Follow ROADS TO ROMANCE ON YOUR OWN PACIFIC COAST

"I use Associated Ethyl" says H. D. INNIS, of Bend—"because it makes my motor run very smoothly"

This motorist of Bend, Oregon, states that regular gasolines he had used developed a carbon knock in the motor of his Chrysler "72." He has put 14,000 miles on his car and for the past year has used Associated Ethyl Gasoline.

"The motor is in excellent shape today," he jubilantly writes; "and I have never had any valve trouble whatsoever, and in fact I have never had any work done on the motor. I expect to use Associated Ethyl Gasoline as long as it is available."

Associated Ethyl Gasoline increases power by putting carbon to work. It gives stronger, smoother engine action, less shifting, quicker pick-up and knock-less performance. This super-fuel reduces operating costs and lengthens your motor's life.

Drive in at any red, green and cream station and fill up with Associated Ethyl Gasoline.

The fascinating story of Ramona and her Indian lover Alessandro, as told by Helen Hunt Jackson, is a colorful portrayal of life in the California of yesterday. Romantic bits of western history such as this are revealed in the Associated Oil Company radio program, "Roads to Romance."

Listen in each Wednesday evening, 8 to 8:30 p. m., on stations KPO-San Francisco; KGO-Oakland; KFI-Los Angeles; KGW-Portland; KOMO-Seattle; KHQ-Spokane.
