

FRIDAY'S PAPER TO BEGIN FEATURE OF BOOK REVIEWS

Tomorrow five reviews of late books, by local residents, will appear in the Mail Tribune. This will begin a regular Friday afternoon feature each week. The comments on the books being made by different local people.

This feature will be presented by the Mail Tribune, with the assistance of Miss Fay Woodsey, county librarian, who has made a list of the best late books, and will cooperate with those who are to review the books.

The fields of fiction, drama, biography, history and the social sciences will be covered in the reviews, and the reviewers may make their own choice of books they wish to read.

A list of the books to be reviewed the following week will be run on the Book Review page.

MILLION DOLLAR POWER PLANT

Anheuser-Busch, Inc., has authorized an expenditure of one million dollars for a new power plant to be erected at its main works, St. Louis, Mo., says Adolbert Von Gonsard, chief engineer.

The new machinery installation will have three 1160-horsepower Springfield boilers and two Allis-Chalmers 3750 K. V. A. turbo-generators. The turbines are so designed that all steam which has passed through them to generate power is subsequently used for manufacturing purposes, so that complete use is made of every pound of steam. The new boilers will be fired with powdered coal, a type of fuel that is blown under high pressure into the combustion chamber under the boilers—a method that utilizes every ounce of heat value in the coal. The capacity of two boilers will meet the company's maximum requirements of about 200,000 pounds of steam per hour.

According to Mr. Von Gonsard, the new power plant will cut the company's steam cost in half and the cost of generating power through use of the new turbo-generators will be approximately 20 per cent of the present power generating cost. An annual saving of 110,000 in boiler and power plant labor alone will be effected.

The plant will be completed in the early part of 1930, and is being erected under the direct supervision of Mr. Von Gonsard, chief engineer.

STOP THE FAT AND GET THIN

The way to reduction is to stop the formation of fat. Modern science has found that way—by turning your food into fuel and energy—by supplying a natural element that helps do that. It is much better than starvation. That modern scientific method is embodied in Marmola prescription tablets. People have used them for 20 years—millions of boxes of them. Now the results in slender figures, new beauty and vitality, are seen everywhere.

Each box of Marmola contains the formula, also the scientific reasons for results. So you know the effects are beneficial, and why they all occur. Learn what so many have learned in 20 years about it. Do it now. Ask your druggist for a \$1 box of Marmola and learn what it means to you.

Spring Brings FELTS and BENGALINE

The dominating note in the millinery mode for spring will center around Bengaline. Chic new models fashioned of this popular material are displayed for your selection in a wide range of colors and trims.

ROSE PRUNING METHOD RECOMMENDED BY OSC LANDSCAPE GARDENER

Rose pruning in Oregon may best be done toward the end of March or early in April, says A. L. Peck, landscape gardener at the state college. March is the best month for dwarf hybrid tea roses, while dwarf standard "bush" are best left until April. In eastern Oregon all danger from frost is over. Climbing varieties are usually pruned in March, but require strict attention after the following season is over, at which time the old wood is trimmed out to afford better opportunity for growth.

All dead or diseased wood is cut off close to the living branches of the tree. Stronger growing shoots are pruned less severely than weak ones, and no cross branches are tolerated. The practice is to prune to a bud pointing outward, so as to give the center of the plant air and sunshine. Climbing varieties of tea require very little pruning, being merely thinned out.

Standard or common roses are our most common grafted forms. These roses require careful thinning; the tips of long shoots are shortened back very sparingly, for, if cut in close, soft wood and no flowers will be the result. Worn out, or superfluous, shoots are better removed. Perpetuals are allowed to develop a tree, spreading habit of growth.

Provenca and moss roses are best pruned in March by removing old wood. One may remove all but eight or ten of the best growths. Young basal shoots may be shortened back to five or six buds, the same treatment being given to laterals of two-year-old wood.

The Rose Rugosa rose is a native of Japan and possesses large flowers freely produced in terminal clusters and a stem covered with thorns. In February the long base suckers may be shortened back to five and one-half or four feet, while others may be shortened at various lengths or cut out entirely. Heavy pruning causes a late bloom.

Calyantra or Pompon roses comprise a class well adapted for growing in pots. These roses are usually thinned in April, thinning out rather than pruning back. If basal growth is desired, the individual branches may be cut back. Climbing roses require little pruning, but need considerable thinning. Long sucker growth is given every encouragement to continue, as flowers come on this new wood the following season.

"Home Towners" Hunt's Craterian

George M. Coban's story, "The Home Towners," is now at Hunt's Craterian in the talking version. All the breeziness and zest, the witty dialogue, the deft turn of expression and situation, has been preserved.

The cast is all stars of the speaking stage, and the story is that of two middle-aged cronies who come together after years of separation. McWade married and settled down in the home town; Richard Bennett invaded the Big Town, made a much money, and invited his old-time friend to come to the city to act as his best man.

McWade got the hunch that his friend is being deceived by the young lady. In the city he berates his pal and a quarrel ensues; he faces the girl and her family and accuses them of being all that is not considered right; she utters a general squabble and the girl breaks the engagement; his wife thinks he has gone mad and his friend is at his wife's end.

"The Home Towners" is a perfect play, perfectly played.

KLAMATH FALLS MAN TO BUILD POOL HALL AND CAFE IN TALENT

By Mary O. Carey.
MEDFORD PRECINCT, Jan. 24.—(Special)—Will High of Talent was down to Phoenix Monday morning to consult Dr. Malintra. Mrs. High is gradually getting weaker and has almost entirely lost her speech.

Ed Hamlin received a big load of posts Monday forenoon, which he will put into the new fence, which he is going to build around his tract of land.

Mr. Y received his big order of seeds for his hot-beds and garden at the first of this week. He is counting on another one home garden this season.

Mrs. W. J. Fish is suffering this week with an attack of flu and was near the point of pneumonia.

Mr. and Mrs. Noah Chandler were Medford business visitors Sunday forenoon.

Mr. Parker from Klamath Falls is building a big house in Talent on a lot bought from Mr. Spitzer. There will be an eating room in connection with the pool-hall. Mr. and Mrs. Clarence Holmes and little daughter, Mrs. Katy Mason and her daughter, Miss Velma and T. E. Lamb, of Talent all went down to Riviera plantation on Rogue river, to the home of W. R. Lamb to be at a birthday celebration of W. R. Lamb, who was 64 years old last Sunday. All had a most enjoyable time.

Rev. Johnson, the new pastor of the Phoenix Presbyterian church, recently purchased a new Durant coach.

Miss Marie Iverson of Medford spent the week-end last week with Miss Louisa Standley at her home near Phoenix.

Mrs. C. E. Gardner was over from Golden Crest orchards east of Talent, doing trading in Talent Tuesday.

W. W. Robison of North Talent was in Talent Tuesday morning on business.

Mrs. T. J. Fish is disposed this week with a bad cold. Guests at the home of Miss Irene Standley last Sunday were Beredine Young, Icel Young, Marie Iverson and Maynard Putney.

Mrs. Sureman of East Eden who has been ill with flu is slowly improving.

Mr. and Mrs. J. W. Pruett and daughter, Marguerite, were guests at the pleasant home of Mr. and Mrs. M. L. Porter of Orchard Home, at a card party Monday evening.

Mrs. Donald Anderson, who has been a patient at the Sacred Heart hospital in Medford since the birth of their son, is improving very satisfactorily now.

Mr. and Mrs. George Parker of Phoenix were Medford business visitors last Tuesday.

Land buyers have been in the vicinity of Phoenix and North Talent this past week. The 10 acres on the Carey place, being still on the market, is attracting parties who wish to invest.

John Roberts of Phoenix recently sold 12 lots in the Railroad addition to Phoenix, and his residence on two of them, erected on one or more of them.

Last Saturday night a Ford sedan was abandoned near the bridge across Anderson creek and stood there until Sunday afternoon, when Officer Charles Talbot took charge of the car and towed it to Ashland.

MIDYEAR MEETING OF BAPTIST ASSN. HELD WEDNESDAY

(Contributed.)
Associational mid-year meeting of the Rogue River Baptist association was held at the First Baptist church in an all-day session yesterday. Theme, "The World Thirst of Northern Baptists." At the morning session Rev. Dunham, pastor of the First Baptist church, Ashland, spoke on "The Power Behind the Thirst," which was followed with an address on the "Magnitude of the Thirst" by Miss Ina Burton, promotional secretary of the board of missionary cooperation. At the afternoon session Rev. Dodson, pastor of the First Baptist church of Grants Pass, spoke on "Motive for the World Thirst." This was followed by a forum, "Increasing the Thirst," led by Miss Ina Burton and Dr. O. C. Wright, executive secretary of the Oregon state convention.

The afternoon session closed with a helpful and inspiring address by Dr. Tom Moody, missionary from Santa Rita, Bolshian Conga.

The evening session opened with congregational singing and a solo by A. O. Hess of Ashland. Devotional was led by Miss Burton, who told of a Lutheran cathedral in Copenhagen, Denmark, a beautiful piece of architecture with niches in the walls with mosaic figures of the Apostles and in the front of the church in a niche, a lifelike figure of Christ, works of art by the famous sculptor, Thorvaldsen, who when in moulding this figure of Christ must have felt in himself Christ's passion for souls. An atheist, Miss Burton said, upon going into the church to see the beautiful work of art, saw the figure of Jesus and said, "There's nothing to it." A little scrubwoman in the church replied, "But you must kneel down and look up into his face because his head is drooping." The man looked again and again said, "There's nothing to it." Said the little scrubwoman, "But you must kneel down and look up into his face." Kneeling down, and looking up into the face of Jesus and said, "There's nothing to it." "My Lord and my God."

The lesson that we would draw from this is that the church, that you and I as church members and professing Christians, need, as the atheist did, to kneel down and look up into the face of Jesus and cry out, "O, my Lord and my God."

The evening session closed with an address by Dr. Tom Moody on "The Christ in the Congregation." Dr. Moody told of the hardships of the early missionaries, saying that the end of David Livingston's explorations was the beginning of missionary enterprise. The speaker told of the progress of the work during the last 45 years and of the wonderful transformation that has taken place in the lives of the natives. Before the converts are admitted to membership by baptism they are put through a rigid examination; they are examined on change of heart, confession of faith and living, and the result is a completely changed life, both in exemplary living and the giving of their substance for the promotion of the kingdom of heaven, and the way those natives give of their money ought to make some of us home folks ashamed of ourselves.

Churches in the Congo are self-supporting to a great extent.

School Children Have \$40,000,000 in Savings Account

National Thrift Week, which is being observed this month throughout the United States, finds the total resources of school savings banks increased to a total of more than \$40,000,000. The number of depositors has reached 4,500,000.

J. R. Stout, originator of the school savings bank plan, tells of the origin and growth of his idea in the American Magazine.

"I started 11 years ago to inaugurate this work," he says. "It is now a profound national influence."

"Of course the money involved is not comparable in importance with the lessons in saving, self-control and knowledge of money that these 4,500,000 boys and girls are learning."

"The way for most of us to protect ourselves against debt in case of prolonged sickness, and against want in old age, the way for most of us to own houses and to have investments in stocks and bonds, is to save with these things in mind. The man who can save frees himself from one of the biggest causes of worry—lack of money when it is needed."

Coated Tongue Means Poisoned System

Your tongue tells your health! If tongue is coated in the morning and you have a bad taste in your mouth, it usually means your system is filling with poisons from waste matter retained in the body. This state of self-poisoning, or auto-intoxication, causes chronic constipation, sick headaches, sour stomach, and often high blood pressure and hardening arteries. You need to stimulate your liver so it can remove the poisons from the blood and clean the waste out of the colon. Pure ox gall is the best thing for the purpose. It is a natural liver stimulant, as any doctor will tell you.

A Great Store-Wide Sale

BEGINS FRIDAY

Morning 8:30 o'Clock at Sinclair's Dollar Store

HUNDREDS OF BARGAINS
