At the request of Ben Alexander of Wausau, Wis., a member of the executive committee of the Owen-Oregon Lumber company, and an aviation enthusiast who plans to fly here from the middle west next fall, the Owen-Oregon company will paint on the roof of its crane and shipping shed, a huge sign bearing the words, "Medford Airport," with an arrow pointing to the field. The sign will be over 700 feet long, and in color and size, according to aviation and government regulations and specifications.

This guide to sky travelers will be made as soon as possible. Drawings for the new administration building to be erected at the new airport by the Pacific Airport Transport were rushed south by plane this morning for approval by officials, and actual construction will start as soon as a definite site can be secured.

According to the plans, the structure will cost between \$4000 and \$5000, with a waiting room, public writing room, ticket office, men's and women's rest room, a pilots' room with lockers and desks, private office and the superintendent's office, with a bay window so constructed that the superintendent can see the entire landing field from his desk.

The building will be built in the colonial-classical style of architecture.

He added he was particularly pleased that all the principal naval powers had expressed their adherence to suggestions made by the American delegation which included a conception of the task before them as one of reduction of naval armaments rather than of limitation.

Three others, Autie King, S. I. Cyphert and George Reed, were arrested with Wolff on similar charges.

Wolff will again enter a plea of not guilty to the charge and officers understand he will base the plea on the contention that the liquor, like the still, had been "planted" on his place without his knowledge.

The four are scheduled to have preliminary hearings in justice court today and it is possible they may be later turned over to the government for prosecution under the Jones law, providing a maximum of five years in jail and a fine of \$10,000.

The local shippers agreed to standardize the salting of fruit cars. Last season 49 different salting recipes were used. This season an effort will be made to use but one.

It was also promised the "spotting" of refrigerator cars at packing plants would be systematized to expedite movement of loaded cars.

### RICHFIELD WOULD PROTECT DEALERS ON 4-CENT BASIS

The proposal, signed by C. M. As it was falling a parachute became detached and witnesses were hopeful that at least one of the occupants would be saved, but the parachute proved empty and it was supposed that one of the men, in desperate haste, had detached it too soon.

The victims were two pilots and three bombing students.

NEW YORK, May 7.—(AP)—Frequent shifts of speculative sentiment characterized today's stock market which opened heavy, rallied briskly until the early afternoon and then turned reactionary again in the final hour. Final quotations were generally lower with a long list of issues showing net declines of 1 to 7 points. A few stocks, moved against the downward trend, new high records being established during the day by Airways, Electric Appliance, American Rolling Mills, Federal Light and Traction, and General Railway signal.

High money rates were the principal disturbing influence, although Radio sold down more than 6 points to 100 in reflection of a disappointing first quarter report. American Beet Sugar and International Cement rallied briskly on the publication of the tariff bill showing higher duties on cement and sugar. Sales approximated 3,200,000 shares.

venture subsidy plan, which would pay a bonus to exporting middlemen, cost the taxpayers heavily, and do the farmer little, if any, good.

Russia attacks farm relief intelligently. Albert Kahn, of Detroit, one of the ablest architects in America, has been engaged to spend \$1,000,000 in tractor factories at the mouth of the Volga river.

Mr. Kahn, who builds all of Henry Ford's factories, will have at his disposition all the Ford plans. The factories will produce 40,000 a year, sold at cost, on long credit to farmers.

We'd call that "paternalism" here. But perhaps it's only common sense. We may even learn something from Russia.

Owen D. Young, able American, is thought to have solved the German reparations problem. His suggestion, approved by Britain, would let Germany pay annuities for 37 years, instead of 58 years, beginning with \$402,000,000 a year, instead of \$600,000,000, increasing payments by \$6,000,000 a year, for 10 years. It would be better for Europe to settle its own quarrels, this country keeping out of them.

But, since we must meddle, we seem to have chosen well in selecting Mr. Young.

Make your Spring salads as gay and piquant and different as you like—but don't forget to bring your imagination to bear on your French Dressing.

Two parts Wesson Oil, one part lemon juice or vinegar; salt and pepper—then whatever your fancy dictates. Here, for instance honey, a little heavy cream and chopped mint. Paprika, of course, for color... It's just such little flights of imagination that give unexpected zest and savor to your salad.

We have published a Wesson Oil recipe book which contains suggestions for eighteen different French Dressings. Address the
