

COODING MOTH LARVA (NOT EXTINCT)

THIS study of the codling moth larva "at home" may be scientifically interesting to an entomologist but to you it simply means crop loss. GRASSELLI Arsenate of Lead can take the "not" out of the headline above, as far as your orchard is concerned.

MARION TURPIE PLAYS AROUND HOME COURSE

ST. ANDREWS, Scotland, May 3.—(AP)—Marion Turpie, New Or-

leans girl whose golfing pilgrimage to this town of her birth greatly interests St. Andrews, today played her first full round over the championship links.

"It thrilled me," she said, "for I went around in 88 which I am told is very good for a girl golfer."

Miss Turpie laughingly pointed out that she is Scotch only by two months.

"I was born at Saint Andrews, in 1907 but when I was two months old my parents moved to America," she explained, "so I am only just Scotch."

A QUESTION . . . TO THE MAN WHO IS "LOOKING AROUND" IN THE \$1000 CLASS

Can you swing maybe a hundred dollars more on your down-payment—and shoulder perhaps three additional payments?

That actually is all you have to consider in order to own a Reo Flying Cloud. But that, however, is not the whole story. By the end of the third year, with a Reo, you will have saved in repairs alone far more than your added investment—and you will have a fourth, fifth, sixth year and even more of really outstanding service to look forward to.

Reos are built the way only the finest cars are built—to last. And people who know motor cars will tell you that for long life, performance and mechanical dependability a Reo is to be compared only with cars in the highest price brackets. Besides, wouldn't you rather drive a car that hasn't an obvious price tag attached to it?

Look around, of course—but be sure to look in at your Reo dealer's.

Now you can have a Reo Flying Cloud at a lower price than ever before.
