Danger of Cancer.
Rickard's Last Show.
N. Y. to Boston, Eighty Minutes.
\$87,500,000 Plum.

Various devices for creating "artificial sunlight," applying ultra-violet and infra-red rays, artificially made, to the human body are valuable IF PROPERLY USED.

In the hands of amateurs, using them on children, with lack of knowledge as to the proper time of "exposure," they may be most dangerous. The Academy of Medicine warns you that such unwise use of these "rays," irritating the tissues, may cause cancer.

In a bronze coffin that cost \$5,000 "Tex" Rickard lay in Madison Square Garden. Those that paid to see men fight there entered the garden for nothing to look upon one that had just lost a fight that no man wins.

Many that devote little time to thinking may have thought hard for several minutes, looking upon the great fight promoter, remembering that there is one fight which every man must lose.

Whatever makes men think is useful. Mr. Rickard lying in state in his great "sports arena" was as useful as he ever was in his life.

An air mail pilot on Monday flew from New York to Boston in 80 minutes, 212 miles. How that would amaze conservative Bostonians of earlier years and delight Benjamin Franklin, who spent many days going from Boston to Philadelphia.

From Miami, yesterday morning, Postmaster General New started a new air mail line to Cuba, Porto Rico and on south. Gradually all of South America will be connected with all of this country by United States air mail.

If you have an opportunity to buy a good bank stock BUY it.

Stockholders in the National City Bank, of which C. E. Mitchell is president, divided Tuesday what Wall Street called "plum," amounting to \$87,500,000.

Buy something good in the United States and KEEP IT.

Canadian officials, traveling in flying machines where missionaries once paddled in canoes, are on their way to purchase the last remaining Indian lands in Ontario.

For \$8 cash, \$4 a year, forever, each, 1500 to 2000 Indians will sign away 128,320 square miles of land.

No imagination can estimate the wealth that these Indians will relinquish, the unknown treasures underground, gold, silver, copper, oil and, above all, the value of so many fertile square miles of the earth's surface.

The rooster in the fable finding a diamond, wished he had found a grain of corn. What you can't use is worthless. The Indians could not use their land. They can use \$4 a year to do it.

Sometimes farmers succeed, but usually they must leave the farm to do it. Benjamin N. Duke, who died Tuesday morning in his fifth avenue house in New York, began as a farmer, working with his brother, James Duke, on their father's farm. They grew tobacco, started a small factory, introduced cigarette machinery, and made hundreds of millions. And farmers note this, they missed the middle man instead of being bossed by him.

NON-STOP GLOBE TRIP IS PLANNED

Goebel Announces Intention to Fly Around Earth in August Or September—Frenchmen May Make It a Race—Question Mark Flight Suggested Attempt

WICHITA, Kan., Jan. 10.—(AP)—The most daring project of aviation—an attempted non-stop flight around the world—which heretofore had been regarded as beyond the realm of possibility, today appeared nearer realization within the present year.

Furthermore, announcements of projected flights, made here and in Paris yesterday, suggested the possibility of a race to realize that dream of air endurance and distance. Both flights would be refueling ventures and were suggested by the sustained flight of 150 hours made by the American army monoplane Question Mark in California.

From a sick bed here, where he is recovering from severe illness and operation, Colonel Arthur C. Goebel, noted distance and speed pilot, announced that he intended to be the first to take the air in an effort to girdle the globe without a stop. He tentatively set August or September for the flight, which he said would be west to east from Wichita to Wichita.

Almost simultaneously it was revealed in Paris that the latest project of the Pottier aviation firm was a non-stop flight in the same direction from Paris to Paris, possibly in June, when it was believed the best weather would be encountered.

Both projects call for refueling planes at intervals along the 21,000-mile route.

Backing Required
Colonel Goebel, an outstanding pilot who won the Dole air race to Hawaii in 1927, and who holds the non-stop transcontinental flight record, said such a flight would require a great deal of financial backing and a real airplane.

Frank Phillips, the Earlville, Okla., oil man, who backed Goebel's "Woolarc" in the Dole flight, was suggested as one of the possible backers of the flight, while several Wichita business men already have indicated they would assist in making the flight possible.

Goebel's crew would consist of two pilots and two radio operators. His tentative plans are for a specially built plane, equipped with a powerful set.

Colonel Goebel said he would go to Washington as soon as he is able to investigate the best route of travel on such a flight and the time of year best suited to the venture.

It is estimated that the Question Mark in its epochal flight which ended Monday afternoon flew a distance of 11,500 miles.

Speed and distance were no issue of the flight, which had nearly 100,000 miles, but army observers predicted that success of refueling the plane and the remarkable demonstration of endurance of men and motors had brought closer the day of non-stop flights around the world.

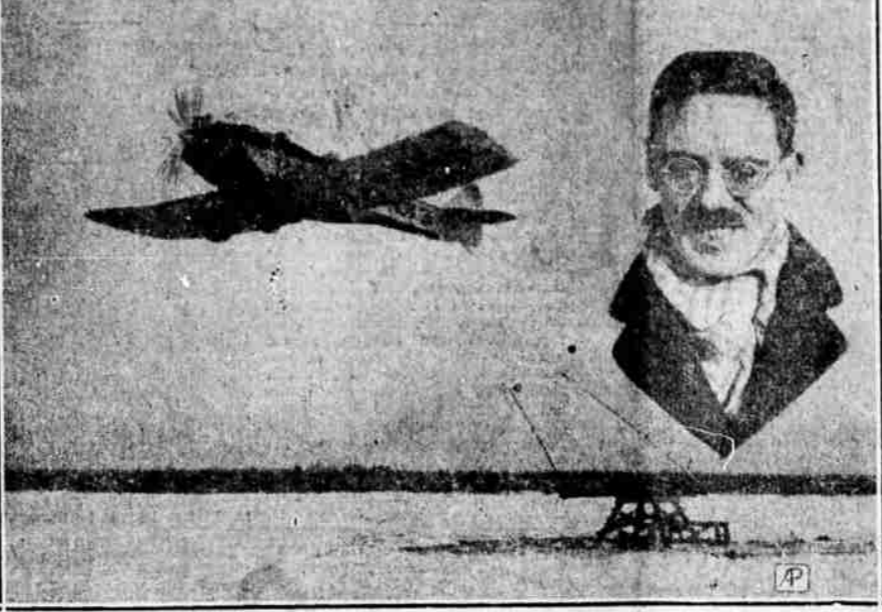

'DOPE' TEACHER DRAWS 5 YEARS FEDERAL PRISON

PORTLAND, Jan. 10.—(AP) Fred Goldberg, arrested as an "instructive" in a school in which young girls were persuaded to become users of narcotics, was sentenced to a five-year term in McNeil federal prison when he entered a plea of guilty in federal court here today.

Goldberg, an admitted addict, had been convicted of narcotics violations on several previous occasions, and had served one sentence of three years at McNeil and another of two years in the county jail.

The narcotic "school" was uncovered here on Nov. 23, last, when federal and local officers found two girls of 18 years in Goldberg's company. Goldberg was quoted as confessing he planned to provide additional customers for his smuggled narcotics by this means, and in that way to guarantee a supply for himself and to provide revenue from the contraband.

BARLING MONOPLANE PICKS UP FUEL IN FLIGHT

On its endurance flight at Marshfield, Mo., the fast-rising monoplane built by Walter Barling (inset) picks up a four-gallon drum of gasoline from the ground. This is enough fuel for about an hour's cruising. The photograph above was snapped as the hook, suspended by cable, from the plane made contact with the looped rope attached to the fuel container.

GIANT GUSHERS SALVATIONISTS SANTA FE DIST. SPOUT FLAMES BOOTH RETIRE

Outlaw Wells Catch Fire After Belching Up Sea of Mud—\$1,000,000 Damage Done—Other Dericks Threatened.

WHITTIER, Cal., Jan. 10.—(AP)—While pillars of flames from two gigantic oil gushers in the Santa Fe Springs field were shooting 180 feet in the air early today, cement was being forced down adjacent oil wells in an effort to prevent the fire, which already has caused damage estimated at \$1,000,000, from spreading to thickly studded neighboring dericks.

The whole district was lit up by the fires and the roar and vibrations from the two burning wells shook buildings for a mile around. The Los Angeles fire department, called to the scene, sprayed water on the main pumping station of the General Petroleum Oil company, several hundred feet away, and on cottages of employees, to prevent the spread of the fire.

A sea of green mud, belched up by the two outlaw wells from the 3500-foot level, has made streets surrounding the conflagration for a distance of nearly half a mile in all directions, veritable canals of travel on such a flight and the time of year best suited to the venture.

Speed and distance were no issue of the flight, which had nearly 100,000 miles, but army observers predicted that success of refueling the plane and the remarkable demonstration of endurance of men and motors had brought closer the day of non-stop flights around the world.

AMBUSH BY POLICEMEN FOILS PLOT

Newspapermen and Photographers Witness Attempt to Slay Wealthy Manufacturer—Gunman Is Killed, Two Others Captured—Wife Held.

DETROIT, Mich., Jan. 10.—(AP)—Denying any knowledge of a plan to slay her estranged husband before he could divorce her, Mrs. Grace M. Wood, 38, charged today that the husband, Ralph A. Wood, wealthy builder and contractor, was trying to "frame" her. Wood's death was said to have been the object of a surprise attack by gunmen at his office in Wyandotte, a suburb, last night.

DETROIT, Mich., Jan. 10.—(AP)—A crime that cameras captured was committed in suburban Wyandotte last night when a gunman was slain and an officer critically wounded during a spectacular but unsuccessful attempt to assassinate Ralph A. Wood, head of the Wood Construction company.

Newspapermen and photographers, informed with police that an attempt was to be made upon Wood's life, were hidden with officers about the construction company's chief office when the attempted assault took place. They saw a man advance upon Wood with a sprained blackleg, and they saw Wood and one of the officers fire almost simultaneously, dropping the attacker.

Less than an hour later Wood's estranged wife, 48 years old, was arrested. She was found in bed at her home and was taken to the city detention hospital. Officers sought to question her concerning the story of one of the plotters that she had instigated the attempt upon her husband's life so that she might inherit his estate, said to be large, and become beneficiary of a \$100,000 life insurance policy.

Early today Taylor, Phipps and William Thompson, each 22 years old, were arrested as the two who escaped during the gun battle between police and the Wood assailant. Shortly afterward their automobile was found, marked with many bullet holes. They said the dead man was Ambrose Haggerty.

Plot Revealed
It was learned of the plot through Cecil Holt, one of the conspirators, who told his chief of police of Riverview, a Detroit suburb, that Mrs. Wood had paid a premium on his \$125,000 insurance policy in return for his promise to assist in the plot.

MOSES SEEKS EARLY VOTE ON KELLOGG PACT

WASHINGTON, Jan. 10.—(AP)—An understanding for an early vote on the Kellogg anti-war treaty was asked in the senate today by Senator Moses, Republican, New Hampshire, who has led the fight for an interpretative resolution to accompany ratification of the pact.

The move for settlement of the difference of opinion among senators heretofore, headed in off-the-floor conferences, was brushed openly in the senate when debate on the pact began to lag. Chairman Borah, of the foreign relations committee, who is sponsoring the treaty, replied that he would be glad to consider the suggestion of Moses for an agreement.

Middleweights Fight Event in 99 Rounds

LAKE WALES, Fla., Jan. 10.—(AP)—Ninety-nine rounds together in the ring and all even is the record of Billy Long, Philadelphia, and Al Trout, Cleveland, negro middleweights, after their 19-round draw here last night. They recently fought 19 rounds to a double knockout in Tampa.

The score now stands: Six draws, one knockout each and one decision each.

EXTRA SESSION CONSIDERED BY PARTY LEADERS

HOVER CONFERRING FOR DETERMINATION OF RELIEF CALL PROBLEM—CABINET RECOMMENDATIONS POUR IN—GRANGE COMMITTEE CALLS.

WASHINGTON, Jan. 10.—(AP)—President-Elect Hoover continued today his crowded schedule of conferences with political leaders with a view to determining, if possible before his departure for Florida next week, whether and when he would be obliged to call a special session of congress to consider farm legislation.

Recommendations for cabinet appointments continued to pour in on Mr. Hoover from his callers, who included Senator Gillett of Massachusetts, and Senator Phipps of Colorado.

With C. Hascam Slomp, a former Republican representative from Virginia, Mr. Hoover discussed means of consolidating in that state the advantages gained by his party in the election. Mr. Slomp told the president-elect that with Virginia's swing to the Republican column last November, the chances were excellent for the election of a Republican governor this year.

After the conference, Mr. Slomp said that he himself was not seeking any presidential appointment.

Senator Phipps said he had reviewed with the president-elect the legislative outlook in congress with special reference to the likelihood of a special session, and Senator Gillett, who intimated that appointments had been discussed with Mr. Hoover, declined to go into details.

Engineers Recommend
G. W. Laughlin, national legislative representative of the National Brotherhood of Locomotive Engineers, submitted to Mr. Hoover the brotherhood's selection for appointment as secretary of labor in the next administration. Laughlin said after his conference that he did not feel at liberty to disclose the name submitted.

It has been known for some time, however, that friends of W. N. Dock, vice president of the Brotherhood of Railway Trainmen and a leading representative of organized labor here, have been urging his name upon the Hoover advisers.

P. C. Davila, resident commissioner for Porto Rico, also called upon the president-elect and told of his enthusiasm in the island over his prospective visit. Mr. Hoover, he said, assured him that he will visit the West Indies if he has time to do so.

Grange Men Call
The executive committee of the National Grange called on Mr. Hoover and discussed with him features of their legislative program. The committee, composed of Louis J. Taber, national master, Leale R. Smith, secretary of Boston, Mass., Eugene Eckert, chairman of Mascoutah, Illinois, and Albert S. Goss, of Seattle, Wash., said after the conference that their organization still stood on its previous declaration that they would favor an extra session of congress if satisfactory and comprehensive measures for the relief of agriculture were not adopted at the present session.

Taber said that Mr. Hoover had always shown himself to be very sympathetic toward the rural problem and added that he was convinced that a satisfactory solution of the subject would be found within the next year.

S. G. SIMON NEW HEAD DAIRYMEN

Thirty-Sixth Convention of Oregon Dairymen Elects Tangent Man President—Berton Aldrich Vice-President, P. M. Brandt Secy.—Final Sessions Today.

At the final sessions this afternoon of the thirty-sixth annual convention of the Oregon Dairymen's association, S. G. Simon of Tangent, Ore., was named as president; Berton Aldrich of Redmond, vice-president, and P. M. Brandt of Corvallis, secretary and treasurer. Marshfield was named as the convention city for next year, with the understanding that an eastern Oregon city would be named the following year.

The convention followed out the recommendation of the nominating committee, and there was no contest for any of the offices.

Sumey Miller of Woodburn, Ore., was the main speaker at the closing meeting and told of his methods in building a dairy herd. He held that the only practical way for an ordinary dairyman was to begin with a good herd sire and that money placed in a proven sire was a good investment. Modern methods of testing, the speaker said, made it easier for the dairyman in the selection of sires.

Alton Kay of Hines, told of factors that had aided him in dairymen.

The convention came to a close this afternoon with a short business session.

According to County Agent Fowler, from the standpoint of interest and attendance, the convention was the best in many years. Delegates to the convention started to leave for their homes this evening.

Thursday Morning Session
In the absence of W. Morrow of Independence, Professor Linnard of Corvallis described the measures taken in controlling an outbreak of abortion of the prevalent type, on Mr. Morrow's farm.

By following instruction from the experiment station, in 18 months the herd was again in profitable production.

County Agent R. G. Fowler described control work to date in Jackson county. Although the work is new, co-operation was declared to be pleasing. The present effort to establish abortion free areas, of which two, Evans Creek and Valley View, are not only the first in Oregon, but also in the United States. The disease is to be feared more than bovine tuberculosis.

Control Told
N. C. Jamison, of Corvallis, described how disease control stations can aid the farmers of Jackson county, and said the college will be glad to help.

Jackson County List
J. R. McCracken, R. A. Clark, John Nansen, H. A. Klingler, E. H. Pendleton, Oscar Shephard, E. Reed Carter, M. Heckenburger, Theodor Rein, Carl Esch, George H. Stowell, G. E. Halloway, C. C. Arnold, J. M. Arnold, J. M. Taylor, E. B. Poyer, Paul Martin, O. E. Simmen, A. T. Lathrop, Mrs. A. T. Lathrop, G. W. Stevens, James Wiley, H. G. Diers, W. G. Mische, L. H. Gallatin, N. B. Newcomb, B. P. Van Dyke, Mrs. B. P. Van Dyke, Mrs. A. S. Kleinhammer, D. Perzel, Joseph H. Bander, S. A. Kroschel, Wm. Bonert, W. W. Robinson, H. W.

(Continued on Page Six)

Will Rogers Says:
NEW YORK, Jan. 10.—The big automobile show is on here in New York this week and the only change in a whole (two billion dollar industry) is they have all stolen the same low flat rubber cap. If I was then I would advertise "My car stands well in traffic." There is millions of them standing to where there is not one moving. One-half the world has no excuse for not knowing what the other half is doing nowadays. They are sitting in a taxicab waiting for a green light, the most looked forward to thing in the world today.

Yours,
WILL ROGERS.

GIANT GUSHERS SALVATIONISTS SANTA FE DIST. SPOUT FLAMES BOOTH RETIRE

WHITTIER, Cal., Jan. 10.—(AP)—While pillars of flames from two gigantic oil gushers in the Santa Fe Springs field were shooting 180 feet in the air early today, cement was being forced down adjacent oil wells in an effort to prevent the fire, which already has caused damage estimated at \$1,000,000, from spreading to thickly studded neighboring dericks.

NORTHCOTT IS MALINGERING SAY EXPERTS

COURTROOM, Riverside, Cal., Jan. 10.—(AP)—Gordon Stewart Northcott is sane and is malingering or feigning a form of insanity, in the opinion of a special commission of alienists, expressed today according to a written report to Superior Judge George R. Freeman.

Northcott's trial for the murder of Walter Collins today was continued to February 7 by Superior Judge O. K. Morton.

The alienist, Dr. G. M. Webster of Patton, Cal., and Dr. W. B. Wells, chief of the Riverside county health staff, were appointed by Judge Freeman, at the request of defense counsel, to examine the 22-year-old Canadian accused slayer of three young boys.

"Our opinion is that the defendant, Northcott, is sane and mentally responsible for his acts at the present time," the alienist report said. "It would seem," the report continued, "to the observers that said Northcott is assuming a studied attitude of disinterestedness and a denial of responsibility and that this attitude is assumed by him with the idea of procuring an imprisonment that he is not responsible for the crimes of which he is accused."

"Further, it is our opinion that he at the present time, fully realizes the difference between right and wrong and he is wholly responsible for all of his conduct."

"The attitude of egotism which he displays impresses us as a cloak."

"We have reached the conclusion that the defendant is malingering or feigning a form of insanity in order to prove himself incompetent and irresponsible."

Portland Motorists Have until Saturday to obtain their 1929 license plates. Arrests will be made Monday of all those whose cars are not equipped with the new plates, Captain Ervin said.

NEW YORK, Jan. 10.—(AP)—Jack Dempsey has not decided yet whether he will fight again, as he had agreed to do for Tex Rickard, he announced today. His plans for riding the promotion of the Spritling-Sharkey fight at Miami Beach, February 27, also are unsettled as a result of a possible shift in this event.

AMBUSHERS POLICEMEN FOILS PLOT

DETROIT, Mich., Jan. 10.—(AP)—Denying any knowledge of a plan to slay her estranged husband before he could divorce her, Mrs. Grace M. Wood, 38, charged today that the husband, Ralph A. Wood, wealthy builder and contractor, was trying to "frame" her. Wood's death was said to have been the object of a surprise attack by gunmen at his office in Wyandotte, a suburb, last night.
