Editorial Correspondence

SAN DIEGO, March 4.—On the roof of the Park Manor apartments—our present domicile—with the sun streaming down from a cloudless sky, we listened this morning to the inaugural address of President Hoover, delivered in the rain.

There were about 40 guests, men and women, in the roof lounge, where the radio operator, and as the sound of applause came across those 3000 miles, several of the guests joined in, particularly the woman.

When we know something about just what the conditions are—where the truth lies—a sane and constructive way out of the mess can certainly be found.

After the address we were quite prepared for the remark of a lady from San Francisco, that the best of the government should be moved to California.

It is quite a distance from the member of Congress who worried the threat of Senator Reed of Missouri, to publish the list of names of Congressmen who are publicly dry, and privately wet, to the 13 Illinoisans who died, after first going blind, from drinking liquor.

ject our Presidents to such a critique as Washington has the first of March. Why, Mr. Hoover may have pneumonia, sitting out there bareheaded in the rain.

After the inaugural we motored down to Azusa Caliente, Tia Juana's famous "Monte Carlo." Agua Caliente (Am-wa-ka-ye-ente) means hot water, probably because there is every kind of liquid served there but hot water.

Here in a good family newspaper there are, of course, some reasonable restrictions upon what a man of my cloth may or should say in print. Except where such restrictions are based on a misunderstanding, I find it no embarrassment to abide by them.

Perhaps Monday is a dull day—Here's the mail plane—we must run!

It is no harm to burn incense in a bedroom at night? My daughter, who is 14, burns cones of it every night before she goes to sleep, while she reads.—Mrs. L. V. M.

Answer.—It is harmless. Burning Old Sol. About a month ago I listened to someone (I don't know whether it was a doctor or not) on the radio telling all about the evils of going without a hat and of exposing the body to sunlight.

Answer.—On the contrary, one cannot be too careful. The sun's rays are very powerful and can do a great deal of harm to the skin if not properly protected.

Personal Health Service

By WILLIAM BRADY, M. D. Signed letters pertaining to personal health and hygiene, not to disease diagnosis or treatment, will be answered by Dr. Brady if a stamped, self-addressed envelope is enclosed.

On the air they won't get a fellow touch on humidity at all. I tried to say something about steam-heating, and the censor warned me it was verboten.

source; stimulating in its glorious beauty; filled with millions of happy homes; blessed with comfort and opportunity.

So no country is more loved by its people. I have an abiding faith in their capacity, integrity and high purpose.

State men are men who amputate territory and leave the sore spots to posterity.

Happy thought for theatre men. When cattle wander away from rotten straw, clean fodder will lure them back.

A Minneapolis judge required a dealer to refund the purchase price of a cigarette lighter that wouldn't work.

Maybe prayers for rain fall because somebody else with a car newly washed is praying for a dry spell.

Bridge and courtship are the only games in which you can fall to make your bid and yet profit more than the one who beats you.

Crime will end when the criminal says to himself: "Everybody despises me." Instead of "They think I'm a tough guy."

oh was simple enough to give a dose to killers.

No nation can be kept down forever. The more Germany is made to suffer now, the bigger the bill she will present for payment in later years.

Correct this sentence: "In my time," said the mother, "girls didn't scheme to attract boys as they do now."

While the League of Nations talks of saving China by preventing opium shipments to that country you learn that China herself produces ten times as much opium as the rest of the world, not relying on outside supplies.

The heathen, in his blindness, bowing down to wood and stone, does not, however, spend as much for deadly drugs as our own enlightened country.

Germany, according to press observers, is passing through its most dangerous crisis since the war's end. Reactionaries, tired of the republic and longing for more Kaiserism, threaten a dictatorship preliminary to restoration of the Prussian monarchy and German imperial government.

To the outsider it would seem that one German Kaiser ought to be enough for this country.

Your Income Tax

No. 26. Bad debts may be deducted from gross income in determining net income and may be treated in one of two ways, either by deduction from gross income in respect to debts ascertained to be worthless in whole or in part, or a reasonable addition to a reserve for bad debts.

Bad debts may be deducted only if limited to taxpayers having a large number of accounts where credit has been ascertained to cover a considerable portion of time. It is not granted for the handling of one specific debt.

Unpaid loans made to relatives or friends with little or no expectation of their return are not deductible but are regarded as gifts. If a debt is forgiven it can not be claimed.

Echo street improvement project starts soon.

Men, no matter how poor, will always buy two things, whiskey and drugs. China's revolutionary and other generals, according to a dispatch from Peking, compel all land owners to plant a certain area for opium production and from the crops extract tons of millions a year.

Ye Smudge Pot

By Arthur Perry

Apologies and alibi for the legislature, as exclusively predicted in these parts ten days ago, are descending with the quality of a cloudburst upon the citizenry, and a survey of the situation shows that the nagging body is worse abused than the last Democratic administration.

They were charming in their tomfoolery, and delightful in their brazen impudence. They were as sweet as a June bride and a high school graduate, combined.

New General Motors Chairman Well Fitted for Gigantic Task by Technical Study, Experience

WILMINGTON, Del. (AP)—Lamont Du Pont, who succeeds his brother, Pierre, as chairman of the board of directors of General Motors Corporation, is a man of technical training and scientific outlook. He is 48 years old, 10 years Pierre's junior.

Lamont Du Pont

Mr. Du Pont is already familiar with the affairs of General Motors, having sat in its innermost councils as a member of the finance committee along with his brother, Pierre, other members of the Du Pont family, John J. Raskob, Fred J. Fisher, Junius S. Morgan, Jr., and George F. Baker, Jr.

The five-ton griffins that watched over the old citizens' board of trade have lost their jobs. There is no place for griffins at the new building.

Epigrams

By Hoover. Enriched Speech at Inaugural. WASHINGTON, March 5.—(AP)—President Hoover's inaugural address bristled with epigrammatic statements. Here are some of them.

"We are steadily building a new race—a new civilization great in its own attainments."

"Rigid and expeditious justice is the first safeguard of freedom, the basis of all ordered liberty, the vital force of progress."

"The duties of citizens to support the law is co-equal with the duty of their government to enforce the laws which exist."

ACID STOMACH RUINS APPETITE

This, pale people—the despondent sort who never have an appetite, and complain of headaches, indigestion, flatulency, biliousness, usually have too much acid in their stomach. And unless they displace it, any food they eat turns into sour bile and foul gases, which poison their system.

Pape's Diapiesin dissolves that poisonous acid, sweetens the stomach and digests your meals. Many thousands of people have brought back the appetite of their youth and gained weight simply by chewing one of the pleasant tablets of Pape's Diapiesin after meals.

It does what it promises. That's the reason 5 million packages are used a year—ask your nearest druggist for it.
