SEPULCHRE EFFIGY OF CHRIST'S TOMB BURNS

NAPLES, March 29.—(AP) Fire destroyed the sepulchre effigy representing Christ's tomb in the center of the Basilica of Santa Maria Nova today, just as the priests were preparing to celebrate Good Friday mass. The blaze appeared to have started either from candles or from a short circuit igniting the black draperies. The Franciscan fathers did everything possible to smother the flames. A fireman named Dimocia at the peril of his life rushed into the fire and rescued an urn containing the "presanctified" host destined for today's communion. The flames, once the fire was subdued proceeded with the mass at another altar.
