DECEMBER BANK DEPOSITS GAIN

Showing an increase of approximately \$5,000 over the total compiled December 5 deposits of the four Medford banks yesterday had a combined total of \$6,915,445.96, according to quarterly statements made public by the banks. This amount brings Medford to a higher place in the state banking totals and reflects the prosperity with which this section was endowed during 1928 and which is confidently expected to continue and improve during 1929.

While deposits of banks are a barometer to a city's financial condition, bank clearings reflect business conditions much better. Unfortunately no figures have been available on daily clearings. However, one bank official recently declared they have been showing remarkable growth in Medford during the busy season rivaling any city in Oregon of similar size.
