward to by the children through intelligent and judicious sweetening. Sugar in itself is the most perfect fuel to furnish energy for active children, and best of all it makes other necessary foods so easily and gladly eaten.

Children should not dread their meals. The wise mother or nurse, by an intelligent use of sugar, can enable children to enjoy all kinds of healthful cereals, fruits, vegetables and milk. Properly sweetened cereals also encourage the child to eat more milk. Sugar is Nature's ideal flavor. The Sugar Institute.
