KAISER'S SISTER LEFT LONG LIST OF DEBTS AND A WRIST WATCH

BONN, Germany, April 5.—(AP)—Creditors of the bankrupt Victoria Subkoff, nee Princess Victoria Hohenzollern and sister of the former Kaiser, learned today at their first meeting that within half a year Princess Victoria had accumulated debts totaling 660,000 marks (approximately \$165,000) which she has scarcely any assets to cover.

As to Victoria's assets even her palace and family silver apparently do not belong to the Hohenzollern princess, but are the property of her first husband's family. She herself owns only second rate jewelry and a wrist watch. She has a yearly pension of 39,000 marks (about \$9750) from her husband's family, the Schaumburg-Lippe.

A little orange rind grated into the cinnamon and sugar in which doughnuts are dipped makes a pleasant variation.

The wheat and barley that was damaged by the heavy frosts of last week are again starting out green from the roots. Asbury Beall says he does not remember when wheat was so badly damaged by frost. There may be a question as to what the outcome will be. A little more moisture would help grain and alfalfa to a great extent and perhaps all fruit would be benefited.

EAGLE PT. GRANGE

(Official)

At the last meeting of the community projects committee reported on a community squirrel poisoning campaign to be inaugurated with the approval of the Grange.

R. G. Fowler, county agent, was present and talked on the making and distributing of squirrel poison and the approximate cost, also of the method of exterminating gophers.

Arrangements were made whereby Mr. Fowler would make the poisoned barley and put it up in three, five and ten-pound packages, which would be sold to farmers of the community for eight cents a pound.

This poisoned barley will be ready for the farmers Monday, April 8th, and can be had at the home of R. A. Weidman, chairman of the community projects committee.

The farmers should take advantage of this opportunity to secure the poisoned barley at such a reduced price and should lose no time in getting it distributed, as the first brood of squirrels is now being reared. The second brood, however, can be largely reduced by getting your poison out now.

John Anderson of Central Point told of an effective method of exterminating rats.
