**THE HOOVER METHOD**

**P**RESIDENT HOOVER'S decision to scrap the presidential yacht again emphasizes the fact that we have a new President in the White House.

This action may not be particularly important in itself, but it is important as an indication of the President's character and attitude of mind.

President Coolidge was not a sea-faring man, but the Mayflower was at the dock, former Presidents had used it, he undoubtedly felt a certain obligation in using it himself. At any rate, the thought of abandoning it entirely would never have occurred to him.

But to President Hoover precedents are something not to be followed automatically but to be tested. Here we have essentially the mind of the engineer as contrasted to the mind of the politician and office holder.

President Hoover has sailed the Seven Seas, and to him a trip on a private yacht or an ocean liner presents no novelty. He prefers trout fishing to cruising as a recreation, so why spend \$300,000 a year and keep 180 men out of naval service, simply because three Presidents before him had done so?

So he promptly ordered the elimination of the Mayflower. In the same spirit, and with a similar attitude of mind, Mrs. Hoover announced she would not have secret service men attend her. Why should she? She feels she is quite capable of taking care of herself, and this secret service attendance was a war measure anyway.

As we say, not actions so important in themselves, but of great importance as evidences of an entirely new type of man and woman—in the White House.

Whether the Hoover administration will be a success or failure only time can disclose. But in less than a month it is perfectly plain that it will not only be "different" but will be entirely the handiwork of two minds, which, in quality and viewpoint, are unique in the history of American politics.

**Personal Health Service**

By WILLIAM BRADY, M. D.

Signed letters pertaining to personal health and hygiene, not to disease diagnosis or treatment, will be replied to by Dr. Brady if a stamped, self-addressed envelope is enclosed. Letters should be brief and written in ink. Owing to the large number of letters received, only a few can be answered here. No reply can be made to queries not conforming to instructions. Address: Dr. William Brady, in care of this newspaper.

**A CHARTER MEMBER OR TWO.**

California lady writes:  
 As I count myself a charter member of the I & T club I feel that I may raise and make a few remarks.

I have just read the article referring to the Dumb Division. How can a medicine be so dense and not have enough initiative to try anything? I have used a (proprietary) "restorer" with a harmless looking name, but containing lead and sulphur, which dyes the hair black and I have felt no surprise has she told me she is 25 years old, and I was wanting something better; therefore I grasped with pleasure your formula of I & T and it is fine.

I do not find it necessary to use it more than once a week, with perhaps a little touch up if gray spots appear. I want to thank you heartily for the recipe. I find also that it helps to make it "set" the color to put in a little soap.

I am also an addict of your loatin ration, though I am not a medicine taker on general principles. I have never had a sickness of more than 24 hours since I was 5 years old, which is a pretty good record, as I am now past the three score and ten but don't tell any one. I never do.

I enjoy your articles, and when you get on one of your sarcastic streaks it is better than the "funnies."

The lady incloses a generous lock of her hair, and from the appearance of the sample I should have felt no surprise has she told me she is 25 years old. The hair is a well, I should call it a light brown color and it looks like natural color.

A New Jersey lady also rises to remark:  
 "I see quite a lot of talk about this copperas and black tea for dyeing gray hair. My hair is white in front, got some copperas and black tea and used it on my hair as a wash (warm) and behold not a gray hair in sight. I use it twice a week. I use a larger piece of copperas than you suggested—a piece the size of an olive, instead of a piece the size of a kernel of corn, in the pint of black tea, and apply it hot. I am employed where there are lots of young people and as yet no one has ever noticed my hair. They do say I dress it becomingly. I wish I could meet these people who complain about results and just let them see my hair. I use rubber gloves, as the copperas and tea stains the hands. I do so enjoy your health articles."

One of our correspondents writes: "I am sure, are from persons who really have nothing to worry about, if they would only let me have a chance to tell them. All questions and requests for information or advice are absolutely confidential so far as I am concerned. So why should any of my friends be 'Worried' or 'Anxious'?" I assure readers frankly that if I had news it is the only news I can send a correspondent. I invariably evade the unpleasant task in one way or another. Even when a doctor has a patient at his mercy it is dangerous business giving bad news. I have a poignant recollection of an instance of this to deter me. For 20 years, so it seemed, I had to meet face to face nearly every day a former patient whom I had once consigned unequivocally to a plot in Woodlawn—yes, and a couple other accomplices, really good doctors, concurred with me in this unqualified pronouncement of doom. Gosh, how that fellow's grin saddened my life! I learned my lesson. Yes, we have bad news NEVER AGAIN.

**The Salve for Toe Itch.**  
 Some time ago you printed a salve for toe itch which worked wonders both for the itch and skin peeling between the toes. Our feet were broken and part of the label with the formula is missing. Would you be kind enough to print the recipe again. It helped several members of our family so much—Mrs. M.

**Answer—Whitfield** (a London dermatologist—dermatologist is a physician or surgeon who devotes his practice to skin diseases, and it does not mean what the layman too often assumes in America) gave us the formula for his ointment. It is salicylic acid twenty (20) grains, benzoic acid (40) forty grains in the ounce of petrolatum. Apply this daily for several days, then discontinue until further need. In some cases it is well to reduce the strength of the salve about half at first, by mixing it well with an equal quantity of plain petrolatum. This salve is not only a good remedy for fungus or ringworm toe itch, but it is also an excellent application for the relief of excessive sweating of the feet. It should not be applied more than a few days in succession, however.

**Beware of Spray.**  
 I use spray gun for painting toys. Fan not large enough to take care of all the paint fumes. I am pretty healthy, but wonder if this is unhealthy work. The spray gun does not bother me as much as the dip tank. Please advise me whether to stay or leave. I get good pay—maybe that is why the pay is good—S. J. B.

**Answer—The spray is particularly hazardous.** It is criminal to expose any workman to such spray needlessly. Proper installation of exhaust or other mechanical ventilation or of sealed chambers for the work would obviate the risk. I should not advise any man to take such a job at any price. (Copyright John F. Dille Co.)

**Quill Points**

It is fitting that the secretary of the interior should come from the interior and the secretary of war from Chicago.

Rain is that wet stuff that comes down the day after you have the car washed.

The world praises a great critic, but it thinks of him much as it thinks of a parrot that can swear.

If you know his opinion of companionate marriage, you know whether he has any daughters.

No man ever had any luck making love to a woman who was conscious of looking her worst.

The Puritans had their little faults, but they ducked common scolds instead of calling them great critics.

One reason why a girl looks better in profile is because you can't see that the bloom of youth is higher on one cheek than on the other.

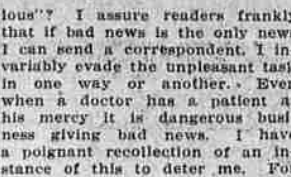

Nothing else so annoys a doctor as a patient who persists in having rheumatism after his teeth and tonsils are out.

Americanism: Pretending to hunger for culture and beauty; silently enduring billboards.

If she kisses a baby on the cheek, she is a young girl; if she kisses his mouth, she is an old maid; if she kisses the back of his neck, she is a mother.

When a comic strip character is in danger, it's a comfort to reflect that the artist can't afford to kill him off.

If the dealer drives it out to your house ten times, it is still a new car. When you drive it out one time, it is a used car.

You can't always tell the man who takes cold baths, but it isn't necessary. He'll tell it.

Yet these patent household conveniences never seem to keep a house as clean as old-fashioned elbow grease did.

The dumbest girl is one who wonders whether the widower with nine children really has serious intentions.

The more we see of cigarette testimonials, the more we wonder what vague quality it is that makes the great great.

Almost every youth goes through a period when he wonders how such dull parents contrived to produce such a bright child.

The world knows little about Anne, but it finds considerable enlightenment in the fact that she calls Lindy "Augustus."

Correct this sentence: "I was so interested in the picture," said she, "I didn't notice what any of the characters wore."

**Brisbane's Today**  
 (Continued from Page One.)

That interesting collection of farmers would probably tell the farmers first of all to organize their business, eliminate lost motion and time, including an hour and a half for their hired man to harness and unharness the team. But Rockefeller, Schwab and Young decline to advise. Morgan is in Europe. The farmers will have to work out their problem.

Big oil men of America agree to a definite plan for preventing waste and reckless competition. Sir Henri Deterding, manager and director of the Royal Dutch-Shell, a sort of British Standard Oil, promises 100 per cent co-operation, what it amounts to remains to be seen.

Europe also reports that United States steel plants will combine with European steel companies in a sort of international trust to regulate prices and other things.

Once, in the good old "muck-raking" days, this country swooned and then had fits about a poor little trust amounting to a billion

**Farm Notes**

When lawns are beginning to grow and there is more or less dead grass in the sod, it is best to cut the lawn early and thus encourage quick results from the new shoots, says the experiment station.

A good top dressing for grain or meadow grass is 75 pounds ammonium sulfate or 85 pounds sodium nitrate an acre, says the Oregon experiment station. The fertilizer is put on when the plants are dry or when it is actually raining so the fertilizer will not stick to the plants.

Ammonium sulfate is the fertilizer recommended by the Oregon experiment station for grass lawns. Grasses, especially bent grass, thrive on acid soils and dandelion and plantain, weeds which are troublesome in lawns, do not grow well on acid soils. Ammonium sulfate increases the acidity of the soil so that it checks weeds and furnishes nitrogen for the grass. Ammonium sulfate is best put on dry and washed into the ground with a hose. The rate of application is one-half pound for 100 square feet.

Carrots and beets cut into odd shapes, make effective decorations for soups and salads.

A syrup for griddle cakes and waffles may easily be made by adding caramelized sugar to a plain sugar and water syrup.

A pumpkin pie may be dressed up in different ways, one of which is to arrange mounds of whipped cream on top of the pie with lakes of honey in each mound, after the pie has been baked and cooled.

Soup fat is excellent for cooking and seasoning vegetables. After removing from the top of the soup, it is slowly rendered until all the fluid has evaporated and the fat is clear. Time may be saved by rendering the fat from two to three cookings of soup at once.

A kitchen bouquet usually consists of half a carrot, a leek, a few sprigs of parsley, a stalk of

celery, a sprig of thyme, two whole cloves and a bit of bay leaf. These are tied together in a cheesecloth. The bouquet is always removed before serving. The ingredients may be varied at will.

All measurements are figured as level in baking and cooking. To get a level spoonful, dip the spoon into the material, lift it slightly heaping and level by slicing the side of the knife across the top of the spoon. Do not level by pressing it.

**Ye Smudge Pot**

By Arthur Perry

Great gloe is being expressed by that portion of the population trying to undermine the Constitution, by the arrest of M. Albert Michaelson, congressman from Illinois, charged with transportation, possession, and importation of liquor. M. Albert Michaelson always voted dry, and he is near the head of the list of those who saved the nation by being firm for the Jones Bill. He seems to have been one of the Congressional hypocrites, that the late Senator Reed scared out of three years growth, by threatening to expose, but was too much of a gentleman and good fellow to do so. The allegations against the eminent gent, show that he is blessed with good judgment, as he imparted his liquor. The home output is tough on the abdominal organs, and no congressman should swing the same abomination as his constituents. Condemnation will be heaped on him—not for his hypocrisy—but for getting caught.

**MR. CLARA BOW**  
 (Oregon Emerald)  
 MR. SHUMAKER found a fur choker yesterday between Villard and the Sociology building. It is not very valuable. He has it.

Once upon a time, a new automobile was driven downtown and parked so it would not take up the parking space of three autos.

Generals in Mexico are thicker than colons during the 1919 boom, and 2nd loots during the World War.

There is no vegetation to speak of on the spring hots.

(Press Dispatch)  
 NEW YORK, March 29—George O. George, hair dressing authority from Los Angeles, told the national beauty show that everyone should refrain from kissing a bald head as bald heads are signs of hair diseases.

(It has long been a standard female trick, if they were having difficulty in getting Paw to let loose of the family wallet, to sneak up behind him and kiss him on the bald spot, and it will not be stopped, though same is unhealthy.)

Unless the airport bonds carry today, this city will be as dead as Mah Jongg, less than seven years, and known as Chumpville.

The departure of Mr. Gerry to a new field is a direct loss to the community as he was one of the best loved men in Baker county.—(La Pine News). There should be more mention of the Romeo qualities of leading citizens.

Many of the fair sex are limping around in a pair of old shoes.

**BANGY WRITEN**  
 (Iola Kan., Reister)  
 The slack in oil is making some who have tride a Mont Carlo game to feel bad.

Jim Brister has not been feeling well and is over in Iola.

Leo Ashley was papering the Brister's Hous a Saturday Will Donnan was over to his house a Saturday over to him.

Walter Baker and family were up to the Parental Home a Sunday.

The trucks are running early and late hauling.

Mrs. Harder got a letter from her son saying oil was slack.

Mrs. Tom Slusher has been real poorly.

Tom Slusher got a call from Brannon saying they wanted some work done.

**About New York**

By Richard G. Mussock.  
 NEW YORK—Col. Charles A. Lindbergh and Miss Anne Spencer Morrow will be married by the light of the largest wedding candles ever made in modern times, says Antonio Ajello, and he should know.

For Mr. Ajello has been making candles since 1859. A foremost specialist in a rather restricted field, he can tell the history of the art back to the days of the Medici.

So individual is his own work that SICHARD G. MUSSOCK every taper turns out of his shop near the East river has a name. The Lindbergh-Morrow candles, for instance, probably will be called "Anna," for the bride. Seventy-eight inches tall, made of specially prepared wax from Ajello's own bees, and scented with the perfume of lilacs of the valley and orange blossoms, they will be the gift of Mr. and Mrs. George Argents, Jr., socially prominent friends of the couple.

**Society Candelmaker.**  
 Mr. Ajello, who is best known for his 18-foot Caruso memorial candle, which burns every All Souls' day in a Pompeii, Italy, church and is expected to last for 18 centuries, will not disclose how many candles he is making for the nuptials of America's hero. Four, bearing the letter "L," were completed in 10 days. Each would burn continuously for four days, but the custom is to lay them away after the ceremony, to be lighted again on each anniversary thereafter. The maker hopes that for years "Lindy and his lady" will be reminded of their romance by his handiwork.

His candles have lighted the consummation of other famous romances, including that of Gene Tunney and Polly Lauder. He has made candles for President Coolidge, Missoull, Queen Marie, the Prince of Wales, the Prince of Monaco (Monte Carlo), Eleonora Duse, D'Annunzio, and others of the great throughout the world. The largest anniversary candles—72 inches tall—was made for David Belasco's sixty-ninth birthday last year.

**Designs Exclusive.**  
 To the man who came from Italy at the age of two, every candle he fashions is a work of art, designed only on individual commission.

**MORROW IS TERMED 'PROPAGANDA AGENT'**  
 JUAREZ, Mexico, March 29—(P) Dwight W. Morrow, United States ambassador to Mexico, was termed a "propaganda agent" for the Calles regime, in a message last night from General Jose Gonzalez Escobar, commander in chief of the revolutionists, in the rebel diplomatic mission now in Washington.

General Escobar asked the mission to communicate the message to the state department and to the American people.

"Ambassador Morrow has obviously business connections with General Calles which prevent him from realizing the regrettable error he makes by invading the exclusive jurisdiction of the Mexican people, thereby prejudicing American interests not only in Mexico but in all Latin America," the message said.

**LANE MORLEY NAMED AIDE BY J. D. MICKLE**  
 SALEM, Ore., Mar. 30.—(P)—Lane Morley of Salem has been appointed by State Dairy and Food Commissioner J. D. Mickle as a deputy in the department. Morley has for a number of years been engaged in the restaurant and grocery business in Salem and has been mailing clerk of the state senate at several legislative sessions.

**NEW YORK, March 30.—(P)—**Mrs. Kate Davis Pulitzer, widow of Joseph Pulitzer, founder of the New York World, left an estate with a net value of \$2,410,528. The appraisal, filed today, showed that the gross estate was \$3,048,805 and that its largest item was securities worth \$2,459,877.

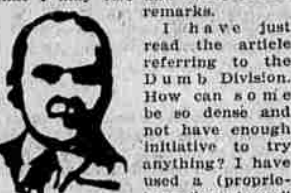

**QUESTIONS AND ANSWERS**  
 Correspondents Should Not Be "Worried"

Every day a number of anonymous queries come from "Worried." Some of the subjects of these queries are not suitable for discussion here. Others can be properly answered only by an individual reply. Most of them, I am sure, are from persons who really have nothing to worry about, if they would only let me have a chance to tell them. All questions and requests for information or advice are absolutely confidential so far as I am concerned. So why should any of my friends be "Worried" or "An-

**LOOKIN' DOWN OUR LONG LINE**  
 of Presidents, I believe Herbert Hoover is the best example of the possibilities of this country. He never held a poll book or even studied law. Gus Lindbergh 'll find that winnia' South America an' winnia' his wife's folks are two entirely different propositions.

Ernest Rostel was a local visitor at Table Rock last night, where he made a brief address at the meeting of the Table Rock Community club.

California lady writes:  
 As I count myself a charter member of the I & T club I feel that I may raise and make a few remarks.

I have just read the article referring to the Dumb Division. How can a medicine be so dense and not have enough initiative to try anything? I have used a (proprietary) "restorer" with a harmless looking name, but containing lead and sulphur, which dyes the hair black and I have felt no surprise has she told me she is 25 years old, and I was wanting something better; therefore I grasped with pleasure your formula of I & T and it is fine.

I do not find it necessary to use it more than once a week, with perhaps a little touch up if gray spots appear. I want to thank you heartily for the recipe. I find also that it helps to make it "set" the color to put in a little soap.

I am also an addict of your loatin ration, though I am not a medicine taker on general principles. I have never had a sickness of more than 24 hours since I was 5 years old, which is a pretty good record, as I am now past the three score and ten but don't tell any one. I never do.

I enjoy your articles, and when you get on one of your sarcastic streaks it is better than the "funnies."

The lady incloses a generous lock of her hair, and from the appearance of the sample I should have felt no surprise has she told me she is 25 years old. The hair is a well, I should call it a light brown color and it looks like natural color.

A New Jersey lady also rises to remark:  
 "I see quite a lot of talk about this copperas and black tea for dyeing gray hair. My hair is white in front, got some copperas and black tea and used it on my hair as a wash (warm) and behold not a gray hair in sight. I use it twice a week. I use a larger piece of copperas than you suggested—a piece the size of an olive, instead of a piece the size of a kernel of corn, in the pint of black tea, and apply it hot. I am employed where there are lots of young people and as yet no one has ever noticed my hair. They do say I dress it becomingly. I wish I could meet these people who complain about results and just let them see my hair. I use rubber gloves, as the copperas and tea stains the hands. I do so enjoy your health articles."
