

**When the sun goes south for the winter eat canned fruits and vegetables, sweetened for enjoyment**

GLANCE at a chart of the United States showing all of the fruits and vegetables with the time when they come on the market, and you will be amazed at how many long months there are that are almost completely blank.

This of course means that during those months the sun goes south for the winter. It is the concern of every man, woman and child to see that health does not go south with the sun.

Viewed in this true light, the canning factories and sugar refineries of this country extend the season of fruits and vegetables into the winter. They place the health-giving fruits and vegetables, together with their acids, minerals and vitamins, in protecting cans, and place these in every grocery store throughout the United States where we can buy them with almost no difficulty at all, and the sugar refineries produce the sweetening to make these healthful foods delicious to the taste.

During the long months of winter every meal from breakfast to dinner may well contain some health-giving canned foods. Canned fruits, jams, jellies and preserves for breakfast, and canned fruits and vegetables for luncheon and dinner.

People are living longer than they used to. Isn't part of this probably due to the increasing use in the winter-time of canned foods? Eat enough of these healthful foods made enjoyable with sugar. A bit of sweet makes the meal complete. The Sugar Institute.

**POMONA GRANGE**

(Official)

The special meeting of the Pomona Grange held at Central Point last Tuesday evening was attended by a large delegation from all Jackson county Granges, about sixty members being present.

The call of the meeting was unfinished business. This consisted mostly of left over resolutions and the appointment of committees, also arranging a meeting place with the national lecturer, who visits Jackson county and southern Oregon on the 14th of February.

The executive committee, which had charge of these arrangements reported that they believed Medford to be the logical place to meet, they would be able to secure the high school auditorium for the evening session. No arrangements were made for a luncheon or supper meet, but they report the members of Medford as being willing to cooperate with the Grange in any way possible. The report was accepted and the same committee reappointed to make all necessary further arrangements. These arrangements will be made known to all as soon as possible. It is rarely that we will have an opportunity to have a national Grange officer visit us locally, so it is the desire to arrange these meetings so that the greatest possible number of Grangers may have the opportunity of attending.

A resolution asking the legislature to enact legislation making all high school tuition paid by the county uniform was acted upon favorably.

A resolution urging legislation to the effect that school directors of the third class districts be included among the public officials subject to recall. It would seem that legislation for recall of public officers does not cover this group, and so might, in certain events, work a hardship on the people of such districts.

Resolutions to extend our appreciation to Chas. D. Parker, manager of the co-operative exchange, of the type of radio program, free from insulting, offensive and incongruous advertising, sponsored by his organization.

Resolution that certain lands in Jackson county, valuable for forest management, water-shed protection and public recreational purposes be reserved and dedicated to public use, and he made a part of the Crater national forest in Oregon, subject to all the rules and regulations governing national forests.

Other resolutions, good, bad and indifferent, were presented and received considerable attention from some of our efficient debaters. All of these things interesting in that they give us new viewpoints and also show the great difference of opinion that exists among people of equal intelligence.

The committee on committees, appointed by the master to appoint standing committees reported as follows:

Committee on finance, H. E. Conger, Morse Haley, John Stewart.

Ways and means, H. W. Ward, E. E. Dimmick, John Neidemyer.

Legislation, Geo. Hilton, Claus Charley, J. R. Bowen, H. W. Sparks, Geo. McDonald.

Roads, John Anderson, Ed Robison, Oscar Shepard.

Marketing, chairman of each marketing committee of each of the eight subordinate Granges.

Resolutions, C. H. Davies, Mrs. Margaret Galligan, R. F. Nealon, Education, Mrs. A. T. Lathrop, Prof. Clarence Davies, Mrs. Lulu Thurston.

Membership, masters of each subordinate Grange. Eight members.

Reception, Mrs. Ada Bell, Alex Sparrow, H. W. Ward.

Radio, Floyd Charley, Mrs. Ethel Freeman, Mrs. Gertrude Hank, J. R. Bowen, E. R. Nealon, Mrs. Lela Shegard, with one to be appointed from Talent and one from Jacksonville Granges.

The master appointed Mrs. Gertrude Haak as publicity agent.

Central Point Grange pleased the Grangers by serving coffee and doughnuts.

The afternoon was spent with needlework and conversation. At the close the guests were ushered to the dining room where a two-course luncheon was served at a table beautiful with a centerpiece of pink rosebuds and fern, with tapers at either end. Very clever placecards were used for seating the guests. The color scheme of pink and white was carried out through the luncheon with a huge pink and white birthday cake, served with the last course. **KILL TUBERCULES IN MILK ELECTRICALLY**

RICHMOND, Va., Feb. 1.—(Sp.)—An electrical method of ridding milk of tuberculosis infection was described to the American Society of Bacteriologists here. Raw and pasteurized milk heavily infected with human and bovine tuberculosis was subjected to heating produced by pumping milk between two electrodes. This produced temperatures of 150, 155 and 160 degrees Fahrenheit. Tests on guinea pigs revealed no evidence of tuberculosis from milk of 155 degrees or higher, but from 150 degree milk some symptoms developed. The report was made by C. M. Carpenter, New York State Veterinary college, Cornell university.
