

WAY OF CROSS REPRODUCED IN GRASSINA ITALY

Devout Villagers Reproduce Age Old Procession - Figure of Christ Carried On Bier - Animals Receive Blessing.

GRASSINA, Italy, March 30. (P)

As the shadows of evening fell yesterday over this old town on the outskirts of Dante's own Florence, an age-old procession, typifying the principal scenes in the passion and death of Christ, wended its way through the narrow streets to the accompaniment of mournful music.

Under a black canopy, borne by a dozen men, appeared a figure of the dead Christ, carried shoulder high on a bier. Men dressed as Roman centurions, other townfolk, mourning matrons, boys singing dirges, and the village band with muted instruments, closed the procession.

After this melancholy parade of Genu Morto, the farmers of the region literally take their animals, oxen, horses and sheep to the church with them. They march solemnly up the central aisles of the various little chapels, where they and the beasts are solemnly blessed.

EXTENSION BULLETIN HAS DATA FOR DAIRY FARMING IN OREGON

OREGON STATE COLLEGE, Corvallis, March 29. (Special)

A dairy farm in Oregon deriving 80 per cent of its income from the herd, needs to have from 18 to 20 cows producing 250 to 260 pounds of butter fat, each to return a living of \$1500 a year to the owner in addition to that supplied by the farm itself.

These and other facts gleaned from a study of Oregon dairy farms are contained in a new extension bulletin entitled "Dairy Farm Incomes Required to Maintain Standard Farm Homes in Oregon," written by Ralph S. Besser, farm management specialist and N. C. Jamison, dairy specialist.

This bulletin is the first of a series on "Oregon Farm Incomes" according to announcement of Paul V. Maris, director of the extension service. As data becomes available and opportunity is afforded, other numbers will follow, each dealing separately with a distinctive type of farming such as poultry production, fruit raising, range livestock production and others.

The objects of this series, according to Director Maris, are to encourage a business point-of-view in farming, to illustrate a method which any one may apply with modifications to his own situation, and finally to establish standards for future development in Oregon agriculture.

Many farmers, the bulletin points out, are striving to succeed under circumstances which do not permit success. Seventeen thousand farmers in Oregon in 1925, or one-fourth the total, had a net equity of only \$2500 in their businesses, including both home and land. Even allowing liberal returns on both capital and labor, the incomes from these farms, must necessarily be small.

The first bulletin takes up the matters of adequate feed, effective use of by-products, capital and labor requirements, industrial and income. A gross income of at least \$5000 is needed to provide a living for living expenses for the family, it was found.
